REPORT

OF THE

MINISTER OF EDUCATION

FOR THE YEAR 1917

To His Honour

COLONEL THE HONOURABLE SIR JOHN HENDRIE, K.C.M.G., C.V.O., etc., etc.
Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

I beg to present the Report of the Department of Education for the year 1917. The statistics are mainly those for the calendar year 1916. The appendices include the reports of the High School and Continuation School Inspectors, the Chief Inspector of Public and Separate Schools, the Director of Technical and Industrial Education, the Inspector of Elementary Agricultural Education, the Inspector of Public Libraries, and the Principals of the Schools for the Deaf and the Blind. These reports reveal the importance of the educational work carried on in the state-aided and state-controlled schools of the Province, and furnish adequate information respecting every part of the system.

The War and Attendance

Notwithstanding the effects of the war the condition of education in the Province is satisfactory. Considering the social and economic changes, which a prolonged and expensive war is bound to entail, the schools are not suffering to the extent which was feared at the outset. Parents and trustee boards are doing the best they can under difficult circumstances, and there is ground for the hope that Ontario, in spite of the strain put upon its energies and resources, will not relax in the zeal for education for which its people have long been famous. In fact, if the example of other progressive communities is followed—a course which the Province cannot well avoid—we should seize upon the occasion afforded by the war to improve our system of education, to provide greater facilities for the training of the young and to offer stronger inducement to the best teachers to continue in the profession. It cannot be overlooked that the future of the country must one day depend largely upon those who are now at school. Any plan of reconstruction which neglects this potent fact must prove shortsighted and ineffective. School

attendance, therefore, is of the first importance. There are temptations produced by the war, which tend to make parents careless in seeing that the children go regularly to school. There is, however, no valid reason why the attendance of the younger pupils, who are not absolutely required to replace the scarcity of adult labour, should not be insisted upon. I cannot urge too strongly upon parents, teachers and trustees, the duty of seeing that every child of school age goes to school as regularly as possible. Ontario, which has nobly borne so many of the burdens of the war, must not fail at this point.

The conditions in the elementary schools, based upon statistics covering the period ending with December, 1916, reflect a prosperity which two and a half years of war had not diminished. The average salaries of teachers in elementary schools show substantial increases. The increases for the year in rural schools were \$33 and \$12, in urban schools \$24 and \$14, and in all public schools \$55 and \$13 for male and female teachers respectively. These increases are due in some measure to the additional numbers holding the higher grades of certificates. The teachers with these certificates (first class and second class) necessarily command the higher salaries. The figures for 1915 and 1916 are:

	Male		Female	
	1915	1916	1915	1916
	\$	\$	\$	\$
First Class certificates.....	1,433	1,434	668	681
Second " "	830	874	647	654
Third Class and District certificates.....	526	541	479	483
Temporary certificates.....	454	464	408	409

The improvement for the year in the standing of the teachers of these schools is indicated by the additional numbers of teachers with professional certificates, viz.: 33 First Class, and 534 Second Class. One hundred and seventy-four fewer Third Class and 149 fewer "Other Class" (including Temporary) certificates were held in 1916 than in the preceding year, although the total number of teachers engaged increased by 244, which made the total 12,094 exclusive of Kindergarten and Night School teachers. The statement below shows what a vast improvement has been effected in the professional standing of elementary school teachers in the last ten years, as well as a decided improvement in 1916 over the preceding year.

	First Class	Second Class	Third Class	Other Class
1906.....	595	4007	3254	1812
1915.....	1051	8025	1520	1254
1916.....	1084	8559	1346	1105

In ten years there have been great increases in public school teachers' salaries. These increases as well as a comparison with the salaries paid in the previous year are shown in the accompanying table:

	1906		1915		1916		Increases for ten years	
	Male	Female	Male	Female	Male	Female	Male	Female
Rural Schools.....	\$ 425	\$ 325	\$ 621	\$ 549	\$ 654	\$ 561	\$ 229	\$ 236
Urban Schools.....	829	445	1,310	696	1,334	710	505	265
All Schools	547	369	902	613	957	626	410	257

During the ten years the amount expended on teachers' salaries has increased from \$3,880,548 to \$7,929,490, or 104 per cent., and the total expenditure has arisen 108 per cent., or from \$6,403,206 to \$13,351,905.

The enrolled attendance at these elementary schools was 508,975, which was an increase of 3,901 for the year and of 59,983 for ten years. The percentage of average to total attendance decreased from 66.69 to 64.61, or 2 per cent. for the year. A decade ago it was 59.52. The decrease for the past year was to a great extent caused by the employment of the older pupils on the farms.

For the year the enrolment in the rural schools decreased by 3,952, and in the urban schools, the enrolment increased by 7,853. The percentages are now 44.74 and 55.25 respectively for rural and urban school enrolments. Ten years ago the percentages were 55.22 and 44.78.

Some Effects of the War

In his report the Chief Inspector, Dr. Waugh, draws attention to certain factors in the present situation based upon recent reports to him from the various rural and urban inspectors dealing with the year 1917. The attendance, the supply of teachers, especially male teachers, and the construction of new buildings are all affected, more or less, by the war. I have already referred to the question of school attendance. The necessity of increased farm production during 1918 may justify a continuance of the practice of withdrawing pupils from school to work on the farms. But, as has been pointed out, this should not affect the attendance of the younger pupils. The desire of parents to secure an education for their children is one of the best characteristics of the people of Ontario, and it is only necessary to remind them of their obligations in this respect to ensure their taking care to see that absence from school is not allowed where it can be avoided. The delay in building new schools, or in making extensive improvements to old buildings, is regrettable, but the Department has felt that its requirements should not be too strongly insisted upon during a period when the financial resources of the country are being drawn upon for other purposes of the highest consequence. It is gratifying to note, however, that in localities not a few the people have made the extra sacrifices demanded to provide healthier and more commodious quarters for the pupils. There are also encouraging signs that the trustees in many parts of the Province only await the termination of the war in order to build better schools.

That the natural increase of teachers' salaries should not be arrested for any present cause is of the utmost importance. The higher price paid for any kind of service is undoubtedly part of the general economic condition of the world. Readjustments of salary are necessary in all branches of commercial and industrial life, and the teachers have a claim which school boards should be prompt to recognize since the teaching body itself is usually the last to put forward its own interests. This disposition is honourable to the teachers, but entails upon the Department and upon trustee boards the duty of being foremost in maintaining the efficiency, by maintaining the prosperity, of the teaching profession. The statistics for 1916, as noted above, show that salaries are being generally raised, but we are face to face with more stringent conditions, and I regard the continued increase of salaries as a vital factor in educational progress.

Continuation Schools

The attendance of pupils, especially boys, at the Continuation Schools has been lowered by the need of farm labour and by the attractions of other occupations at this time. The number of these schools is 132. The total expenditure in 1916 was \$306,148, the amount paid in salaries having increased from \$219,660 to \$224,464. The increase in this item is not large and partly accounts for the scarcity of teachers professionally qualified to teach in these schools. There are few surer causes of such scarcity than low salaries. The value of the equipment was greater by about \$7,000 than in the preceding year. The enrolled attendance for the school year 1916-17 was 5,082, and the average attendance 3,729, or 73.37 per cent. of the total enrolment. Of this attendance, 61.05 per cent. was made up of girls. In the preceding year the girls formed only 58.77 of the total enrolment. That these schools with their facilities for secondary education continue to be much appreciated by the farmers of the Province is shown by the fact that more than half the attendance, viz., 52.63 per cent., comes from farmers' homes, whilst only 29.45 per cent. of the High School attendance is derived from the same source. The classes of persons who send pupils to these schools are represented in the following proportions:

Commercial	11.78	per cent.
Agricultural	52.63	" "
Professional	4.38	" "
Teaching51	" "
The Trades	11.98	" "
Labouring Occupations	7.69	" "
Other Classes	10.99	" "

There are 234 teachers in Continuation Schools, 71 per cent. women and 29 per cent. men. In the previous year the men formed 32 per cent. of the total. As in the elementary schools overseas enlistment for the war is responsible for the decrease. The average salaries of the assistant teachers increased by \$17 for the year while that of the principals increased by \$7. The average salaries are \$1,093 for principals, \$758 for women assistants and \$755 for men assistants. Ten years ago the average salary for all teachers in these schools was only \$619.

The following table exhibits the growth of Continuation Schools in the last decade, and also makes a comparison with the preceding year, 1915:

Year	Schools	Teachers	Attendance	Teachers' salaries	Government Grants	Value of Equipment	Total Expenditure
1906....	91	117	3,993	\$ 72,400	\$ 18,605	\$ 17,933	*
1915....	132	238	6,800	219,660	63,529	80,961	310,794
1916....	†132	†234	†5,082	224,464	64,753	87,901	306,148

* No record.

† For school year 1916-1917.

High Schools

In the 161 High Schools and Collegiate Institutes of Ontario there was an enrolled attendance during 1916-17 of 28,833 pupils, with an average attendance of almost 80 per cent. of the enrolment. The pupils were divided, as to sex, into 12,339 boys and 16,494 girls. The proportion of boys was less, due partly to outside employment and partly to the enlistment of the older pupils for military service. The total High School expenditure in 1916 was \$2,488,254, an increase of \$17,280, and it may be noted that several new buildings of a modern type have either been erected or are in course of construction. In Barrie and in Brampton, where the schools were destroyed by fire, the boards have shown commendable enterprise in taking steps to replace the schools. There are 1,038 teachers in the High Schools, about 53 per cent. of them being men and about 47 per cent. women. The number of male teachers has decreased in the past ten years. The average salaries during the same period have risen as follows:

Principals	\$1,303	\$1,839
Male Assistants	1,091	1,667
Female Assistants	762	1,133

There are increases, although not large ones, in the salaries of all these classes of teachers over the preceding year. The progress made by the High Schools during the ten year period in all respects is remarkable and encouraging.

The School for the Blind

Principal Race, who assumed the duties of head of the Ontario School for the Blind on September 1st, 1917, pays a cordial tribute to the mental powers and zeal for knowledge of the pupils of the school. He finds them as responsive to suggestions, and as appreciative of training that will fit them for life as their seeing brothers and sisters. Mr. Race acknowledges the readiness of his immediate predecessors, Mr. H. F. Gardiner, who retired from the principalship in 1916, and Mr. C. W. James, who conducted the school successfully for a year as acting principal during 1916-17, to assist him in taking over the conduct of the school, which is now in a flourishing condition. The unexpected and lamented death of Mr. W. B. Wickens, for many years senior master, was a loss which had to be replaced with full consideration of the important post to be filled. The selection of the principal and of the new senior master, Mr. G. A. Cole, was based upon their high characters as individuals and their successful teaching careers. The pupils are thus

assured of the most competent direction in all branches of training, moral, physical, and mental. The supervision of experienced educators should enable them to secure the best results from the academic and vocational courses in the school. The academic courses, it is believed, may be extended to regular High School work in order that the blind pupils may be under no handicap in this respect in after life. The changes made by the new principal in the conduct of the present classes, as well as his general management of the school, meet with the highest approval of the Government which has under contemplation measures to promote the welfare of the adult blind by increased facilities for industrial training. The proposal to institute the British braille system of printing, or a modified form of it, with a view to the use among the Canadian blind of the literature now produced in England for blind readers, is also approved of by the Government.

The Teachers' Superannuation Act

The enlightened policy of the Legislature in adopting last year an Act for the superannuation of teachers and inspectors has been properly greeted as a step of marked educational advancement. The Act has now been in operation since April, 1917, and in a short time pensions to those who have proved their claims under its provisions will be payable. The Commission established under the terms of the new law consists of five persons, two of whom are appointed by the Ontario Educational Association from the membership of that body, and who thus represent the teachers, while the other three, one of whom is an actuary, are appointed by the Province on the recommendation of the Minister of Education. The present composition of the Commission is as follows: A. H. U. Colquhoun, Chairman; Professor M. A. Mackenzie, Actuary; John R. Humphreys, Principal R. A. Gray, and Inspector J. H. Putman. The regulations governing the Commission have been adopted by the Lieutenant-Governor in Council. The provisions prescribing the procedure under which pensions are granted have been issued to the teaching profession throughout the Province.

The Public Libraries

The usefulness of the public libraries of the Province has been enhanced rather than diminished by the war, and the report of the Inspector, Mr. W. O. Carson, affords evidence that the library movement has a strong hold upon popular approval. The value of applying professional knowledge and experience to the extension of the work is seen from the fact that in the larger centres where trained librarians and assistants are placed in charge, and where the needs of the readers are intelligently supplied, the libraries fulfil a great purpose and are indispensable to the education of the community. The school for the training of assistants, conducted in 1917, was on a larger scale than heretofore, and through the co-operation of the Toronto Public Library Board and its Chief Librarian, Dr. George H. Locke, the Department was enabled to give practical training of permanent worth to those who attended. The issue of a quarterly review for the libraries, begun at the suggestion of the present Inspector, provides excellent suggestions for book selection, while the library institutes, which have been re-organized and improved, with good results, continue to stimulate the enthusiasm of library workers. The circulation of travelling libraries has increased. The difficulties of inadequate incomes for the support of libraries, the small salaries paid to the staffs, the limitations imposed by these and other conditions upon the

rapid development of the public library service are questions discussed in the Inspector's report which should receive the careful consideration of all who have this branch of education at heart.

School for the Deaf

A high degree of efficiency and prosperity marks the Provincial School for the Deaf. The parents of deaf children, as the Principal, Dr. Coughlin, points out in his report, take full advantage of the opportunities of training provided by this school. The attendance was 248. The success of the pupils in the classes is shown by their ability to secure good positions afterwards, the employment of graduates in the Toronto Post Office and as telegraph operators being gratifying evidence that the handicap of deafness is no bar to advancement in after life. The work of the teachers is faithfully performed and the system of oral teaching goes steadily forward. The admission of a pupil to the Belleville High School, after taking the elementary course in the School for the Deaf, demonstrates that after reaching entrance standard a well taught pupil can take up matriculation or other high school work without great difficulty. The Public School Inspector, Mr. Clarke, who annually inspects the classes in a helpful and efficient manner, reports most favourably upon the progress being made. The financial management of the school is equally encouraging, and notwithstanding the higher salaries paid to teachers and the increased cost of food supplies and fuel, the charge for maintenance is kept at a figure which reflects careful and economical control. The farm attached to the establishment has been operated at a fair profit, and supplies of various kinds provide abundant fruit, vegetables, and milk for the pupils whose health is greatly benefited thereby. The future of this school promises to be one of increased usefulness to the Province.

The Teachers and the War

There will be found appended a corrected list of the names of those Ontario teachers who have enlisted for overseas service in the war, and who have shown such splendid courage and devotion. It will be observed that 34 teachers have been killed in action, and that there have been 485 other enlistments. This record, so honourable to the teaching profession, is but one of many proofs that the services of teachers to the state, both as instructors of the youths forming so large a proportion of the army of Canada, and as citizens ready as individuals to take their part in the great struggle, have established a claim upon the gratitude of the country which can never be forgotten.

Respectfully submitted,

R. A. PYNE,

Minister of Education.

February 18th, 1918.

ONTARIO TEACHERS WHO HAVE ENLISTED FOR OVERSEAS SERVICE

According to the reports received to date from Inspectors and Principals, teachers have enlisted for Overseas Service from the several grades of schools, as follows:—

Those who have made the Supreme Sacrifice:

High Schools	7
Public Schools	22
Normal School Students who did not complete their Courses	2
Special and Temporary Teachers	3
Total	34

Those who have seen Active Service and have returned '15

Other Enlistments Reported:

High Schools	57
Public Schools	349
Normal and Faculty Students	36
Special and Temporary Teachers	28
Total	470

Others who offered their services and who were either rejected at once as not physically fit or served for a time in Canada and were then honourably discharged 23

Grand Total 542

Teachers Reported "Killed in Action" or "Missing"

According to the reports received at the Department, the following teachers, on active service, have made the Supreme Sacrifice:

Name	Cert.	School where last engaged	Report
Archer, Matthew	II	Attending Normal School ..	Killed in action.
Archibald, Andrew ...	I	Dufferin School, Toronto ..	Killed in action, April 4th, 1917,
Barber, Percy L.	I	Essex St. School, Toronto..	Killed.
Bennie, Robert S.	III	S.S. 4, Pelee Island	Missing, 6th June, '17.
Buchanan, Wm. P.	I	Carlton School, Toronto ...	Killed in action at Lens, 10th June, '17.
Burns, J. Edward'	T.	S.S. 8, Herschel	Killed in action.
Bush, Delbert	T.	S.S. 17, Hillier	Killed.
Butson, Wm. Geo.	H.S.A.	Bowmanville High School ..	Killed at Vimy, 19th April, '17.
Call, Geo. W.	II	Dickson School, Galt	Killed at Somme.
Campbell, Gordon A. ..	II	S.S. 5, Ancaster	Killed in action, 20th August, '17.
Charlton, Wm. Lionel. .	I	S.S. 7, McGillivray	Killed, Belgium, 20th July, '16.
Chidley, Philip F.	II	Student, North Bay Normal School	Killed in action, 25th April, '16.
Clipperton, W. H.	I	La Verandrye School, Winnipeg	Killed in action.
Crerar, John S.	H.S.P.	Port Rowan High School ..	Killed at Vimy, 9th April, '17.
Doran, Frank B.	II	S. S. 2, Matilda.....	Killed in action, August, '17.
Elliot, Wm. Ralph	III	S.S. 2, Faraday	Killed in action.
Ferguson, Wilbert R. .	II	Student, North Bay N. S. ..	Killed in action, Zilla-beke, 3rd June, '16.
Garbutt, Harold A. ...		Student, Peterborough N. S.	Killed, Feb., '17.

Teachers Reported "Killed in Action" or "Missing"—Con.

Name	Cert.	School where last engaged	Report
Govenlock, Thos. E. . .	H.S.A.	St. Catharines, C. I.	Killed, Courcellette, 30th Sept., '16.
Hare, James A.	II	Mossley, P. S.	Killed in action, 26th July, '17.
Harvey, J. Irvine . . .	H.S.A.	Chatham, C. I.	Killed at Somme, '16.
Kerr, Frank Lyons . . .	II	Student, North Bay N. S. . .	Killed at Somme, Sept., '16.
Laurie, Stuart M. . . .	II	King George School, Hamilton	Killed in action, 3rd November, '17.
Lee, Harry E.	I	Annette St., Toronto	Killed, Courcellette, 16th Sept., '16.
McConnell, Leonard . .	T.	S.S. 17, Woford	Killed, Passchendaele.
Metcalf, Geo. A.	II	S.S. 2, Neelon	Killed, Festubert, June, '15.
Milliken, Thos. W. . . .	II	Matheson P. S.	Killed in action.
Nimmo, Lester G. . . .		Attending Stratford N. S. . .	Died of wounds, Sept., '17.
Pickering, Howard V. .	Spec.	Stratford Normal School . .	Killed in action, 6th Nov. '17.
Thomson, Clinton C. E. .	II	Scott St., St. Thomas	Killed, Arleux, 29th April, '17.
Welland, Jos. F.	II	St. Andrews, Galt	Killed in action, 5th Nov. '17.
Williams, Russell	II	Central School, Galt	Killed at Somme.
Wood, F. H.	H.S.P.	Malvern C. I., Toronto	Missing, 12th June, '16.
Wright, Wm. J.	H.S.P.	St. Mary's C. I.	Killed in action, Aug., '17.

Those who Have Served Overseas and Have Returned

Name	Cert.	School where last engaged	Report
Corneil, Fred. M.	II	S.S. 2, Cavan	Now teaching in Kingston Hospital.
Cowles, John P.	H.S.P.	Dunnville High School	Granted discharge; again teaching.
Douglas, S. H.		Attending Faculty of Education, Toronto	Wounded at Courcellette, 15th Sept., '16.
Elliott, Arthur H. . . .	I	Pape Ave. P. S., Toronto . . .	Wounded in arm.
Firth, Alexander	II	Orangeville P. S.	Invalided home.
Jewitt, Oliver	Spec.	St. Thomas C. I.	Granted discharge; again teaching.
Keith, Geo. Walter . . .	Spec.	Parkdale C. I., Toronto	Returned and again teaching.
McCamus, Wm. R.	Spec.	Leamington H. S.	Wounded at Vimy, 1st June, '17; again teaching.
McMaster, David A. . .	D.	S.S. 6, Brunel	Recommended for Military Medal; wounded, 27th Sept., '16.
Pentland, Geo. E.	H.S.P.	Beamsville High School	Granted discharge; again teaching.
Richardson, Geo. P. . .	II	Huron St. P. S., Toronto . .	Granted discharge; again teaching.

Those who Have Served Overseas and Have Returned—Continued

Name	Cert.	School where last engaged	Report
Snider, Egerton E.	H.S.P.	Port Hope H. S.	Granted discharge; again teaching.
Strader, Ed.	II	S.S. 13, Matilda	Invalided home.
Stothers, Carman E. ..		Attending Toronto Faculty..	Wounded, June, '17; granted discharge, 11th, Feb., '18.
Tanton, Francis	H.S.A.	Ingersoll C. I.	Granted discharge; again teaching.
Welland, Fred. J.	II	Dickson P. S., Galt	Wounded at Vimy.

High and Continuation School Teachers who have Enlisted for Overseas Service

Normal and Faculty Students

The following students enlisted, before the completion of their Courses:

Name	School	Name	School
Avery, Geo. M.	Stratford N. S.	Holmes, Ernest N. ..	Queen's Faculty.
Bailey, Garnet R.	Peterborough N. S.	Honey, Edgar M.	Peterborough N. S.
Baker, H.	Stratford N. S.	Horning, John H.	Toronto Faculty.
Bueglass, Ralph J.	Stratford N. S.	Irvine, James B.	Stratford N. S.
Bullick, Geo.	North Bay N. S.	McGregor, Wm.	Toronto Faculty.
Burwash, Herbert A.	Peterborough N. S.	MacMillan, Dan A.	Ottawa N. S.
Carley, Forest C.	Peterborough N. S.	Martyn, Eugene F. ..	Stratford N. S.
Carson, Robt. J.	Toronto N. S.	Morley, Gordon J.	Stratford N. S.
Clinton, James H.	Stratford N. S.	Nash, Roland P.	Toronto Faculty.
Cook, R. H. B.	Toronto Faculty.	Penrice, Alvin R.	Stratford N. S.
Cracknell, Arthur G.	Peterborough N. S.	Pike, Russell J.	Toronto N. S.
Doherty, John D.	Toronto Faculty.	Ravitch, Henry	Stratford N. S.
Donald, Roy B.	Toronto Faculty.	Robinson, Gabriel A.	Peterborough N. S.
Donaldson, Thos. H.	Queen's Faculty.	Shewfelt, Archibald ..	Stratford N. S.
Dunsmore, Jos. M.	Stratford N. S.	Taylor, Roy	Hamilton N. S.
Findlay, R. Murray ..	Stratford N. S.	Trusler, A. C.	Hamilton N. S.
Fraser, Gordon K.	Toronto Faculty.	Veitch, Ross W.	Stratford N. S.
Hart, Enos	North Bay N. S.	Walton, Geo. R.	Stratford N. S.

Special and Temporary Teachers

The following teachers at the time of their enlistment were engaged in teaching under special conditions either as

- (1) Special teachers in Technical or Normal Schools;
- (2) Instructors in Drill or Physical Culture in High Schools, or
- (3) Temporary teachers in Public or Separate Schools.

Name	Qualifications	School where last engaged	Date of Enlistment
Adams, A. H. S.	Scotch	Technical School, Toronto ..	5th March, '15.
Alkenbrack, Ibri B.	Temp.	S.S. 13, Miller	18th Aug., '15.
Armstrong, Ed. W.	Temp.	S.S. 4, Dobie	3rd Jan., '16.
Baron, Osborne	Phys. Cult.	Kitchener C. I.	Aug., '14.
Beeson, James	Phys. Cult.	St. Thomas C. I.	Nov., '14.
Brimble, Gerard	Temp.	S.S. 1, Jaffray	May, '15.
Chester, John W.	A.R.C.A.		
	Eng.	Cent. Tech. School, Toronto.	20th April, '15.
Cole, Geo. E.	Temp.	Haileybury H. S.	1st Jan., '16.
Collins, Warren A.	Temp.	S.S. 2, St. Edmunds	1st April, '16.
Graham, Christopher	Temp.	S.S. 6, Lindsay	11th March, '16.
Gregory, Wm.	Drill	London C. I.	1st Dec., '15.
Huggins, S. J.	Phys. Cult.	Ottawa C. I.	Sept., '14.
McIntosh, James P.	Phys. Cult.	Hamilton P. S.	Aug., '14.
Merriman, Bertha	Nurse	Hamilton P. S.	May, '15.
Mutter, J. M.	Man. Train	Brantford C. I.	Jan., '16.
Oxtaby, Wm. G.	Cadet Inst	Brantford C. I.	1914.
Read, Arthur	Temp.	S.S. 2, Worthington	1st Dec., '15.
Robertson, Margaret	H. Science	Central Tech. Sch., Toronto ..	1st Sept., '16.
Scott, Manson	Temp.	S.S. 6, Dilke	29th March, '16.
Sexsmith, Edgar	Temp.	S.S. 4, N. Marysburg	
Shackleton, Albert	Man. Train	Chatham C. I.	Oct., '16.
Skinner, Jesse	Drill Inst.	Hamilton N. S.	9th March, '16.
Stafford, Walter H.	Temp.	S.S. 4, Howick	April, '16.
Williams, John	Cadet Inst	St. Catharines C. I.	12th April, '18.
Witthun, Wm.	Drill Inst.	Hamilton P. S.	Sept., '14.
Wright, Gilbert S.	Man. Train.	London P. S.	1916.

**Teachers who Offered their Services and were not Accepted or have
since been Discharged**

Name	Certificate	School where last engaged
Allan, Duncan M.	II	S. S. 9, Nottawasaga.
Barrager, David	II	Queen Mary P. S., Belleville.
Brown, Arthur R.	H.S.A.	Watford H. S.
Campbell, R. J.	II	Petrolea P. S.
Craig, J. J.	H.S.P.	P. S. Inspector.
Durant, Gilbert	III	S.S. 6, Dysart.
Eaid, Chas. R.	II	Alex. Muir P. S., Sault Ste. Marie.
Entwistle, Robt. G.	II	Almonte P. S.
Fathers, I. E. J.	III	S.S. 3, Dalton.
Hagarty, E. W.	H.S.P.	Harbord C. I.
Hambly, Philo K.	Spec.	Brockville C. I.
Jamieson, Clinton E.	H.S.P.	Peterborough C. I.
Knowles, Albert F.	II	S.S. 4, Dymond.
McIntosh, Herman W.	I	Strathcona P. S., Toronto.
McNally, Walter H.	III	
Moss, Eldrin W.	II	Paris P. S.
Parkhill, Geo. E.	II	S.S. 4, Burford.
Quackenbush, James G.	II	Morewood P. S.
Robison, Nelson R.		Stratford N. S., student.
Spence, Clarence C.	II	London N. S.
Tait, Frank B.		Attending Hamilton N. S.
Toll, Chas. Edgar	I	S.S. 3, East and West Flamboro.
Watt, James H.	I	John Fisher P. S., Toronto.

SERVICE RECORD

The following is the record as far as reports have been received of those listed above who have:

- (1) Taken ill while Overseas.
- (2) Been wounded in Action.
- (3) Been decorated for Distinguished Service.

Public School Teachers

Name.	Record.
Boulding, Chas. R.	Wounded at Festnoi, 3rd May, '17.
Burt, Arthur C.	Hands and feet badly frozen.
Campbell, Goldie T.	Twice slightly wounded.
Dewart, John A.	Awarded Military Medal, 8th February, '18.
Dickson, Frank	Seriously wounded, 8th October, '16.
Dyer, Jos. W.	Wounded in head, arms and legs, at Vimy Ridge, 9th April, '17.
Elliott, Fred, Wm.	Shell-shock, Courcellette.
Francis, Arthur	Operation after coming out of trenches followed by pneumonia.
Fuller, Jas. C.	Received Military Medal, 8th August, '16. Given Commission as Lieutenant.
Fydel, Melvin R.	In Orpington Hospital with trench fever, 22nd Nov., '17.
Gibson, Edward L.	Wounded in action, 7th November, '17.
Given, Reginald F.	Wounded, right hand and arm being smashed, 20th August, '17.
Gray, Wm. G.	Wounded.
Harvey, Norman F.	Wounded and recovered.
Hoover, Robt. H.	Awarded Military Medal.
Isaac, Oni	Wounded and shell-shocked, September, '16.

Public School Teachers—Continued

Name	Record
Knowles, Morley W.	Seriously wounded at Vimy Ridge, 9th April, '17.
Latimer, Robt. H.	Taken prisoner, 2nd June, '16.
McCullough, Jas. L.	Badly wounded.
McFadyen, Henry L.	Awarded D.C.M., after Vimy Ridge.
McGill, Geo. W.	Wounded at Lens, September, '17.
McGirr, Ernest J.	In hospital with trench fever and slightly wounded on returning to duty.
Macklin, Garnet E.	Received D.C.M. after Vimy Ridge.
MacMillan, Archie K.	Wounded in June, '17.
Might, Percy G.	Trench fever, February, '17.
Moore, Harry C.	Wounded in head and shoulder, 25th October, '17.
Myrick, Walter G.	Gassed.
Nayler, Edwin T.	Wounded, October, '16.
Park, Maurice H.	Disabled while in R.F.C.
Posliff, Alfred L.	Wounded twice.
Ramage, Chas. C.	Slightly wounded, November, '17.
Sabine, Alden T. S.	Transferred to Canadian Army Pay Corps, December, '16, because of injury to feet.
Smillie, Wm. R.	Wounded, autumn, '17.
Spenceley, Harold S.	Wounded.
Toogood, Wilfred A.	Received gun-shot wound in legs at Fresnoy, 3rd May, '17.
Wagar, Ernest T.	Slightly wounded.
Wheable, Geoffrey A.	Wounded in foot at Passchendaele, 9th November, '17.
Wilson, John S.	Wounded at St. Julien, April, '15. Won commission on field, Nov. '16.
Young, J. Perry	Wounded before Regina Trench.

High School Teachers

Name	Record
Atkinson, W. D. T.	Slightly wounded.
Cline, Geo. A.	Awarded Legion of Honour. Awarded D.S.O., January, '17.
Cook, Leslie B.	Wounded at Somme, 8th September, '16.
Dunkley, A. W.	Wounded, 5th November, '17.
Lamb, Walter J.	In hospital with wounded knee, 18th November, '17.
Manning, Ernest D.	Wounded in arm.
Manning, Harold G.	Wounded and returned on leave, 14th November, '17.
Michell, Wm. C.	Wounded by shrapnel in arm and recovered.
Rochat, Paul	French Reservist, joined his colours, August, '14; promoted on field; wounded, November, '14; awarded Croix de Guerre, October, '16. Now training U.S. troops.
Symington, Jas. B.	Wounded in head.
Watson, E. H. A.	Suffering from trench-mouth and fever, 14th November, '17.
Worden, Ernest H. G.	Wounded. Received Military Cross.

Normal Student

Name	Record
Taylor, Roy	Wounded, November, '17.

APPENDIX A

REPORT OF THE CHIEF INSPECTOR OF PUBLIC AND SEPARATE SCHOOLS

THE HONOURABLE R. A. PYNE, M.D., LL.D.,

Minister of Education for Ontario.

I have the honour to submit herewith my report upon the condition of the elementary schools throughout the Province. The information is derived from the Annual Reports of the Public and Separate School Inspectors in the various counties and districts.

The most significant factor to be taken into consideration in estimating the progress of education for the past year is the great war now being waged in Europe in defence of civilization. The war has affected the schools:—

1st. In diminishing the normal supply of teachers.

2nd. In decreasing the amounts expended for the improvement and construction of school buildings.

3rd. In increasing the difficulty of securing the punctual and regular attendance of pupils at school.

The Diminished Supply of Teachers

With reference to the first point raised, it has been found necessary, for the present year, to issue an increased number of temporary certificates, notwithstanding the fact that 365 teachers have been graduated from the Faculties of Education, 1,261 teachers from the Normal Schools, and 215 teachers from the Model Schools including English-French and 288 from the Summer Model Schools. This is accounted for by the fact that a considerable number of teachers have enlisted for service overseas and a much greater number have withdrawn to more lucrative positions with fewer responsibilities. The loss to the Province, not counting the cost of educating these teachers, is sufficient to cause serious alarm to those who are responsible for the efficiency of the Elementary Schools. The obvious and manifest remedy for this state of affairs is to insist that Boards of Trustees shall adjust the salaries of their teachers to the increased cost of living and to the increased wages now earned in other occupations.

Whilst the reluctance to leave a chosen and accustomed occupation for a new and untried one, may, for a short period of time, retard the exodus, it is clear that this period is now at an end and that the *vis inertiae* can no longer be counted on to retain trained teachers in the profession at the salaries which have been paid in the past.

Unless a very considerable increase in the salaries of teachers is made, a still more serious condition will arise. Not only will the profession lose the services of the teachers now engaged in it, but it will fail to attract students to the teachers' training schools. To this state of affairs, only one of two outcomes is possible. Either the schools will be left without competent teachers, a condition which for the sake of the future of the country is even in the last extremity not to be con-

templated, or there will be an abnormal increase in the salaries of teachers in accordance with the inexorable law of demand and supply. In other words, a failure now to pay reasonable salaries will inevitably compel the Province to pay, in the future, unreasonable salaries.

I am pleased, however, to be able to say that there has been some recognition of the facts stated above in the more enlightened and progressive communities, and that a serious effort has been made to restore the adjustment by giving reasonable increases.

The Construction of New School Buildings

The reports of the Public School Inspectors show that plans for the erection of new buildings and the improvement of old buildings have been interfered with by increases in the cost of labour, material and transportation. Indeed in some cases the last has been the most important obstacle. Notwithstanding these difficulties, however, I am glad to report that a very considerable number of new school buildings has been erected. It is also gratifying to observe the very great improvement in school architecture. All the buildings, which have recently been erected, make complete provision for the comfort, health and convenience of the pupils in attendance. The movement for the improvement of school grounds has also shown very considerable progress. In these matters two opposing forces have been at work.

On the one side, the difficulties and obstacles resulting from war conditions: on the other side, the awakening of the public conscience to the obligation to provide proper physical training and hygienic surroundings for the young.

It is now pretty fully recognized that a sound mind and even to some extent a sound morality are dependent upon a sound body. The agencies which have been called into operation to estimate the loss in human efficiency, due to defective sanitation, are, whilst still in their infancy, bringing into clearer view the defects and dangers of a state of affairs long cheerfully tolerated.

Another force, which has made for better school buildings and better school grounds, is the better organization of community life and a tendency to regard the school as its centre.

The war itself, has in one direction, encouraged this movement, by demanding a higher standard of physical efficiency and revealing unsuspected physical defects through the reports of the army medical examiners. We are in a better position now than we ever were before to estimate the probable percentage of the physically unfit amongst our citizens and it is not surprising that our clearer knowledge is bearing fruit in an urgent demand that the school and its surroundings must give every opportunity for the complete physical development of the child.

The war has also stimulated the movement for better school buildings by exhibiting the necessity for more production and for the better conservation of our national wealth. In this direction, it is only necessary to instance the welcome which has been accorded to the newer subjects of the school curriculum, viz., Agriculture, Manual Training and Domestic Science. Most six-roomed schools are now making provision for rooms for Domestic Science and Manual Training and many of the rural schools have introduced school and home gardens.

Attendance

With regard to the third point referred to above, the attendance of pupils at school, the reports of the Inspectors, show, that whilst the arrangements for reporting cases of non-attendance, which were brought into effect two years ago.

have made very considerable improvements, it will be necessary to follow up these arrangements with more specific regulations to compel attendance than those at present in force. The Truant Officers, even when such are appointed, have been found reluctant to discharge their duties, and in a great many cases these officers have not been appointed at all. With the increased cost of wages, the temptation for parents to withdraw their children from school, especially in those localities where fruits and vegetables are largely grown, has necessarily increased.

Public School Inspection

I desire to draw your attention to the difficulties which have been experienced in securing a proper supply of men trained and qualified for the duties of Public School Inspectors. Until the salaries of these officials are substantially increased, there is little hope that this condition will mend.

I am glad to report that throughout the portions of Northern Ontario, which were scathed by fire, complete arrangements have now been effected for replacing all the school buildings destroyed by fire and for the erection of others where an investigation shows them to be necessary.

Schools have been erected at Goldlands, Hillview and Porquis Junction.

Temporary accommodations have been secured at Matheson, No. 2 Casey and No. 1 Taylor and Carr.

Arrangements have been made for granting assistance to the settlers who suffered from the fire in maintaining their schools, where the buildings were not burnt.

Whilst difficulties were experienced at first in dealing with these matters on account of the delay in the return of the settlers to the burnt lands, the shifting of population and the consequent necessity of readjusting school section boundaries, arrangements have been reached in the few remaining cases and will be carried into effect with vigour and despatch.

I have the honour to be, Sir,

Your obedient servant,

JOHN WAUGH,

Chief Inspector.

Toronto, February 8th, 1918.

APPENDIX B

REPORTS OF THE INSPECTORS OF CONTINUATION SCHOOLS

1. REPORT OF INSPECTOR MILLS

TO THE HONOURABLE R. A. PYNE, M.D., LL.D.,

Minister of Education for Ontario.

SIR,—I have the honour to submit the following report on the Continuation Schools of the eastern and northern part of the Province in my charge for the school year 1916-1917.

I have the honour to be, Sir,

Your obedient servant,

G. K. MILLS.

Toronto, December 31st, 1917.

Number and Kind of Schools

Grade C Schools,—(a), having the full time of one teacher	17
(b), having the full time of one teacher and half the time of a second teacher	7
Grade B Schools,—having the full time of two teachers	44
Grade A Schools,—having the full time of three teachers	1

There are, therefore, in these sixty-nine schools, one hundred and fifteen teachers giving full time and seven teachers giving half time to the work. Of these twenty-nine are men and thirty-eight are graduates of universities.

New Schools

During the school year 1916-1917 a new school was opened at South Porcupine and the necessary steps were taken to establish schools at Westboro, South Mountain, New Toronto, Massey and Cochrane. All of these are now in operation. The Continuation School at Tweed was made a High School, and the schools at Sutton West and Spencerville were changed from Grade C to Grade B.

Building Operations

Notwithstanding the excessive cost of labour and building material, considerable progress has been made in improving present school buildings and in erecting new. The new school building at Finch was completed, a new building for High School purposes, erected at tweed, new buildings are being erected at Bruce Mines and Stouffville to replace those destroyed by fire, and a new school to accommodate both Public and Continuation Schools at South Porcupine. At Thessalon, Little Current and Burk's Falls the attendance at the Public School had become so large

that it was necessary to provide new quarters for the Continuation School. In the first two places satisfactory accommodation has been provided in church buildings rendered vacant by the union of two denominations, while the school at Burk's Falls is carried on in an unused district courthouse.

Equipment

When Continuation Schools were new and the teachers were proving to the ratepayers that the work could be efficiently done, the regulations regarding accommodation and equipment were more leniently administered than is the case at present. These schools have now had time to demonstrate their value, and to enable both teacher and pupils to do their best work adequate equipment and suitable laboratory accommodation are necessary. Many of the teachers are young, new to the position, inexperienced and timid about approaching their Boards, and if these Boards consent grudgingly the teacher is easily discouraged and tries to get along without the much needed equipment. In doing this, appeal must be made to the memory of the pupil rather than to the intellect and the object becomes the acquisition of items of information, frequently unrelated and uninteresting, instead of the formation of good mental habits.

Scarcity of Teachers

During recent years the supply of qualified Continuation School teachers had increased until there was a decided competition for positions. Boards were once more privileged to make selection from a dozen or more applications for every position, and the tight-fisted among them could again choose the one asking the lowest salary regardless of experience or proven ability. During the past year this plentiful supply has fallen off rapidly until it is again difficult to supply the demand. The reasons for the scarcity lie in the facts that most of the young men, unmarried and physically fit, have enlisted and a large number of young women teachers have taken positions in banks and other business offices where the salary, work and surroundings are much more attractive. Another important reason is that notwithstanding the very great increase in the cost of living the salaries of Continuation School teachers have increased very little.

Decreased Attendance

The most noticeable change in connection with the Continuation Schools is the general decrease in the attendance of boys, more particularly among first year pupils. During the first year of the war there was a marked influx of pupils into the Lower School. This was no doubt due to the industrial depression of the previous year and to the uncertainty induced by the war. There was a decrease the next year in the highest form partly due to enlistment. But during the past year there has been in most schools a decided falling off in the attendance in all the Forms, but it is most noticeable in the first Form. This may be attributed to the great scarcity of labour on the farms, which necessitates keeping the children, particularly the boys, at home as soon as they are big enough to help with the work. As a result many of these children do not reach the standard of High School Entrance. In many places the unusually high wages offered for work that High School boys and girls can do in canning, munition and other factories and in other employments, has attracted many pupils away from school. One undoubted effect of this will be to still further decrease the supply of teachers.

The Teaching of Science

It has been claimed for the different subjects of science that they are peculiarly thought compelling. It has been hoped that a study of these subjects extending over a period of years would develop in the pupils a type of mind that wishes to know the reason why and is resourceful in planning means that will lead to the satisfaction of that desire: a mind that will habitually tend to relate cause and effect, as opposed to the type produced by the study of languages in which it was claimed that the memory chiefly is exercised. As an aid in the teaching of science suitable laboratory accommodation and much special equipment must be provided. Notwithstanding the additional expense and the special effort made to secure good teaching of science, it has become evident to me that there are mechanical ways of cramming scientific facts and of doing laboratory work that no amount of training or direction will eradicate. Broken in to memory cramming, accustomed to passive observation of just those things they are directed to see, unpractised in independent questioning and criticism, and keenly aware of the limits of their own knowledge of the subject such teachers adhere to the printed page or to the note book in which they have summarized what they regard as the important parts of the subject from the point of view of an examination.

There is comfort in the fact that with the very general improvement in laboratory accommodation and equipment the teaching of the science subjects is improving. It is now unusual to find the note books of a class alike in all particulars except in writing, although in some cases the difference is so slight as to give rise to the suspicion that the change in method is due to an effort to satisfy the inspector. In place of dictating notes the teacher pauses while the pupils write down what has been said. There is a distinction without much difference in effect. And yet there is little room for faultfinding. The teachers with very rare exceptions are faithfully giving the best service they are prepared to give. The defects are chiefly due to inexperience, pressure of work, and a rather too limited acquaintance with the subject. No doubt the teacher of the training school emphasized the fact that the aim of this work should be the formation of good mental habits with the incidental acquisition of information, but the examination ahead looms big and seems to the young teacher to demand acquisition of information no matter what else is sacrificed. "The formation of good mental habits is all right in theory, but these pupils of mine must pass examinations if I am to hold my position." It is difficult to convince the young teacher that the formation of good mental habits has much bearing on examination results, whereas it is the good mental habits that have been formed that enable a student to deal successfully with any new problem that may arise on the examination or in after life.

Lower School Literature

In general the work in Lower School Literature is very inefficient. It usually fails to introduce the pupils to the world of good books, to interest pupils in reading, or to develop an appreciation of good literature. Most of the time allotted to this subject has been devoted to the minute study of selected poems, line by line and phrase by phrase. The poem as a whole is then so mutilated that it is devoid of beauty or interest. Some such work, without entering into minute detail, is necessary and valuable, but every school library should contain a considerable number of sets of books suitable for class reading, and at least half the time allotted to Literature in the Lower School should be devoted to reading and discussing these books in class. The danger in this is that the reading will become monotonous,

lifeless, and uninteresting, but if a teacher finds that she is unable to arouse and maintain an interest in a book, she should put it away in the library and select one that she can make interesting. If a prose book has been selected it is usually neither necessary nor advisable to read it to the end. When an interest has been aroused the pupils may take the book home to finish the reading while another is introduced to the class. In many Continuation Schools it is quite possible to combine the classes of the first and second years in carrying on this class reading, although when the teacher is dealing with a poem in detail the classes must be separated. It is usual to devote three periods per week to each of the Lower School classes. The detailed study of selected poems may be carried on in separate classes for a month or six weeks until interest in this work flags, and then the classes may be put together for a month or six weeks for at least five periods a week in class reading of suitable books.

Besides this work in class the pupils will do considerable reading out of class. A complete record of the reading of each pupil should be entered, by the pupil, in a book for this purpose hung up in the library. This should be entered under two headings, (1) Books from the School Library, (2) Books from other sources. Each pupil is his own librarian and the teacher can see at a glance what each pupil is reading and is in a position to advise and guide with wisdom.

Inefficient Use of Important Means of Education

Some of the most effective methods of educating and training students of high school age are very generally neglected by teachers and others more directly responsible for the work of the schools. The school library is in general poorly appreciated and does not receive the attention by either teachers or pupils that it deserves. Most of our school libraries consist of books for general reading and books of reference, but the average library consists largely of what may be termed dead books, as they stand on the shelves term after term and are rarely used. The regulations require that at least four books in English Literature be read each year, and while the pupils read what they must it is done more frequently as a task than as a pleasure. To introduce children to the world of books, to guide them with caution and intelligence in their use, and to develop a love for books and an appreciation of good literature is one of the greatest services that the schools can do for the youth. But when it is generally found that the pupils in the first year of high school work read more and make more use of the library than those in the second year, and those in the second year more than those in the third, there is something seriously wrong. Books of reference are rarely referred to by either teachers or pupils; dictionaries are seldom consulted as a means of correcting pronunciation or of increasing vocabulary; the encyclopædia, the pride of the library, is less frequently referred to than the Family Bible, and a gazeteer is merely a big book that contains names of places.

Another common school activity, that, with the necessary assistance, could be made much more profitable than at present is the Literary Society. If, later in life, our boys and girls are to take the places in the communities in which they live that they ought to take, because they have had the advantage of a high school education, they must have developed the ability to put their ideas into words and to express these fluently and forcibly before their fellows. At present most of these Literary Societies are conducted in a rather haphazard and comparatively inefficient way. The work done is based on ideas of the pupils aided by suggestions from the teachers. This is good in so far as it goes, but the experience of both pupils and

teachers is very limited. In most cases where there is no Literary Society, nor any corresponding school organization, I find the teachers quite willing and even anxious to encourage the work but they fear they cannot make it profitable to the pupils. In my opinion a great service could be done both teachers and pupils if a pamphlet were prepared that would give advice and suggestions on this and the other matters mentioned above, and in which would be incorporated the most profitable ideas that can be collected from schools, not only in Ontario but from any source from which valuable suggestions might be obtained.

Changing Conditions

So long as the masses of the people were content to do without any learning beyond the three R's the educational problem was very simple. All that was needed was a few college preparatory schools by means of which a few of the intellectually brighter, or those more favourably circumstanced could escape from what was regarded as the drudgery of the common life into the realms of the so-called learned professions. This need was provided for by a number of academies and grammar schools.

With the establishment of a public school system and the advent of more prosperous conditions came a demand for teachers having a better education than formerly, and school teaching became a well recognized means of reaching other professions through the unaided efforts of the individual. The more general demand for better educational opportunities was met by the establishment of high schools. As these schools were supported largely by local taxation and liberal government grants they were established in all the towns of the Province and served a much greater number of people than did the academies or grammar schools. But they were the lineal descendants of the academies; the courses of study remained the same although to the preparation of candidates for entrance to the universities was added the task of preparing candidates for normal and model schools. The demand for educational opportunities has been satisfactorily met for many years by the courses offered in these schools, as the great majority of the youth who attended were headed for some of the professions or wished to teach for a time until some change of fortune removed the necessity.

As years passed education became more generally diffused, and with the increase of wealth, and the opportunities and competition of industrial and commercial life during recent years, the common man in constantly increasing numbers is seeking to obtain a fair share of the world's knowledge, not as designed for entrance to law, medicine, theology or teaching, but as applied to his needs and conditions. His object is to improve his condition and to increase the efficiency of his labour. This is clearly shown in the fact that colleges and schools of all sorts, public and private, day classes and night classes, are filled to overflowing. In five years the attendance at the industrial classes in the cities and large towns of Ontario has increased from 3,750 to 20,126. There is also a growing feeling in rural communities that the courses of the present schools do not meet the educational needs of the youth, particularly of the boys.

Extension or Separation

If we recognize these conditions what are we to do? Shall we modify and add to the courses of our high and continuation schools so as to make them meet the needs of the localities in which they are situated, in all essential industries, or are we to stand idly by and see special schools established for the express purpose of meet-

ing these needs? It is certain that if the high and continuation schools that are now in contact with the people do not serve their needs, these needs will be met by special technical and trade schools in the cities and by special agricultural schools in the country. If this happens the present schools will be deprived of the means of serving the communities in which they are located, and will in turn become one of the many special classes of schools whose sole duty is to prepare candidates for teachers' certificates, or for entrance to the universities.

This would lead to unnecessary duplicating of plants, and the people would be divided into classes, the children of which would be schooled each after its own fashion and each with different ideals. These classes would inevitably drift farther apart owing to lack of sympathy and co-operation, and would shortly become distrustful of each other. This attitude can be seen even now in the lack of confidence and co-operation between graduates of different schools and in the too general distrust that exists between those who have attended public schools and those whose education has been received in denominational schools.

Because of the cost, separate agricultural schools in rural districts must be few in number and the youth must go far from home at an age when he most needs home influence and care. In our experience it has been found that relatively few will go far from home to school, and the result of the establishment of continuation schools has demonstrated that if the people are to be served education must be brought to them. Only a small percentage of parents can be induced to send their young children away beyond reach of home and, therefore, the present high and continuation schools must carry the needed education to them. This education should serve the personal interests of the people in all the essential industries of the locality.

Need for a Progressive Public Opinion

In my opinion the greatest educational need of this Province to-day is a well informed and intelligent public opinion in regard to educational affairs. In a democratic country, rapid and effective progress will come from an enlightened people who appreciate the need of educational progress and who sanction and actively support the means proposed to bring about the required ends. To inform the people on educational matters, to convince them of the necessity and benefits of a more progressive attitude, to give opportunity for full discussion and understanding of all important measures proposed, and through these discussions to develop leadership from among the people capable of presenting the claims of education from the point of view of the common man rather than from that of the schoolmaster, is the greatest present need.

With a view to attaining this end I would urge that measures be taken to inaugurate Township, County and Provincial Rural Trustees' Associations. It may be that at first some of these associations will be used as centres of opposition to progress, but if it can be shown that the proposed measures will improve conditions through a better education of the youth, the interest that parents have in the welfare of their own children, combined with the common sense of a well informed people, may be relied upon for support of all worthy measures.

II. REPORT OF INSPECTOR HOAG

To the HONOURABLE R. A. PYNE, M.D., LL.D.,

Minister of Education for Ontario.

SIR,—I beg to submit for your consideration the following report on the Continuation Schools under my supervision for the year 1916-1917.

I have the honour to be, Sir,

Your obedient servant,

J. P. HOAG,

Toronto, December 31st, 1917.

Number of Schools in District

The district over which I have had supervision during the past two years comprises all the lower peninsula of Ontario between Georgian Bay and Lake Erie. In this district there are 66 schools and 125 teachers. In order to inspect these schools, at least 125 school days must be spent in the class rooms during the year. Owing to transportation difficulties and the closing of some schools on account of scarcity of fuel, I was able during the past year to spend only 107 school days in the class rooms. I did spend more time, however, in travelling or in hotels during the year than in any previous year in my experience. It is to be hoped that the year now beginning may be more favourable for the work of inspection than was that of the year just past. But it is to be feared that the hope will not be fulfilled.

During the past year one school, Wheatley, has been discontinued, as the rate-payers of the village repeatedly refused to provide accommodation for secondary education for the youth of the village. Two new schools, Delaware and Mt. Brydges, have been opened in the County of Middlesex, and one school, Elmvale, which was discontinued some years ago, has been reopened in a fine new building.

Qualifications of Teachers

During the year an earnest effort has been made by the teachers of the Continuation Schools of the district to secure the special certificates in Physical Culture and in Art which are now required for all Continuation and High Schools. In nearly every school of the district at least one of these special certificates is held and in very many of the schools both such certificates are held. To qualify for such certificates, it has been necessary for many of the teachers to attend the summer schools provided by the Department of Education in Toronto. I believe that after the summer of 1918 most of our schools will have teachers qualified under the regulations to teach Physical Culture and Art. For the current year it has been found necessary to recommend the granting of temporary certificates in the special subjects, such certificates being valid until June 30th, 1918.

Agricultural Courses in the Schools

When the Continuation Schools were first established, it was expected that they would provide secondary education for the youth of the rural and village communities of the Province and that at the same time these schools would have a

strong tendency toward training for country life. It was, indeed, hoped that agriculture would be one of the subjects of study and that the youth of the rural districts would be led to seek agricultural pursuits. Unfortunately, the Continuation Schools have not to any great extent fulfilled the expectations in this regard. Instead, these schools are simply High Schools in rural or village communities, carrying on courses similar to those in the High Schools and fitting youths for the teaching profession and for entrance to the Universities and Professional Colleges. In fact, the parents who send children to our Continuation Schools seem to desire education along the old established lines.

But a few of our schools have been doing good work in agricultural teaching. The Principals of the schools at Exeter, Drayton, and Ridgeway have taken up the work enthusiastically and have met with considerable success. I look for further extension in the near future.

Ordinary School Work

The past year has been one of satisfactory progress along ordinary educational lines. I have found a gradual, if slow, improvement in writing and spelling in our schools, and, though much remains to be done along these lines before a satisfactory level is reached, we are proceeding upward. Perhaps the greatest weakness noticeable in the ordinary work of the students in our schools is the lack of neatness and form with which they put down their work. The note-books in science and the work-books of the students in other subjects are often slovenly in appearance and lacking in form and arrangement. I have been urging upon all teachers the importance of neatness of arrangement of all work put on the black-board and of all written work, and I hope to see marked improvement in the coming year.

APPENDIX C

REPORT OF THE DIRECTOR OF INDUSTRIAL AND TECHNICAL EDUCATION

TO THE HONOURABLE R. A. PYNE, M.D., LL.D.,

Minister of Education for Ontario.

SIR,—I have the honour to submit herewith my Annual Report on Industrial and Technical Schools.

I have the honour to be, Sir,

Your obedient servant,

F. W. MERCHANT.

Toronto, February 4th, 1918.

Organization and Inspection of Night Schools

Since September, 1916, the greater part of the work of organizing and inspecting night classes in the Province has been under the charge of the Assistant Director, Mr. G. J. MacKay.

During the winter term of 1917 all the night industrial and technical schools were inspected. During the fall term ten schools were again inspected; in nine towns and cities the larger manufacturing establishments were visited and the advisability of opening night classes was discussed with the school boards and others interested; in four of the more important industrial centres assistance was given the principals and committees in reorganizing the classes and widening the scope of the work. New schools were opened at Coniston and Gananoque.

Night Classes for Men and Boys

The progress of night industrial school work throughout the Province may be regarded as very satisfactory when it is considered that conditions have been steadily becoming more unfavourable during the past four years. The registration in the different centres has been larger for the year 1917 than for any previous year, the increase in some centres being very striking. Although most of the young men who are physically fit are in military service and most of those who are left are working night shifts and overtime, the attendance in the men's classes has shown a marked increase, greater even than that in the classes for women.

This increase is probably owing in part to the special attention that has been given to classes for apprentices. In some centres employers offer tangible inducements to their apprentices to attend the classes in mechanical drawing and shop mathematics. In Peterborough, for example, the managers of the larger manufacturing concerns allow one month to be deducted from the year's apprenticeship for a faithful winter's work in these two night school classes.

Most of the night schools, where day schools are not organized, are under the direction of Collegiate Institute or High School principals. The success attained in the work is very largely due to the enthusiasm with which they entered upon this new work, the untiring energy with which they have carried it on, and their experience in school organization and management. Many members of advisory industrial committees, besides giving faithful service at committee meetings, have taken an active part in building up the schools and making the classes efficient.

Managers of plants and their superintendents, engineers, and foremen have always taken a deep interest in the effort to give practical education to their employees, and each year more of them are giving active assistance in carrying on the work. In many industrial towns the officers of the labour unions are also lending most valuable assistance in increasing the attendance at the classes. This co-operation is having a marked effect in widening the field for industrial and technical training.

In most centres, the night schools have now been in operation long enough for the good results of the training given to be evident. Every principal and committee takes pride in describing striking instances of what the classes have done for certain young workmen of the town. These results have, no doubt, done more than anything else to produce the steady increase in the attendance at schools, which has persisted in spite of extremely adverse war-time conditions. It is hoped that before long the good work done by night industrial classes will win for them a universally recognized and thoroughly established place in each industrial community, and that it will be the exception for young workmen not to attend night schools.

Night Classes for Women and Girls

The value of the classes for women is more and more appreciated as the high cost of living becomes more burdensome. The teachers of cooking are making the classes of increasing value in assisting housekeepers to provide nourishing and inviting dishes at lowest cost. The teachers of sewing and dressmaking are devoting more attention to the utilizing of old material to produce new articles of clothing. In many centres a special effort has been made to have the classes filled with young women who work in the factories and stores. The night school gives them the only opportunity they will have to become skilled in the essentials of home making. Over half the night industrial school pupils enrolled in the Province are women and girls.

Day Industrial and Technical Schools

But it is in the day schools department that the most important advance has been made during the year. Three new schools have been established, one at Windsor, one at Chatham, and one at Ottawa. Each of these schools offers a course for boys and girls and each has opened with a good attendance.

The success of these schools is an evidence not only of the demand for vocational education in the centres where they have been established, but also of what can be accomplished by the energetic and intelligent direction of those in charge of schools. The school in Windsor, which is affiliated with the Collegiate Institute, owes its existence to the untiring efforts of Mr. F. P. Gavin, Principal of the Collegiate Institute, who has had charge of the night industrial work from the beginning. This school finds accommodation in the new Collegiate Institute building. Adequate equipment is being provided. The school at Chatham differs from

all others in the Province in that it is affiliated with the Public Schools. The connection between the schools is close and the pupils who desire to continue their education in preparation for industrial life pass directly from the Public School classes into the industrial courses. The credit for perfecting this organization is due to Mr. W. J. Plewes, Principal of the Chatham Public Schools. The school at Ottawa is a natural outgrowth of a most successful night school organization. Mr. W. W. Nichol, by the development of efficient night school work, showed the need of a day school and prepared the way for its establishment. Mr. J. D. Campbell, the present Principal, who is now in charge of both day and night school work, has perfected the organization. The Ottawa Collegiate Institute Board has provided excellent accommodations for the school in a new building which is shared with the commercial department of the Collegiate Institute. The schools together form an effective vocational school providing for the industrial and commercial training of the youth of the city.

The older schools have also shown marked improvement. The school at Hamilton has organized a full-time course for girls and the attendance in all departments has been materially increased. The mining departments of the High Schools at Sudbury and Haileybury have been much strengthened by the appointment of a second technical instructor in each. The practical work of the Haileybury mining department is provided for in a new building containing a mill, assay laboratory, and work shops.

An improvement also is noted in the character of the attendance in the schools. There was in the beginning evidently a misconception as to the functions of the day industrial schools and many backward or subnormal children were enrolled in the classes. The industrial pursuits are demanding the best talent of the country. The purpose of the day industrial school is to direct a fair share of this talent into industrial employments by providing the foundations for a thorough industrial training of the youth. This conception of the function of the school is becoming more generally recognized by the public; it is becoming also more fully realized in the organizations of the schools.

The Development of Day Schools a Measure of the Progress of Technical Education

The extensions and improvement of the day school system marks the real progress of industrial and technical education in the Province. The night schools, since they provide a means for the improvement of those already in the industries, are filling an important field and should by all means be extended and supported. But the day schools provide the necessary fundamentals of a training which can be given only to the youth. The necessities for such a training are growing more apparent every day. The time was when a youth was expected to make a choice between an education and some industrial occupation, when by education was meant an academic training in preparation for entrance to the university or professional schools. We have reached a stage when there is no longer such a choice, because a successful career in industry demands an education. It is not enough that a workman possess skill in the operations of his trade. He must be mentally alert and well informed. If workers in our wood, metal, textile, mining, ceramic, and other industries are to compete with the technically trained labour of other countries, they must be trained in intelligent reasons for operations, in a knowledge of the properties and the uses of the materials they handle, and in an appreciation of values. They must be trained also to be proficient in the

mathematical conceptions and calculations fundamental to industry and to have facility in descriptive expression through language and drawing. To be freed from narrowness such a training must be supplemented by a liberal course in English literature and in history and geography, especially on their industrial sides.

Manufacturers in every field are seeking for trained help. Labour organizations see in education an effective and permanent means of improving the efficiency and status of labour. The demands for a liberal industrial training appear, therefore, equally urgent whether we view them from the standpoint of the needs of the country for increased capacity to develop and conserve material resources or from the claims of industrial workers for facilities for a training for their callings in a measure as liberal as that already provided for those who are to be engaged in commercial or professional pursuits. It is evident that such a training cannot be given in the Public Schools to children under fourteen years of age; it is evident also that it cannot be given through night schools or correspondence courses to adults established in industrial employments. The years between fourteen and eighteen provide the natural period for laying the foundations for vocational training. We have accepted this principle in offering facilities for commercial and professional education. The youth who is to enter business or take up a profession passes without a break from the Public Schools into courses which are a more or less direct preparation for his life work. We are beginning to acknowledge that it would be ideal to have the same practice followed in the case of those who are to be prepared for industrial occupations. Now it would appear that this ideal will be realized just in so far as we shall be successful in organizing efficient day industrial schools and in securing an attendance in full-time or part-time courses. It is for this reason that efforts have been so persistently directed towards the development of this type of school.

The Technical Schools and the Re-education of Returned Soldiers

The feature which first catches the attention of a visitor to one of our day technical schools is the presence of returned soldiers in the classes. As I pointed out in my last annual report, these schools, through arrangements with the Dominion Military Hospitals Commission and the Provincial Soldiers' Aid Commission, are being used extensively for improvement courses and for the training of those chosen by the Disabled Soldiers' Training Boards for re-education. The attendance of returned men in trade and technical classes has largely increased during the year and facilities for carrying on the work of instruction have been perfected. Special teachers in certain departments, who give up their full time to the training of soldiers, have been added to the staffs at Toronto, Hamilton, and London.

It has been contended that the Province in providing schools for instruction in industrial and technical occupations was not merely filling a provincial function, but that in a very special sense it was performing a national service. The attendance of returned soldiers at such schools is striking evidence in support of this contention.

Courses for the Training of Industrial and Technical Teachers

One of the chief obstacles in the way of developing industrial and technical schools is the difficulty of selecting satisfactory teachers. To be successful the teacher of a trade subject must be an expert workman who has acquired his expe-

rience in working at his trade under productive conditions. Obviously, he should also be trained as a teacher. So far it has been almost impossible to secure teachers with satisfactory trade experience and pedagogical qualification. To meet the situation, night classes in teacher training have been established by the Department of Education, with the approval of the local boards, in the technical schools at Toronto, Hamilton, and London. Only those who have had approved technical training or trade experience are admitted to the classes. The course includes a discussion of the essential principles of method with exercises in the application of these principles to the teaching of industrial subjects. The attendance at each class reaches the limit of its capacity.

Text Books for Industrial and Technical Schools

Another obstacle in the way of conducting industrial classes, especially night classes, is the lack of text books. Books prepared for other purposes are usually not found suitable for short term night school courses. Moreover, such books are, as a rule, too expensive to be purchased by night school students. The need for a text book appeared to be most urgent in the case of machine drawing. Accordingly, the Minister of Education has had prepared and has authorized an introductory manual in this subject. The book sells at a reasonable price. Its success will possibly warrant the publication of similar manuals in other subjects.

Registration and Statistics

A uniform card system for registration of attendance and recording information respecting occupations, courses, etc., has been adopted for all schools. The annual report sheets summarize this information for each school. The appended statistics are tabulated in accordance with the new system. The tables are incomplete, because as this was the first time that the school boards were asked to furnish these statistics, the data were not available in all cases. A brief analysis of some of the information given may be of interest.

Of the students who gave information as to their country of birth 72.6 per cent. were born in Canada; 21.7 per cent. in the British Isles; and 5.7 per cent. in foreign countries.

The men and boys who gave information in regard to their trades were distributed amongst the industries according to the following percentages: Chemical industry, 2.2; sheet metal work, 2.5; machine shop work, 26.3; forge work, 0.9; foundry work, 2.3; leather work, 1.6; cabinet making and joinery, 2.3; carpentry and building construction, 7.4; painting and decorating, 0.8; plumbing, 4.3; power plant operating, 2.6; electrical work, 14.1; printing or bookbinding, 6.8; photography, etc., 0.1; and other trades, 24.9.

Of the women and girls who, on registering, gave their occupations, 18 per cent. worked in factories, 23 per cent. worked in shops and stores, 11 per cent. were house workers, and 48 per cent. were not employed outside their own homes.

APPENDIX D

REPORTS OF THE INSPECTORS OF HIGH SCHOOLS

I. REPORT OF INSPECTOR SPOTTON

TO THE HONOURABLE R. A. PYNE, M.D., LL.D.,

Minister of Education for Ontario.

SIR,—I have the honour to report as follows upon the schools in my inspectorate for the academic year 1916-1917.

During the year I inspected the Collegiate Institutes at Barrie, Collingwood, Clinton, Goderich, Guelph, Niagara Falls, North Bay, Orillia, Owen Sound, Seaford, St. Catharines, and Woodstock, and the High Schools at Alliston, Arthur, Aurora, Beamsville, Bradford, Brampton, Caledonia, Cayuga, Chatsworth, Chesley, Dundas, Dundalk, Dunnville, Durham, Elora, Fergus, Flesherton, Grimsby, Haileybury, Harriston, Kincardine, Listowel, Markdale, Meaford, Midland, Mitchell, Mount Forest, Newmarket, Niagara-on-the-Lake, Orangeville, Oshawa, Parry Sound, Penetanguishene, Port Elgin, Shelburne, Smithville, Sudbury, Thorold, Walkerton, Waterdown, Welland, Wiarton, Weston and Wingham, 56 schools in all.

I also visited the Loretto Academy at Guelph, in response to an application for inspection in connection with Regulation 37, which relates to the provision for practical work in Science, Art, and Bookkeeping and Writing, at schools where there are candidates for an examination involving these subjects.

Accommodations

Noticeable events during the year were the destruction by fire of the school buildings at Barrie and Brampton. The fire at Barrie was a real disaster, as the building had but recently been remodelled at heavy expense. It happened, fortunately, that just at the time of the fire the Public Library of the town was being transferred to new quarters, so that several very fair rooms in the old library building became immediately available for school purposes. These rooms were supplemented by several others in a business block at no great distance, so that the work of the school proceeded with practically no break. At the time of my inspection I found these temporary quarters occupied, the attendance of pupils normal, and an altogether commendable spirit of work prevailing. I advised the Board that the interests of the school demanded that there should be no unreasonable delay in rebuilding. I understand that the Board is ready to submit plans for the approval of the Department as soon as the question of a site is settled by vote of the rate-payers at the approaching municipal elections. The Brampton building which was destroyed, with all its contents, was of a very different class from the Barrie building, having been erected many years ago, and evidently at a time when opinions as to school architecture were widely different from those now prevailing. Plans have been secured and contracts let for a new and handsome modern building, and work is already in progress. When this building is completed, the destruction of the old one will, I imagine, be looked back upon with few regrets. In the meantime, fairly comfortable quarters have been secured in the Court-house. These quarters were in

occupation at the time of my visit. The attendance was large, and an evident resolve to make the best of a somewhat difficult situation characterized both staff and pupils.

The High School accommodations at Beamsville have for a good many years past been quite inadequate. It is pleasant to be able to report that a new building, on a site apart from the Public School premises, is approaching completion. This building presents a very attractive appearance, and will have ample accommodation not only for the ordinary work of the High School, but also for work in Manual Training and Domestic Science, and in Agriculture, all of which subjects it is proposed to introduce.

The High School at Durham is now housed in a very commodious new building on a suitable site. Until recently this school, like most of those which had been in the Continuation class, shared accommodations with the Public School. The removal to a building and a site of its own marks a new and distinct era in its history, and it cannot be doubted that the efficiency of the school and the comfort of all concerned will be promoted by the change. The building provides three good classrooms and a laboratory, separate private rooms for the teachers, modern lavatories and play-rooms, and convenient cloak-rooms. Electric lights have been installed, the grounds have been levelled and seeded, the blackboards are all of slate, and the water supply very satisfactory.

On the occasion of my visit to the Seaforth Collegiate Institute I conferred with representatives of the Board in regard to what seemed to me to be serious defects in the interior arrangements of the building, more particularly as to their bearing upon a possible disaster in case of fire. I am glad to be able to say that a satisfactory report of desirable alterations has been received, and these will, I am sure, be viewed with satisfaction by all concerned.

The High School at Listowel has long been in need of better accommodations. Plans for enlargements and alterations, in connection with the present building, have been in the hands of the Board for some considerable time, but owing to local conditions it has been found difficult, until recently, to proceed with the work. An encouraging report has, however, been received, and it is understood that the contemplated alterations and additions will be pushed through as rapidly as possible.

The above constitute the principal changes of importance for the year in the matter of accommodations. This, however, does not mean that there are not other places where improvements are desirable. There are cases of buildings of good construction and design, which were sufficient for the attendance at the time of their erection, but which, in view of the expansion of the schools, are no longer adequate. In such cases temporary expedients, such as fitting up part of an assembly hall for class purposes, or using the laboratory as an ordinary class-room, have been resorted to, and it is not uncommon to find the highest form (usually small) without a room of its own, and moving about, first to one room and then to another, as these happen to be temporarily vacated by their rightful occupants. It is found necessary to recognize such conditions for a reasonable time, in order to make sure that the congestion which gives rise to them is not of a passing character, and to give full opportunity for consideration of the best means of dealing with the situation. Local financial conditions have also to be taken into account, as well as the difficulty of securing labour, and the steadily advancing cost of materials. But while granting this recognition of such conditions, the Inspectors consider it their duty to keep constantly before the local authorities the necessity of not losing sight of the needs of their schools, and of applying proper remedies for

defects without unreasonable delay. To advise the withholding of the legislative grant, or any part of it, is a disagreeable thing to do, but now and again a case presents itself where the neglect of the vital interests of a school by the authorities is so palpable, that common justice demands the application of this heroic measure.

Reading, Spelling and Writing

As in former years, attention was given in every school visited to testing the character of the pupils' work in these fundamental subjects. In the matter of Reading, I followed my usual practice of applying the test in the Senior form of the Lower School, where the pupils had had the advantage of a year's instruction at the hands of the High School teachers. I examined in all 1,289 of these pupils, and of these, with a reasonably high standard, I estimated 51 per cent. as good, 44 per cent. as fair, and 5 per cent. as poor. These results in Reading differ only very slightly from the corresponding results in the years 1914-15 and 1915-1916 in another group of schools. In Spelling the pupils tested belonged to the junior division of the Lower School, and the results may be regarded as a fair indication of the nature of the preparation which pupils receive in this subject in the preparatory schools, previous to admission to the High School. Of course the results differ according to the locality. Of 1,662 pupils examined in Spelling, I estimated 40 per cent. as good, 38 per cent. as fair, 19 per cent. as poor, and 3 per cent. as bad. These results are slightly better than those obtained in the two previous years, but still leave a good deal to be desired. In Writing, of 1,662 pupils examined, I estimated 40 per cent. as good, 46 per cent. as fair, and 14 per cent. as poor. Here also, the result differs but little from those of the two previous years. These comparisons would seem to indicate a practically stationary standard so far as the three subjects under consideration are concerned. In the course of my examination of pupils who had recently been admitted to the first form, my attention was occasionally arrested by particularly weak showing in the matter of Spelling, and on consulting the Principal it almost invariably turned out that the pupils with these poor records had not passed the regular Entrance examination, but had been admitted on certificate under the Regulations relating to Employment on Farms. It is only fair to say that in these cases the pupils concerned were mostly over the age of the ordinary entrance candidate. At the same time, I think special care should be taken to avoid even the appearance of abuse of the privileges granted by the Department in this connection. The amended Regulations are very clear as to the duties of Principals, Inspectors, and Entrance Boards, and with reasonable care there should be no cause of complaint. The interests of both the Public and the High Schools demand special watchfulness in this matter of granting special certificates to meet the present unusual conditions.

Elementary Science

On the whole, I think the work in Elementary Science continues to improve. There is still a tendency, however, more particularly in the case of the inexperienced teachers, towards giving too much help to the pupils in the matter of notes. I have discussed this matter in all its bearings wherever I have found it necessary to do so. As a rule, the tried teachers realize clearly enough what is involved in right methods, and conscientiously practise these methods with good results. The equipment in the way of apparatus and biological material is gradually improving, though I still have to complain of the insufficiency, in some cases, of the biological supplies. The pupils' collections of insects, plants, and woods are generally well looked after.

The collections of insects are usually more satisfactory than those of plants and woods, and in some instances are worthy of special commendation. The plant specimens are too often imperfect to begin with, and the pressing and mounting leave much to be desired. In the naming of the plants, also, errors are not infrequent. The collections of woods examined during the year show, as a rule, care in selecting and preparing the specimens. In view of the difficulties experienced in a good many localities, however, of obtaining satisfactory specimens of our economic woods, it has been thought wise to substitute, in the future, for the individual collections a standard collection in each school. It will be expected that special care will be taken by the science teachers in building up these standard collections for effective use in connection with the class-work. The pupils themselves can in many cases be of the greatest assistance. And not only should there be standard collections of our woods, but there should be also in every school similar collections of insects and plants, to which pupils could refer for help in perfecting their own collections.

The Science work of the past year, like work in other subjects, has suffered to some extent by the disorganization resulting from the removal of pupils from the schools to take up work on the farms. In almost every school visited by me after Easter, I found serious depletion of classes, in some cases such that it was found impossible to proceed with new work, the time being, for the most part, spent in review. As might be expected, the interference with Lower School work was most noticeable in the second year classes. In these classes the spring work in Science was commonly incomplete. In the Middle and Upper Schools disorganization throughout was very common.

Art

The results in Art continue to give satisfaction, and the supply of duly qualified teachers is now almost sufficient for the needs of the schools. According to the Minister's Report for 1916, 85 of the teachers on the staffs held Art Specialist's certificates and 61 held Elementary certificates. These numbers have been considerably increased by the results of the Summer School examinations for 1917, and a steady supply can be reckoned upon from this time forward. A gratifying number of the schools have Middle School Art classes, and the work accomplished in these classes is mostly of a superior character; in some cases exceptionally excellent. For several years past it has been customary to offer a special government grant for Middle School Art, under certain specified conditions as to equipment, qualifications of teachers, and excellence of pupils' exhibits. This has been done for the purpose of encouraging a comparatively new department of work. It is now felt that the need for such special support no longer applies, and, accordingly, after June, 1918, the special grant will be withdrawn.

The equipment of the schools for Art purposes is, on the whole, very fair. Not many schools, however, have yet been able to provide a special room for Art classes.

Physical Culture

The remarks as to continued improvement in Art apply equally well to Physical Culture. The increasing number of teachers holding departmental qualifications in the subject ensures a degree of efficiency in the work that would otherwise be impossible. According to the Minister's Report for 1916, 81 members of the staffs held Specialist's certificates in Physical Culture, and 234 held Elementary certificates. These numbers, as in the case of Art, have been increased since the Report

was issued, and Boards should now have little difficulty in securing teachers duly qualified for this important work.

Amended Regulations

A statement of Amendments to the Regulations of 1914 has recently been issued by the Department. A highly important announcement is that relating to the qualifications of teachers in High Schools and Collegiate Institutes after August 31, 1920. After this date the qualifications for a position as Assistant shall be a High School Assistant's certificate *and a degree from a British university, after a course approved by the Minister*, with the proviso, however, that in case a Board is unable, after due advertisement offering a reasonable salary, to obtain a teacher with these qualifications, it may, subject to the Minister's approval, employ a teacher holding a First Class Grade A certificate or qualified under the Regulations of 1914, if upon the report of the High School Inspector the teacher's certificate has been endorsed by the Minister as valid for a position in any High School or Collegiate Institute. The object of this Regulation is, of course, to ensure a wider course of training for Assistants than the present Faculty Entrance course provides. There can be little doubt that this proposal will meet with public approval. A large proportion (about 68 per cent.) of the assistants already hold degrees, and many of those who do not will doubtless set about completing a university course without much delay. The Regulation has undoubtedly created some uneasiness in the minds of those holding only Faculty Entrance qualifications, but the provision for the endorsonation of the certificates of those who prove themselves competent guards the interests of these teachers. At the same time, it should be realized that when the Regulation comes into force, graduates must be given the preference by Boards in making appointments to vacant positions.

I have the honour to be, Sir,

Your obedient servant,

H. B. SPOTTON.

Toronto, December, 1917.

II. REPORT OF INSPECTOR HOUSTON

TO THE HONOURABLE R. A. PYNE, M.D., LL.D.,

Minister of Education for Ontario.

SIR.—I beg to submit for your consideration a brief report on the general condition of the Collegiate Institutes, High Schools and private institutions under my supervision for the academic year 1916-1917.

I have the honour to be, Sir,

Your obedient servant,

J. A. HOUSTON.

December, 1917.

Schools Visited

During the year I had the pleasure of visiting the Collegiate Institutes at Brockville, Cobourg, Fort William, Kingston, Lindsay, Morrisburg, Napanee, Ottawa, Perth, Peterborough, Picton, Port Arthur, Renfrew, Smith's Falls, and Vankleek Hill, 15 in all, and the High Schools at Alexandria, Almonte, Arnprior, Athens, Avonmore, Belleville, Brighton, Bowmanville, Campbellford, Carleton Place, Chesterville, Colborne, Cornwall, Deseronto, Gananoque, Hawkesbury, Iroquois, Kemptville, Kenora, Madoc, Markham, Morewood, Newburgh, Newcastle, Niagara Falls South, Norwood, Omemee, Pembroke, Plantagenet, Port Hope, Port Perry, Prescott, Richmond Hill, Rockland, Sault Ste. Marie, Stirling, Sydenham, Trenton, Uxbridge, Williamstown, Whitby and Winchester, 42 in all.

According to instructions I also inspected the following private schools: The Academy of St. Mary Immaculate, Pembroke; St. Joseph's Academy, Lindsay; The Ladies' College, Whitby; Albert College, Belleville; The Convent of Notre Dame, Kingston; Loretto Abbey, 403 Wellington St., Toronto, and The Loretto Abbey Day School, Brunswick Avenue, Toronto. I have thus had the privilege, in the course of my year's work, of visiting 15 Collegiate Institutes, 42 High Schools, and 7 private institutions which are preparing candidates for one or more parts of the Departmental examinations.

Private Schools

The inspection of the private schools is made for the purpose of satisfying the Department of Education that the general equipment and the facilities for carrying on practical work in Science and in Art meet the requirements of the Regulations, and that the qualifications of the teachers and the character of their work are such as would justify the acceptance of their pupils, as having received that preliminary training which is essential for all candidates for teachers' certificates. I am pleased to be able to make the general report that the work done in the private schools which I have visited compares very favourably with that of our High Schools in both amount and quality; the Art work for the most part reaches an exceedingly high standard, and the provision for practical work in Science is generally satisfactory. These schools also show a most commendable desire to carry out any suggestions that may be made with a view to increasing their efficiency, and the results as shown in the Departmental Examinations have been most creditable to the teaching staffs.

Accommodations

The question of increased accommodation is being held in abeyance by the Boards of Education in several of the towns mentioned above owing to war conditions, and the Department is not pressing for changes which might reasonably be demanded if the country were in its normal state.

In Trenton, notwithstanding the present abnormal cost of building, the Board are erecting a beautiful new Collegiate Institute of the most modern type, which they expect to occupy during the coming term.

Brighton now has its High and Public Schools housed in new up-to-date quarters which will provide all that could be looked for in a school of this class. A commendable feature in connection with this school is the size of the grounds, which contain some fifteen acres, giving opportunity for practical agricultural work without encroaching on the space required for an athletic field.

Ottawa has its commercial department in a new building apart from the Collegiate Institute, where there will be room not only for the expansion of the department itself, but also for the establishment of technical and vocational classes.

Renfrew, Campbellford and Carleton Place are much in need of new buildings, while Uxbridge, Madoc, Markham, Brockville and Lindsay are suffering from congestion which militates against progress, and which can be remedied only by a marked decrease in attendance or by the provision of additional accommodation.

Although in many places much remains to be done before the accommodations and equipment can be regarded as satisfactory, yet it is but justice to say that the majority of the Boards fully realize their responsibilities, and are making an earnest effort to carry out, as far as possible, the recommendations of the Department and the Inspectors. Under present world-conditions much consideration must necessarily be shown, but quiet, steady progress is being made year after year in supplying what is necessary for successful work. The tabulated gradings given below show that general conditions are fair, and that poor accommodations are the exception rather than the rule.

Grading of Accommodations

I append a tabulated statement showing the grading of the various items which are included under the term "Accommodations."

Collegiate Institutes

1916-1917	Number of Schools Grade I	Number of Schools Grade II	Number of Schools Grade III	Number of Schools Grade IV	Number of Schools Grade O
Closets	11	3	1
Water Supply	13	2
Grounds	6	7	1	1
Building	13	2
Class Rooms	9	6
Halls	13	2
Waiting Rooms	2	3	2	8
Cap Rooms	11	3	1
Teachers' Rooms	11	4
Desks	12	3
Blackboards	10	5
Lighting	6	8	1
Heating	14	1
Ventilation	9	3	2	1
Gymnasium	6	8	1
Assembly Room	7	4	1	3

High Schools

1916-1917	Number of Schools Grade I	Number of Schools Grade II	Number of Schools Grade III	Number of Schools Grade IV	Number of Schools Grade O
Closets	19	9	7	4	3
Water Supply	18	15	7	2
Grounds	9	21	7	2	3
Building	24	14	2	2
Class Rooms	18	20	4
Halls	23	7	10	2
Waiting Rooms	1	6	10	3	22
Cap Rooms	22	9	4	1	6
Teachers' Rooms	23	10	3	6
Desks	29	13
Blackboards	23	16	3
Lighting	15	24	3
Heating	34	8
Ventilation	9	20	8	3	2
Gymnasium	1	1	1	39
Assembly Room	3	8	2	29

In connection with the above tables it might be mentioned that where the joint use of any part of the accommodations by the High and Public Schools is permitted, the grading is at least one degree lower than if the schools were wholly separate. For first class grading, the water supply must be inside the building and the appliances for its use should be thoroughly sanitary; the grounds must be ornamented with trees, shrubs and flowers, and must be large enough to furnish recreation space for all the pupils; the class-rooms must be suitably decorated with pictures, casts, etc.; the halls must be provided with separate entrances and stairways for the sexes; teachers' rooms must be commodious and tastefully furnished; desks must be single, not double; blackboards must be either slate or ground glass; lighting must be from the left only; the ventilation system must be such as will provide a constant supply of pure air under any atmospheric conditions.

Grading of the Teaching

One of the duties of an Inspector is to grade the work done in the different subjects, the grading in each department being based upon his estimate of, first and chiefly, the ability of the teacher or teachers, and secondly, the organization; in the case of Science the equipment and accommodation are also taken into account. For Grade I the following are indispensable:

In English, History and Geography: Oral Reading in Literature, Supplementary Reading in Literature, History and Geography, and suitable provision for Oral Composition.

In Science: Practical work by the pupils in each sub-department, the average number in no class in Physics or Chemistry exceeding twenty-five; the estimate in Science is also based on the character of the work in the pupils' note books.

In Classics and Moderns: Attention to pronunciation, and oral work based on the authors read, with practice in sight translation.

More careful attention on the part of many teachers to the various points mentioned above would often result in a higher grading being given to their subjects. While supplementary Reading in Literature is always provided, there is not the

same attention given to outside reading in History and Geography, possibly due to a lack of suitable books in the library bearing directly on these subjects, but more often due to a supposed want of time, or to a failure to grasp the importance of a wider knowledge of a subject than can be given by any one text-book. Oral Reading in Literature is carried on in a decidedly perfunctory manner, though it is one of the most effective instruments of success in the subject, since it is axiomatic that a passage well read is a passage understood. English Composition in the lower forms, where it is not a direct examination subject, does not always receive the time or attention it deserves. One or more of the defects I have mentioned has often caused a subject or a department to be graded I-II, or even II, when the actual teaching itself, so far as it went, was of a high character.

In Elementary Science, as I have pointed out in at least two previous reports, there is a strong disposition to make the work instructional rather than experimental, to attempt to carry on investigations with one or two specimens for a whole class, to use charts or pictures instead of things, the lecture instead of the laboratory, to consider the note books the end, not the means; the result is almost sure to be a grading down of the department. The reports from the Normal Schools show most conclusively that in many classes there must be little real experimental work. This lack of training is evidenced by inability to set up apparatus, or to modify an experiment to meet some new condition.

Home Work

There is probably nothing in connection with the schools which has been the subject of more controversy, or upon which more diverse opinions are entertained, than the question of Home Work. One can understand how the earnest teacher, anxious for the success of his classes, and thinking only how to secure the greatest amount of work, may prescribe tasks (I use the word advisedly) too great either in amount or difficulty for the untrained mind to perform. Parents, too, in their eager desire for their children's progress are not always free from blame. Our pupils are at a critical period in their lives when nature's energies are largely needed for physical development. There must be time for rest and recreation, and teachers often forget to consider the sum total of the work assigned for home preparation.

To prescribe work whose character will justify the time spent on it requires both experience and judgment. Memory work, drill work, declensions, rules, vocabularies, written exercises in languages or history, such things can be profitably done at home, and if well done will furnish all the home work necessary. Problems and exercises in Mathematics and Science should be done in school, and then every shadow of excuse for the non-preparation of language work would be removed. The secret of success along the line of no home work lies in the proper apportionment of the time assigned to Mathematics and Science. Let a part of the time be given to class-instruction, but the greater part to study and seat-work. This study time can be profitably employed by the teacher in individual work with careless or backward pupils who require special attention, and the eager pupil will have an opportunity of testing his powers, and gaining self-confidence and independence of thought. Such a plan, if put into effective operation, will make it possible to keep the slow pupil up to standard, and at the same time will give the bright one a chance of working up to the limit of his abilities. Another excellent result is that the weaker pupils gain more confidence in themselves because they are not constantly subjected to discouraging comparisons with the brighter ones.

I take the liberty of quoting in this connection the statement of an experienced and successful Mathematical teacher as given in an address at the O.E.A. a few years ago.

"Five or six years ago, I began very cautiously (one must be cautious in such experiments) cutting down the amount of home work in Mathematics assigned to the Lower School classes. To my delight, the pupils seemed to get along just as fast and just as well as before. Meeting such encouragement, I reduced still more and more the amount of home work, and in the last two years the Lower School classes have had very little, almost no home work to do in those set exercises that are so often assigned to give practice or training. The result has been good. So far as I can learn my pupils are doing just as well as they did before.

"Of course, my class methods have changed. Instead of worrying about undone home work, I now worry about how to save time in my classes and about how to keep every single person in the class interested and busy for the whole period. Formerly I used to take up time in explaining difficulties in the home work. This left the brighter members of the class with nothing to do but listen to explanations in which they could have little interest. Now, instead of using the class period in a recitation of what the pupils have learned at home, I develop new principles at the beginning of the period as clearly as I know how. Then the class gets to work, each pupil for himself, and I spend most of my time walking around the room. A glance shows the pupil who is in difficulty, and often a word or a question will set him on the right way. Usually the slow pupils who are in earnest will keep abreast of the others by extra work at home.

"Last year I began to reduce the amount of home work in the Middle and Upper Schools. So far the results have been satisfactory. In this connection it is only fair to state that my work has been in schools containing a large percentage of country pupils who usually take their school work very seriously. Still my experiments incline me strongly to the conclusion that the year's achievement in mathematics does not depend on the amount of time given to home work."

Realities and Ideals

The expression "self-confidence and independence of thought" used in the preceding section furnishes a suggestive text upon which a most interesting homily might be based. If the teachers in the Normal Schools, or the professors in the Universities, or the leading business and professional men who come into close contact with the finished product of our schools, were asked to point out the weakest feature in the training given our High School graduates, the answer from ninety per cent. of them would be, "Their inability to act and think for themselves, their waiting to be told, their dependence on a leader or guide, their lack of initiative and self-reliance. No 'Message to Garcia' for them." We do too much for our pupils; our work does not produce the strong independent thinker, full of confidence in himself and his powers. What is the attitude of the average pupil towards any difficulty he may encounter in his studies? Nine times out of ten he will passively look to the teacher for that assistance he has been taught to expect. The idea of "tackling the job" for himself will not occur to him. This is the natural outcome of classes being instructed from morn till noon and from noon till night, without being given a chance to think and do for themselves. "We learn to do by doing."

The real teacher will have constantly in mind the fact that character is the ultimate aim of education, and that the completion of a prescribed course or the

possession of a desired diploma is only a means to an end. There is little value in subject-matter alone, unless by its mastery the pupil will become more efficient in his life work. The vital point in all school education is the training of the pupil to depend upon himself and upon his own investigations, to know how and where to look for what he wants. He should be encouraged to look beyond assigned textbooks and to make himself acquainted with a subject from all sides.

If we send out our graduates knowing how to study, how to make the best of the means within their reach, how to use their educational tools to the best advantage, and having firmly implanted in their hearts the love of achievement; if, along with these qualifications, there has been woven into their very being a sense of honour, a love of fair play, and that readiness to do their share which comes largely from the gymnasium and the athletic field, we shall have gone far in solving the problem of what should be expected from the twentieth century school.

III. REPORT OF INSPECTOR LEVAN

TO THE HONOURABLE R. A. PYNE, M.D., LL.D.,

Minister of Education for Ontario.

SIR,—I have the honour to submit herewith a Report on my inspection of High Schools and Collegiate Institutes for the school year of 1916-17.

I entered upon my duties in January, 1917, taking over the work from Inspector Wetherell and completing the inspection of the schools assigned to his charge. During the half year I had the pleasure of inspecting the Collegiate Institutes at Brantford, Galt, Hamilton, Kitchener, London, Ridgeway, St. Thomas, Sarnia, Stratford, Strathroy, Toronto (Harbord), Toronto (Jarvis), Toronto (Parkdale), Windsor; the High Schools at Amherstburg, Aylmer, Dutton, Essex, Forest, Leamington, Parkhill, Petrolia, Port Rowan, Simcoe, Watford and Wallaceburg; and the Night Schools held in connection with the Collegiate Institutes at Brantford, Hamilton, London, Toronto (Harbord) and Toronto (Jarvis).

Acting under instructions received, I also visited the following private schools to examine and report on the work in Art, Science, Book-keeping and Writing: De La Salle College, Aurora; Loretto Academy, Hamilton; St. Joseph's Convent, Hamilton; St. Anne's Convent School, Kitchener; St. Angela's College, London; Alma College, St. Thomas; Loretto Academy, Stratford; Havergal College, Toronto; St. Joseph's College Academy, Toronto; and St. Mary's Academy, Windsor.

The observations which I have the honour to submit herewith, being based on a very short experience in the schools, must necessarily be incomplete and inadequate. With further experience I hope to be able to submit a more comprehensive review of the conditions prevailing in the schools of my district.

The accommodations, generally speaking, vary from very good to very poor. The school buildings of recent date have been constructed with a view to securing beauty of architectural design, and have been planned in accordance with advanced ideas on school construction. In some of the older buildings, however, the interior

accommodations leave much to be desired. But owing to the strain of the war and the condition of the labour market, little is being done to effect desirable improvements. A notable exception, however, is to be found at Windsor, where a large new wing is being added to the Collegiate Institute. When this addition is completed and the other contemplated alterations have been made, the Windsor Collegiate Institute will rank with the best of the larger schools in the completeness and excellence of its accommodations.

In not a few of the schools the class-room accommodation is insufficient to meet the needs of the increasing attendance, with the result that 40, 45, or even 50 pupils are crowded together into one class-room. It is surely superfluous to point out the seriousness of such a situation. A class of such extreme size makes an unduly severe drain upon the nervous force of the teacher, prevents him from doing his best work, and hinders him in the effort to give to his pupils the individual attention they must have if they are to make satisfactory progress in their studies. The burden on the teacher is excessive and the loss to the pupil is irreparable. Such conditions should not be accepted with complacency. When financial conditions improve, School Boards should be required, in justice both to teachers and to pupils, to provide sufficient class-room accommodation to obviate the necessity of overcrowding.

Another defect to which I have frequently had to call the attention of School Boards is that of faulty ventilation. This defect is very prevalent, and is found in some of the newer schools as well as in the older ones. The remedy usually applied is to throw open the windows to admit a supply of fresh air. When the windows are opened in severe weather, the consequent draughts are not only a cause of discomfort, but oftentimes a serious menace to the health of the pupils. It is to be hoped that Boards will realize the seriousness of such conditions, and will spare no effort in the attempt to find a suitable remedy.

An important part of the work of the Inspector is to investigate the character of the teaching. Speaking generally, I may say that the teaching is, for the most part, of a very satisfactory nature. The work of some of the older and more experienced teachers it would be difficult to praise too highly. Of the faults of the younger teachers there are few that cannot be overcome by earnest effort and longer experience. At some future time I may describe certain errors into which the younger teachers are prone to fall. For the present I would rather refer to the successful work of the more experienced. I shall confine my observations to some of the work I have seen in the teaching of beginners' classes in French and German. In this class of work some of the most successful results were obtained by those teachers who took full advantage of the ability of young pupils to memorize with accuracy and ease. I have seen pupils who have had but three or four months' instruction in these languages give recitations, dialogues, songs and short plays in the language they were learning. The zest with which whole classes entered into this work, the accuracy of their pronunciation and their power to understand what they were saying and what was said to them in the foreign language, was most gratifying. It was apparent that the pupils were deeply interested in these lessons and were laying an excellent foundation for the more difficult work that was to follow. As an illustration of the method in which such lessons are conducted, I have pleasure in submitting a statement by Mr. F. H. Clarke, B.A., of the Oakwood Collegiate Institute, Toronto, showing how he introduces German to a class of beginners. Mr. Clarke's statement is as follows:

A Method for a Class of Beginners in German

"For a number of years a set of 45 copies of 'Märchen und Erzählungen,' Part I., by Guerber (D. C. Heath & Co.), has been in use in Oakwood Collegiate Institute.

"The first selection is 'Jakobs Haus' (The House that Jack Built), and the class is agreeably surprised at being able to understand a printed story in German before the close of the first lesson. When the first half page has been translated, and read by the pupils several times to get the sounds of the German words, exercises are given in turning English, based on the story, into German; and questions in German are asked, which are answered in German by the individual pupils.

"Then another section of the story is dealt with in the same way, and so on to the end of the story, each section affording an opportunity of reviewing what has preceded it.

"Each member of the class has a separate exercise book for this subject. In these books are also written notes on the sounds of the letters and combinations of letters, the declension of words such as 'dieser' and 'mein,' the conjugation of the simple tenses of the regular strong and weak verbs and of 'haben' and 'sein,' the order of words, etc.

"At the end of five or six weeks the class has a general knowledge of these points. Then during the next few lessons they are asked to write the story in German from memory. And finally they are asked to repeat the story orally from memory—a task that affords them a good deal of pleasure.

"The pupils have now had the pleasure of mastering a small portion of a foreign language, which is quite real to them, and with which the exercises of the Grammar have a real relation. As they proceed with the study of the Grammar, they memorize and recite the poetical passages, and later they find other extracts in 'Märchen und Erzählungen' interesting, one of the best being 'Der Pfeifer von Hameln,' the English version by Browning being already familiar to many of them."

I cannot bring this report to a close without a reference to the high character and deep devotion to their work of the teachers in the Secondary Schools of this Province. They are engaged in a task that requires years of preparation, and demands skill, judgment, enthusiasm and self-sacrifice for its proper performance. Few persons outside the profession can realize how difficult is the task the teacher has to perform. As a class the teachers show a deep sense of their responsibilities and of the importance of the work in which they are engaged. The war has taught us many things; perhaps it will teach us to see more clearly the importance of education, and to reward more liberally the teachers who are rendering so important a service to the state.

I have the honour to be, Sir,

Your obedient servant,

I. M. LEVAN.

Toronto, December, 1917.

APPENDIX E

REPORT OF THE INSPECTOR OF ELEMENTARY AGRICULTURAL CLASSES

TO THE HONOURABLE R. A. PYNE, M.D., LL.D.,
Minister of Education for Ontario.

SIR,—I beg to submit for your consideration a report on the Elementary Agricultural Classes in connection with the schools of the Province for the year 1917.

I have the honour to be, Sir,

Your obedient servant,

J. B. DANDENO,
Inspector of Elementary Agricultural Classes.

January, 1918.

The duties of the Inspector of Elementary Agricultural Classes include: (1) The inspection of Agricultural classes in Collegiate Institutes, High Schools, Continuation Schools and in Normal Schools; (2) a general supervision of the teaching of Agriculture in the Public and Separate Schools, including the approving of teachers' reports and trustees' statements; (3) attendance upon Teachers' Institutes and taking part in the programmes as frequently as possible; (4) visiting Secondary Schools which have not yet introduced classes in Agriculture to discuss the situation; (5) addressing public meetings, such as township institutes, county trustees' associations, county councils and the like, with the object of explaining the situation with respect to the teaching of Agriculture in the schools; (6) a supervision of the Summer Courses for teachers at the Ontario Agricultural College.

Rural Ungraded Schools

The introduction of agriculture as a regular subject of the Public School curriculum is proceeding quite rapidly throughout the Province of Ontario. Many of the difficulties which formerly appeared great, are rapidly being overcome. Wherever the subject has been carried on for a year or two, confidence in its usefulness, not only as a subject which is fruitful of practical results, but also as a subject contributing to a considerable extent towards a liberal education.

Some of the more important difficulties to be overcome are as follows:

(1) Teachers, parents, and trustees consider the school programme overcrowded and are consequently inclined to believe that the introduction of another subject to the programme would be an unwarranted addition to the already heavy burdens of the pupil.

(2) Some farmers have the idea that they can teach their children at home all the agriculture necessary for them in after life even if those children become

farmers. They give emphasis to this argument by saying that lady teachers, many of them brought up in the city and without any of the rural viewpoint, are not qualified to give any agricultural instruction worth while.

(3) One of the most far-reaching difficulties is that the rural population do not really know the nature of the work nor its relation to the schools.

(4) But by far the chief difficulty arises out of the fact that the grants, when earned, are not paid till long overdue. School Boards, teachers and even inspectors are becoming restless and discouraged because of the fact that the grants are so long withheld. The following quotations taken from an extensive correspondence on this point represents the situation and shows how teachers and boards view this particular aspect of the situation:

Since then I have received no grant or further notice, so I presume the money will soon be available.

I think the delay is occasioning some doubt in the mind of the School Board as to whether the expenditure for 1916 was warranted. The possible effect upon further expenditure for this year is not good. It negatives the work we have been trying to stimulate.

HAZEL M. DAVIDSON.

St. Catharines, Ont., May 1st, 1917.

When Boards are promised a refund of money laid out for expenditure, they naturally expect to receive it reasonably on time. Another teacher writes as follows:

If these grants are not forthcoming as the Inspector says they should be, we do not intend teaching agriculture any more.

LILLIAN B. PRIDDLE.

London, May 5th, 1917.

The grants referred to were due in January, and from these letters it appears were not paid on the dates mentioned. The grants to Inspectors were due in the preceding September.

That the movement is making steady progress, however, and that it is being appreciated by Boards of Trustees may be inferred from the following statements, taken from comments made upon the annual reports submitted to the Department of Education. These comments are made voluntarily and are selected from eighty or a hundred reports received in January, 1917:

S.S. No. 3, Fullarton, Perth Co.

We obtained a plot of ground from the Township Council this fall for a term of five years and have prepared it for a school garden. We have had it manured and plowed, bought fencing and implements for garden work and intend buying the remainder of the necessary implements in the spring. We have already spent \$30.00 on our garden this fall.

J. M. CAMPBELL, *Secretary*,

R.R. No. 1, Munro, Ont.

S.S. No. 22, Mountain, Dundas Co.

We expect to have our garden much better this coming year than it has been in the past, as we have employed a caretaker to look after grounds and buildings for the year, also to look after the garden during the holidays and keep everything in good shape.

S. W. VANALLEN, *Secretary*,

Mountain, Ont.

S.S. No. 10, Ellice, Perth Co.

The Agricultural course was not discussed at the annual meeting in 1915, so the teacher and pupils took the course up themselves. We had the ground ploughed in the spring of 1916 and the work was carried out very nicely. During summer holidays the garden was taken care of by teacher and pupils and was a credit to the section, considering the disagreeable season. The matter was discussed at the 1916 meeting and the ratepayers instructed the school board to go ahead and take up the course.

GEO. DAVIDSON, *Secretary*,

R.R. No. 2, Gadshill, Ont.

S.S. No. 8, Grey, Huron Co.

The work has been very interesting, both to the pupils and parents, and it has tended to foster the community spirit and to keep the children interested in the school. I do not think that there was a day during the summer holidays that there was not one of the pupils at the school-gardens, and lots of days four or five. I have been told by some of the parents that if the children learned nothing else than to know weeds and weed seeds that the teaching of Agriculture had a beneficial effect.

We are so well satisfied with the teaching of Agriculture that we intend to continue it during 1917.

ED. FULTON, *Secretary*,

R.R. No. 2, Brussels, Ont.

S.S. No. 5, McGillivray, Middlesex Co.

We consider the school garden a decided success. The pupils take more interest in the crops and animals and trees since Agriculture has been taught.

JOHN DIXON, *Secretary*,

R.R. No. 2, Ailsa Craig, Ont.

S.S. No. 2, E. Flamboro, Wentworth Co.

The Trustees take a great interest in beautifying the school grounds and do all in their power to the furtherance of that purpose. The children have home gardens, and each one has a flower garden at school. The home gardens were very successful. I went and inspected them. The children take a great interest in their gardens and the scheme seems to suit our section to perfection. School days become less monotonous and the children seem brighter and more alert, because they are learning a study that is practical and as this is their ideal, the work appeals to them.

J. A. SMILEY, *Secretary*,

Aldershot, Ont.

From the above quotations it may be seen that the work is becoming understood and appreciated wherever it has had a fair trial. Progress has been much more rapid in some counties than in others. The following list shows the schools conducting classes in agriculture for the whole or a part of the calendar year 1917:

The Public and Separate Schools qualifying for grants commencing in 1903 are given in the following table:

Year	No. of Schools	Year	No. of Schools	With School Gardens	With Home Gardens
1903	4	1911.....	33
1904	7	1912.....	101
1905	6	1913.....	159
1906	8	1914.....	264	208	56
1907	2	1915.....	407	222	185
1908	14	1916.....	585	324	261
1909	16	*1917.....	950	550	400
1910	17				

Until 1914, no distinctions were made in the reports respecting Home Gardens and School Gardens.

*Estimated. All the reports have not yet been received.

Of these 407 schools teaching Agriculture in 1915, 100 were taught by teachers who held certificates in Agriculture and 307 were taught by teachers with Second Class certificates.

Of the 585 schools teaching Agriculture in 1916, 201 were taught by teachers who held certificates in Agriculture and 384 were taught by teachers with Second Class certificates.

The amount paid out during the calendar year 1916 was:

To Public and Separate School Boards	\$4,965.51
To Teachers	11,589.02
To Inspectors (school year 1915-16)	1,778.00
	<hr/>
	\$18,332.53

This amount was paid from the Legislative grants entirely. The Federal appropriation was withheld by the auditor.

The funds set apart to be used to encourage the teaching of Agriculture in Ontario is administered as set forth in the following clause of the agreement between the Federal Government and the Province:

"To provide for and to encourage the teaching of Agriculture, Manual Training, as applied to work on the farm, and Domestic Science in High, Public, Separate and Continuation Schools and in Universities, to be available for grants, Services, Expenses and Equipment, and travelling expenses of teachers, inspectors and others in attendance at Short Courses or other educational gatherings, and to be paid out on the recommendation of the Department of Education, \$30,000."

The sums apportioned to Teachers and Boards with the conditions under which they are payable, are shown in the following schedule as respects rural and ungraded schools [Circular 13, Regulations 7, (1), (2), (3), (4)]:

I. Schedule of Grants for Rural Ungraded Schools—Forms III and IV

		Where the teacher holds a second class certificate but is not certified in Agriculture.			Where the teacher holds an Elementary certificate in Agriculture and Horticulture, or receives a certificate during the year.			
Requirements	To the Board*	To Teacher*			To Trustees	To Teacher*		
		For full year	For fall term	For winter and spring terms		For full year	For fall term	For winter and spring terms
A. FIRST PLAN								
<i>Instruction.</i>								
Instruction throughout the whole year, to be completed satisfactorily, with requirements regarding pupils' records, teacher's report, trustees' statement, etc., fulfilled.	Not exceeding \$10.00	\$15.00	\$5.25	\$7.50	Not exceeding \$20.00	\$40.00	\$14.00	\$21.00
<i>Home Gardens.</i>								
Home gardens or projects by pupils of Forms III and IV supervised by the teacher.								
<i>School Grounds.</i>								
Well kept grass and flower plots, borders, screens, etc., at school for beautifying grounds and for instructional purposes.								
B. SECOND PLAN								
<i>Instruction.</i>								
Instruction throughout the whole year to be completed satisfactorily, with requirements regarding pupils' records, teacher's report, trustees' statement, etc., fulfilled.	Not exceeding \$15.00	\$20.00	\$8.00	\$10.00	Not exceeding \$30.00	\$50.00	\$18.00	\$27.00
<i>School Gardens.</i>								
(1) A pupils' school farm or school garden at or near the school, having at least six square rods for experimental and observation plots and contributing to the School Fair.								
(2) For other pupils of Forms III and IV not represented in the work on the six square rods, either additional plots in the school garden, or gardens or projects at home, supervised by the teacher.								
<i>School Grounds.</i>								
Well kept grass and flower plots, borders, screens, etc., for beautifying grounds and for instructional purposes.								

* When, with the approval of the local and the Departmental Inspector, the work begins at Easter, a proportionate amount of the grants will be paid, provided an undertaking is given by the Board that it will be continued during the year following.

On the recommendation of the local inspector, approved by the Departmental Inspector, the grants to Boards and teachers in the districts and the poorer parts of the counties may, in each case, be one-half greater than those provided in the above schedule.

When the teacher holds an Intermediate certificate in Agriculture, the grant in addition to his salary shall be one-half more than that specified in the above schedule for an Elementary certificate. (This clause was accidentally omitted from Circular 18, 1917.)

The Regulations have recently been amended so as to include schools in cities and towns where such schools comply with the regulations. It is not expected that Agriculture will be introduced into the schools of the larger cities to any very great extent, at least for some time yet. However, the Department of Education has introduced a schedule of grants applicable to all graded schools which is set forth as follows:

II. Schedule of Grants for Rural and Urban Graded Schools

Forms III and IV

Requirements	Where the teacher is certificated in Agriculture, or receives a certificate during the year			
	To the Board.*	To the Teacher.*		
		For full year.	For fall term.	For winter and spring term.*
A. FIRST PLAN				
<i>Instruction.</i>				
Instruction throughout the whole year, to be completed satisfactorily, with requirements regarding pupils' records, teacher's report, trustees' statement, etc., fulfilled.	\$20.00 for each teacher not exceeding \$100.00 for each School.	\$40 00	\$14 00	\$21 00
<i>Home Gardens.</i>				
Home gardens or plots supervised by the teacher.				
B. SECOND PLAN				
<i>Instruction.</i>				
Instruction throughout the whole year, to be completed satisfactorily, with requirements regarding pupils' records, teacher's report, trustees' statement, etc., fulfilled.	\$20.00 for each teacher not exceeding \$150.00 for each School.	\$50 00	\$18 00	\$27 00
<i>School Gardens.</i>				
A pupils' school garden at or in connection with the school, having at least six square rods for experimental and observation plots for each class.				

* When, with the approval of the local and the Departmental Inspector, the work begins at Easter, a proportionate amount of the grants will be paid, provided an undertaking is given by the Board that it will be continued the year following.

Form V

When a Board maintains the course prescribed for the Fifth Form, the Minister will pay, on the same conditions, the same grants as are payable for Lower School courses in agriculture and horticulture in the High and Continuation Schools. For particulars, see the Regulations of these Schools.

When also, as authorized below, pupils in Form V continue the course for Form IV with additions selected by the Principal from the course for Form V with the approval of the Inspector, the Minister may pay the teacher in addition to the grant for Form IV a grant for such work, not exceeding the fourth of the grant payable to him for Form IV, on the report and recommendation of the local Inspector approved by the Departmental Inspector of Elementary Agriculture and Horticulture.

(2) Where in a graded school there are two or more teachers with certificates in Agriculture, conducting classes in Forms III and IV in accordance with the regulations, the grants shall be apportioned to the teacher as follows: For each of two teachers 7-eighths of that specified above for one teacher; for each of three teachers 6-eighths; for each of four teachers 5-eighths, and so on.

(3) If one qualified teacher teaches the subject in different grades in the same school, or in different schools, the grant to him shall be apportioned on the same bases as for more than one teacher in (2) above.

(4) When two or more rural schools unite to form a consolidated school the grant to the Board shall be the total amount that might have been received by the individual schools before consolidation; and the grants to the teacher or teachers, as the case may be, shall be those set forth in the schedule for graded schools.

School Fairs

School Fairs are organizations under the charge of the District Representatives of the Department of the county in co-operation with Inspectors, Trustees and Teachers. Where there is no District Representative in the county the burden of management will fall upon the Inspector and the teachers. The only counties without a Representative at the present time are: Huron, Perth and Russell.

For the information of the teachers the following list, correct to September 12th, 1917, is submitted:

District Representatives of the Ontario Department of Agriculture

Respecting the origin and progress of School Fairs I quote from a statement by Mr. R. S. Duncan, Supervisor of District Representatives:

"The Rural School Fair idea originated in Waterloo County in the year 1909, when the District Representative distributed seeds for a small home garden plot to the pupils of three schools in North Dumfries Township. That fall the first School Fair in Ontario, if not in the Dominion, was held at the River Road school near Galt, and augured well for the success and spread of the movement through the rural districts. This was a 'Red Letter Day' long to be remembered by the writer, who was present and assisted in the management of the Fair.

"The first Fair was a success from every standpoint—the interest of the pupils was aroused and their thought was stimulated; the teachers were heartily in favour of the development of the scheme; the trustees gave their undivided support and the parents voiced their sentiments in favour of the idea in no uncertain tones, and became enthusiastic concerning the new atmosphere which had been created in the district.

"The movement has grown year by year until in 1917 there were no less than 302 School Fairs held in the Province. One can gather some idea of the movement from the following:

SEED DISTRIBUTED IN 1917

Barley	64 bushels	Mangels.....	5,850 packages
Oats	138 "	Beets	6,430 "
Wheat	23 "	Carrots	6,865 "
Sweet corn	26 " (shelled)	Parsnips.....	2,840 "
Field corn.....	43½ " (on the cob)	Asters	9,110 "
Peas	580 lbs.	Sweet Peas]	4,180 "
Potatoes.....	1,211 bushels	Phlox	1,395 "
Turnips	3,695 packages	Eggs	9,284 dozen

"The following table gives a summarized list of the number of fairs held:"

	1915	1916	1917
No. of Fairs held.....	234	275	302
No. of Schools included.....	2,291	2,620	2,825
No. of Children taking part.....	48,386	60,262	68,862
Attendance, children	72,860	83,029	86,121
“ adults.....	84,406	95,217	82,077
“ Total.....	157,266	178,246	168,198
No. of Entries.....	116,236	113,263	106,570
No. of Home Plots.....	51,243	55,947	59,329

Quoting further from Mr. Duncan:

"In view of the unprecedented conditions which prevailed in regard to the labour problem, it was decided to discontinue an inspection of the School Fair plots, with the exception of those in newly organized Rural School Fair Districts. A special appeal was made to the teacher and trustees to arrange for some local assistance in the inspection and judging of the plots in their school section. In many instances, the clergy visited the plots, in some cases either the teachers or trustees made the rounds and forwarded plots to the District Representative's office, who awarded prizes for the best cared for plots in the section.

"Practically every organization connected with the rural communities stood behind the School Fair and rendered valuable assistance, not only financially, but in the conduction of the various special features. Let me give a few concrete examples.

The Board of Agriculture donated silver cups or shields to the boy or girl securing the highest number of points at the School Fairs in the County, or to the schools whose teams won the Live Stock Judging Competitions; the Women's Institutes assisted in the conduction of refreshment booths in aid of the Red Cross, and undertook in some cases to supply judges for the girls' work in baking and sewing; the Junior Farmers' Improvement Associations had complete charge of some of the Live Stock Competitions conducted at the Fair; the Trustee, Boards and the Township Councils were very generous in their assistance from a financial standpoint, in making grants to enable the Rural School Fair Associations to pay their prizes.

"Special mention, of course, should be made of the Rural School Fair Association itself, which is composed of representatives from each school in the District, who were elected by ballot by their own school. The accredited delegates from each school would meet, form a Rural School Fair Association, and elect officers. The School Fair officers would meet perhaps twice during the season to discuss matters pertaining to the welfare of the Fair. Special duties were assigned each officer and director, and their assistance was of untold value. The splendid business training these boys and girls would receive would no doubt stand them in good stead in future years.

"The special features worthy of more than a passing note are the Live Stock Judging Competitions, for teams of three boys from each school, who are asked to judge two classes of Live Stock, generally beef or dairy cattle and heavy horses; the public speaking contests, in which from two to ten boys and girls compete; the boys and girls driving contests, which includes hitching and unhitching; the School Fair Parades; Physical Drill under the Strathcona Trust; Weed and Apple Naming contests, and the exhibition of calves and colts led by the boys who spent considerable time training their pet animals."

School Gardens

A circular—Agricultural Circular, No. 2—was issued in March last giving instruction with respect to school gardens, more particularly to those introduced for the first time. Since most of such gardens were broken up from sod—and many of them stiff, weedy sod at that—a practical method of management of such sod was given in the circular referred to. Many reports have been received indicating very satisfactory results, not only in country schools, but also in schools of towns and cities. The following quotation, taken from a report concerning one of the Public Schools of Picton, shows something of the results to be derived from school gardens.

"You will be pleased to know our school garden was a great success. We raised:

Potatoes	9 bushels
Turnips	12 "
White beans	8 "
Carrots	9 "
Onions	6 pecks
Tomatoes	6 "
Radishes	6 "

and in addition some parsnips, pumpkins, corn and cucumbers.

"We held a School Fair in our building, at which the pupils showed the products of their home gardens as well as the products of the school garden. The fair was well attended and the parents much interested. We felt much encouraged.

ELIZABETH DUNKLEY."

An estimate of the school garden produce of the Public and Separate Schools may be made from the following detailed statement reported from the School of The Immaculate Conception (Separate School), Peterborough.

Expenses	—	Receipts	—
	\$ c.		\$ c.
Cabbage seed.....	0 05	Cabbage.....	3 60
Sweet Peas.....	05	Potatoes (two bags).....	3 00
Beans.....	10	Onions (5 pecks).....	2 00
Potatoes, one peck.....	85	Tomatoes (3 pecks).....	75
Carrots.....	05	Beans (6 pecks).....	3 60
Cucumbers.....	05	Beets.....	2 00
Lettuce.....	05	Lettuce.....	50
Radishes.....	05	Radishes.....	45
Onions.....	05	Cucumbers.....	50
Nasturtiums.....	05	Carrots.....	60
One doz. eggs.....	45		
Total outlay.....	\$1 80	Total income.....	\$17 00
Net profit.....		\$15 20	

In the rural schools in most of the counties very considerable progress has been made, and the idea is quite general that the move is in the right direction and that the school garden will become a permanent part of Public School accommodation. In some cases, the neighbouring farmer deeded a plot of land over to the Board, in other cases, land was secured rent free; in all cases the farmers have shown the disposition, as soon as they are shown the value of the movement to the community, to provide what may be needed.

Dundas County certainly has made immense strides in the direction of agricultural education, and the following statement, taken from the report of the Inspector, shows what may be done:

During the year 1917 there were 36 school gardens in Dundas County. The increase of food production was the chief idea in the making of these gardens in the spring of 1917. The larger part of every garden was devoted to the growing of beans or potatoes. The garden in connection with the Morrisburg Public School produced $7\frac{1}{2}$ bushels of beautiful beans. The smallest yield reported from any school was 40 lbs. of beans. The harvesting, threshing and hand-picking of these beans, in the different schools, were done by the pupils as part of their regular class work in Agriculture. In several schools the beans planted last spring were weighed, and the increased production noted this autumn. The pupils were particularly interested in this phase of the work, and used the school scales to weigh the produce of their gardens.

One garden was devoted entirely to the growing of potatoes. Each pupil was given a row to plant and care for during the season. The potatoes planted were weighed and likewise the yield this autumn. This stimulated a healthy rivalry among the pupils, and the interest was maintained until the potatoes were dug and weighed in October.

Agriculture is now taught in every school in Dundas County, and in some of the graded schools, as many as three teachers are doing this work. I have yet to find a school in which the teaching of Agriculture has, in any way, interfered with the teaching and progress of other subjects; while several teachers have told me that subjects such as Arithmetic, Literature, Nature Study and Composition, have been directly helped.

J. W. FORRESTER.

Greater Production

The schools have taken an active part in greater food production in 1917. The following circular letter was sent to all the teachers of the Province:

Circular to Inspectors and Teachers.

INCREASED FOOD PRODUCTION

In order to assist in meeting the shortage of foodstuffs, due to war conditions and the unfavourable season of 1916, those teachers who are now giving instruction in Agriculture and Horticulture in the Provincial schools should arrange, as far as practicable, to grow plants of food value in school gardens and to reduce correspondingly the space hitherto devoted to flowers and decorative shrubs. With the same object in view, the home garden projects should be enlarged and modified and extensive use made of vacant lots and other unoccupied areas. In this way advantage might be taken of the potential labour of boys and girls from eight to fifteen or sixteen, much of which in the ordinary course of events is not utilized.

Inspectors might also take advantage of present conditions to enlarge the scope of agricultural education in Ontario and to demonstrate more fully the important bearing which Agriculture has upon the welfare of the people, by using their influence to induce School Boards which have not yet established classes in Agriculture to undertake this work and to utilize the school garden or home garden as recommended above.

If, indeed, the urban municipalities in Ontario having a population of from 1,000 to 9,000 would double the present production of their gardens and poultry yards, and use, as recommended above, the vacant lots and other unoccupied areas, it would increase the food products of Ontario by \$10,000,000 at a very conservative calculation.

Boys and girls cannot be expected to fight, but by assisting in increasing the supply of foodstuffs, they also can be of service.

R. A. PYNE,

Minister of Education.

January 15th, 1917.

As a result of the above, a large number of schools undertook school garden work for the first time with very gratifying results. The home gardens were also stimulated, and the increase in food supply—chiefly potatoes and beans—was considerable.

A special feature of this greater production is outlined in the following circular letter:

To the Teachers of the Public and Separate Schools in Ontario.

GREATER PRODUCTION FOR 1917

By an arrangement with the Poultry Department of the O.A.C., Guelph, eggs for hatching can be supplied in a limited quantity for May delivery at 50 cents a dozen in 100-egg lots to pupils of schools in which classes in Agriculture are maintained. The eggs are from an improved Barred Rock bred-to-lay strain, and the introduction of this breed into the rural districts is likely to prove of lasting benefit to the whole country.

If the teachers are willing to take this matter up in connection with their classes, they should communicate with Professor Graham at the O.A.C., and secure at one shipment the number of eggs required for their schools.

It is suggested that part of the cost (say one-half) be borne by the School Board and part by the pupils, thus placing the cost to the pupil at so reasonable a figure that the project will be within reach of all. The part of the expense borne by the School Board may be charged to the Agricultural account (P.S. Regulations 1915, 16 (1), page 85) as the hatching of eggs and the rearing of the brood is a legitimate and useful home project for a pupil of the third, fourth or fifth form.

J. B. DANDENO,

Inspector of Elementary Agricultural Classes.

Toronto, January 29th, 1917.

In this project 152 Public and Separate Schools participated—30,940 eggs being secured for incubation. Eight Secondary Schools, under a similar arrangement, made use of 2,576 eggs.

A similar arrangement will be made for 1918, but the price of eggs will be higher.

An estimate of the results obtained from the campaign for greater production in 1917 may be given. The amount of food produced as a result of this movement, or the value of such food is, of course, difficult to estimate, but some idea may be obtained from the following: About 950 schools in Ontario are conducting classes in Agriculture at the present time, and of these about 600 have school gardens. These gardens vary from 6 or 8 square rods up to one acre. The crops grown were mainly potatoes or beans, but in many cases, general vegetables were produced. The value of food produced would reach on an average, taking the largest with the smallest, about \$7.50 for each school for the school gardens alone. This would make a total of \$4,500. The 350 schools which are not conducting school gardens are not considered in the above, nor are the home gardens of those pupils attending schools which have a school garden. It is not easy to obtain data regarding home gardens, but it very frequently happens that one pupil produces as much in his home garden as that derived from the whole school garden. If we consider the results of the home gardens in addition to those of the school gardens the total would easily reach, when we consider the enhanced prices now prevailing, the sum of \$40,000.

This amount may not seem large because of the nature of the problem and of the amount of land involved. The problem is educational rather than economic. But when we consider that the amount mentioned is an addition to the sum total of our food supply the result is very gratifying indeed.

The poultry project where 40,000 eggs were distributed under the arrangement outlined in the circular already quoted, resulted in the raising of 22,000 chickens of an approved strain of a utility breed. If these are worth 50 cents each—and many of them have been sold as high as \$2.00 apiece—it would mean an increase of \$11,000.

To sum up it may be said that through the efforts of pupils and teachers the total increase of foods due to this campaign is \$55,500.

For 1918 the home projects and school gardens are to be extended with results beneficial both to the country and to the pupils concerned.

Equipment

In order that the work may be effective, teachers must have suitable laboratory and illustrative material. The work is essentially practical, and good results can not be expected unless the teacher uses the laboratory method with suitable equipment.

As the Department pays in full for such equipment as may be needed there should be little difficulty in securing it. Many teachers are so wedded to book methods and similar routine that it is not easy, apparently, to break away. However, progress is being made, more particularly among those teachers who have taken the summer courses in Agriculture.

One difficulty in the way of securing equipment is that there is no suitable place to store it. In such cases teachers and Inspector should explain the matter to the Board, pointing out to them that certain pieces of equipment might be loaned to farmers in the neighbourhood after the class has completed the work involving such apparatus. The school—equipment and all—should be made use of by the people.

The following list of apparatus is recommended as suitable for elementary classes in Agriculture and is intended to be suggestive:

General

(Price estimated.)

Three small glass funnels	\$0 30
One half dozen glass tumblers	30
One half dozen glass fruit jars (sealers)	40
One dozen large test tubes (1 in. by 6 in.)	30
Measuring cylinder (graduate) 100 c.c.	75
Hydrometer, Baumé (for heavy liquids)	1 00
Hydrometer jar	45
Spirit lamp (with wood alcohol)	40
Thermometer, chemical, both C and F. (2 at 30c.)	60
Small bottle of hydrochloric acid	15
Small bottle of iodine (in K I)	15
Two litmus pads at 5c.	10

The following, dry, in large mouthed, cork stoppered bottles:—

Sodium nitrate, calcium phosphate, potassium chloride (or sulphate), copper sulphate, washing soda, baking soda, starch, lime, sulphur 10 cents each	90
Filter paper	10
Soup plates and saucers, a dozen each	60
Flower pots, 3 dozen 4 in.	1 08
Flats (boxes for planting seed)	20
Apple box to demonstrate packing	20
Surveyor's chain	2 50
Rain gauge	2 00
Garden tools as may be needed.	

Special

For special purposes, selections from the following may be made: (The teacher should write to a dealer for prices.)

For Poultry—

Model of feed hopper, trap nest, model of hen or chicken coop, incubator (may be borrowed).

For Beekeeping—

Standard Langstroth hive, complete; smoker, colony of bees in 10-frame hive.

For Field Crops—

Set of grain measures, machine for treating grain for smut, samples of grains—wheat, rye, barley, buckwheat, rice in the hull, oats, etc.; fertilizers, weed seeds.

Horticulture—

Pruning and grafting tools, hand spraying outfit, hot bed (may be built permanently), cold frame, combined wheel cultivator and seeder.

For Dairying—

Lactometer, Babcock milk tester, milk scales, milk pail (modern), butter utensils, for illustration.

High Schools

The same plan as that employed in 1916 for visiting Secondary Schools which are conducting classes in Agriculture, was followed out in 1917, namely, to visit those commencing the work for the first time, twice during the year and other schools at least once. A large portion of my time is taken up attending other gatherings as indicated in the lists here given:

Schools Visited in 1917

Spring Term, 1917:

Clinton	Hagersville	Drayton	Picton
Exeter	Arthur	Brockville	Oakville
Essex	Kincardine		

Fall Term, 1917:

Brockville	Woodstock	Niagara Falls S.	Winchester
London	Arthur	Oakville	Wingham
Picton	Athens	Port Hope	Drayton
Renfrew	Cobourg	Whitby	New Liskeard
Smith's Falls	Kincardine	Williamstown	Ridgeway

Attended the following Trustees' meetings at:

Kintore	Cooksville	Cornwall (H.S.)
Brampton	Albion	Maple
Woodstock (County Ass'n)	Caledon E.	Kleinberg
Woodstock (C.I.)	Agincourt	Sherkston
Cobourg (C.I.)	Drayton	Welland
Bluevale	Maxville	Newtonbrook (5 York)
Essex (County Ass'n)	Williamstown (H.S.)	

Normal Schools and Public Schools affiliated with them:—

Hamilton: Beach School.

London: No. 4 Westminster, No. 7 Westminster, No. 15 Westminster, Tecumseh.

North Bay: Feronia, 1 B Ferris.

Ottawa: No. 3 Gloucester, No. 14 Nepean, Normal Model.

Peterborough: No. 3 Smith, No. 5 Smith, No. 16 Otonabee.

Stratford: No. 3 Downie, No. 5 Downie, No. 9 Downie.

Toronto: Langstaff, Willowdale (4 York), Newtonbrook (5 York), Normal Model.

Public Schools other than those affiliated with the Normal Schools: Albion, Agincourt, Ridgeway, Stamford, Welland, Winchester, 6 Winchester, 10 Winchester, Chesterville, 8 Winchester, 5 Winchester, 11 Ameliasburg, 5 Hallowell, 11 Hallowell, 6 North Marysburg, Bloomfield.

School Fairs: Swansea (suburban), Withrow Ave. (Toronto), Frankland School (Toronto).

County Councils at: Pembroke, Whitby.

Teachers' Associations at: Picton (Pr. Edward Co.), Toronto (East and West York), Toronto (North York), Niagara Falls S. (Welland Co.), Hamilton (City Association).

The progress of the work in the Secondary Schools is indicated by the following table which shows where the work was introduced and how long continued. The word "Yes" means that the work was carried on successfully through the term,

and the word "No" indicates that the work was temporarily dropped. The reason assigned in each case for dropping the subject was because of the impossibility of securing a legally qualified teacher to teach Agriculture.

The chief difficulties in introducing and in maintaining classes in Agriculture in the Secondary Schools is the lack of legally qualified teachers. There are other difficulties but they are all, taken together, unimportant as compared with this. This scarcity of teachers shows itself mainly when a vacancy occurs as the result of the resignation of the teacher of Agriculture. This happened in five cases in 1917. The blame for this situation lies largely at the door of the Board. In some cases it is a small increase in salary, in others a lack of foresight in engaging a teacher and arranging for attendance of the teacher at such courses as are needed to qualify him, in still others it is a lack of knowledge of the special qualifications of teachers. But this should also be said in favour of Boards of Trustees in general: When the situation is explained to them they are easily induced to attempt to adapt their schools to the needs of progress.

Until Agriculture is recognized as a cultural subject of some importance leading to a course in a University it will be seriously handicapped in the High Schools. The colleges exert a tremendous influence upon the course of study in the High Schools, and the standard of admission to the college is made by the college. It

*Separate Departments of Agriculture.

is to be hoped that our Universities may see their way clear to give some recognition to Agriculture as a preparatory subject for entrance into the Universities.

As was expected, the teaching of Agriculture would not be confined to the limits of the school or the school grounds. The school has long been too much isolated in its work, and too far removed in aims and ideals, from the country in which it is located. Wherever a Department of Agriculture has been introduced extension work is being done, and it is hoped that short courses will be introduced to suit the needs of country people in winter. Such short courses should be so arranged that those living in the country could attend even for a part of the day. And it is hoped that the full staff of the High School will take part in contributing subjects other than Agriculture.

One instance of the extension movement is shown by the following letter:

DRAYTON, ONT., Nov. 24, 1917.

It is with considerable satisfaction that I report to you regarding the use that is being made of our agricultural equipment, especially our spraying outfit.

About the second week in July it looked as though we were going to lose our potato crop owing to late blight. We have a small tractor spray machine and a knapsack sprayer, and tried to draw the attention of the public to them. We prepared some Bordeaux Mixture and sprayed our own potatoes and several other small patches in the village. We then took our machines out to a farm about four miles to the north-west of the village and sprayed a potato patch. A few days later we took the knapsack sprayer out about five miles to the home of one of our students, who lived to the south-east, and sprayed a small patch of potatoes. Several other farmers then took advantage of our machines and they were kept busy for some time. In all, nine farmers used our machines, while many of the village gardeners used them. I may add that the knapsack sprayer is more popular than the hand tractor. About a week ago a gentleman borrowed it to spray his hen house and was pleased with it.

Yours truly,
GEO. A. CLARK.

The effort put forth to check late blight of potato as mentioned in the letter given above is more important than at first appears. This disease in 1917 caused a loss of about half the potato crop in New Brunswick, and also a very considerable loss in Ontario. The work done in the neighbourhood of Drayton may easily have saved more potatoes than would pay the cost of the school, and the gain is not for one year alone, because when farmers see the advantage they are eager enough to profit by it.

A practical instance of evidence of appreciation by a county council may be mentioned by way of congratulation to Halton County, and, also, by way of encouragement to other counties:

OAKVILLE, ONT., June 5th, 1917.

Statement regarding Agricultural Grant to Oakville High School by Halton County Council.

At the meeting of the Halton County Council on April 17th, 1917, a grant of five hundred dollars was made to the Oakville High School to assist in maintaining an Agricultural class, and generally promoting an interest among the students in practical agriculture.

This grant was made in accordance with Chapter 268, Sec. 33, Sub-Sec. 2, of the High School Act, R.S.O. 1914, and it is the intention to make this grant annually, with the proviso that the money be used exclusively for providing equipment and for the teaching of Agriculture. A special account is to be kept showing the expenditure.

The principal of the school, W. B. Wyndham, is a qualified instructor in Agriculture, having secured his certificate from the Department of Education by attendance at the Summer Courses at the Ontario Agricultural College. This is an important feature in order to secure the most useful practical results. The students have manifested a keen interest.

A. S. FORSTER,
Reeve.

The Training of Teachers for High Schools

As has been pointed out the chief difficulty in the way of introducing Agriculture into the Secondary Schools of Ontario is the lack of qualified teachers. Courses are provided at the Ontario Agricultural College covering two consecutive summers of five weeks each. These courses were introduced in 1913 and the following teachers so far have qualified:

1914	
John A. Bell.	Alex. R. McRitchie, B.A., Toronto.
Geo. A. Campbell.	Alex. Pearson, B.A., Toronto.
Geo. A. Clark.	Edmund Pugsley, B.A., Victoria.
J. B. Dandeno, B.A., Q'ns., A.M., Ph.D., Harv.	Fred Sine, M.A., B.Sc., Queen's.
James L. Mitchener, B.A., McMaster	Arthur M. Woodley.
Wm. J. Morrison, B.A., Toronto.	Wm. B. Wyndham, B.A., Toronto.
1915	
Wm. Bowden.	John P. Hume, B.A., Queen's.
*Wm. G. Butson.	John A. Macdonald.
Edward J. Corkill, B.A., Queen's.	Geo. O. McMillan, M.A., B.Pæd., Q'ns.
Robt. W. Fleming.	Muriel A. Shook.
**Chas. S. Gulston.	Geo. B. Spark, B.A., Toronto.
1916	
John G. Adams, B.A., Queen's.	Hugh H. Graham, B.A., Queen's.
Edwin T. Bell, B.A., McMaster.	Hugh J. Haviland, B.A., Toronto.
Geo. W. Bunton, B.A., Queen's.	Gideon A. Miller, M.A., Queen's.
Geo. E. Copeland, M.A., Queen's.	W. A. Porter.
Isabella E. Dobbie.	Walter E. Shales, M.A., Queen's.
Wm. Donaldson, B.A., Toronto.	Daniel E. Smith, B.A., Queen's.
Clarence Elliott.	Christopher Summers.
F. V. Elliott	
1917	
J. A. Anderson, B.A., Queen's.	G. E. Pentland, M.A., Queen's.
Norman Davies, B.A., McMaster.	H. E. Ricker, M.A., Queen's.
W. M. Erwin, B.A., Queen's.	P. M. Shorey, B.A., B.Sc., Queen's.
Ishbel A. Foster.	J. A. Short.
Helen E. Foster.	F. P. Smith, M.A., Queen's.
W. D. Hay, B.A., Queen's.	T. C. Smith, B.A., Queen's.
G. S. Johnson, B.A., McMaster.	D. A. Welsh, B.A., Toronto.
A. J. Madill, B.A., McMaster.

Without university degrees	18

*Killed at Vimy Ridge.

**Enlisted in the Naval Service.

A four weeks' course in Farm Mechanics, given for the first time in 1917, as a Summer Course, was attended by 10 students, all of whom received certificates:

G. A. Clark.	W. D. Hay, B.A., Queen's.
J. B. Dandeno, B.A., Queen's; A.M., Ph.D., Harv.	G. S. Johnson, B.A., McMaster.
Norman Davies, B.A., McMaster.	A. J. Madill, B.A., McMaster.
Isabel E. Dobbie.	P. M. Shorey, B.A., B.Sc., Queen's.
F. V. Elliott, B.A., Western.	W. B. Wyndham, B.A., Toronto.

The influence of the High School classes is now being felt in the farming community and reports come from all sides that such work is highly appreciated. The following letter, from a farmer who has two children taking the classes in the Oakville High School, represents something of the general appreciation:

PALERMO, Oct. 18th, 1917.

In answer to your question regarding the teaching of Agriculture in High Schools, I wish to say, briefly, that I consider it as one of the most important subjects that should be taught, especially in the smaller towns where there are a great number of scholars who have been brought up on the farms.

From personal observation I see the people who endeavour to enlighten themselves by reading up all the farm questions are the most successful farmers. If these subjects had been advanced say twenty years ago farming would be on a higher plane to-day.

On the other hand in the city schools where there is no possibility of five per cent. ever going on the farm, it seems to me it should not be enforced on the pupils.

JOHN DEARING.

Home projects are always useful and can be made very effective from an educational point of view. These projects assume a great variety of forms, but the commonest is the home garden. One project presented by Seto Hong, a Chinese student in attendance at the Ridgeway Continuation School, is here given:

1917 Home Garden

The area cultivated was about 1,500 square feet.

The cost is given in the following order:

1 Ploughing and harrowing	\$1.00
2 Tools	1.75
3 Seeds	1.95

Total cost and expense \$4.70

The time was estimated at the average of about one hour a day from the middle of April to the middle of September.

The articles raised were:

1. Potatoes.	5. Lettuce.	9. Peas.	13. Celery.
2. Sugar beets.	6. Onions.	10. Beans.	14. Cabbage.
3. Turnips.	7. Squash.	11. Pumpkins.	15. Cauliflower.
4. Carrots.	8. Corn.	12. Chinese peas.	16. Chinese cabbage.
17. Chinese greens of two kinds.			

The estimated value is as follows:

1. Potatoes, 3½ bus. at \$1.00...	\$3 50	11. Pumpkins, 2 at 30c.	60
2. Sugar beets, 100 lbs. at ½c. ..	50	12. Chinese peas, 3 pks. at 60c. ...	80
3. Turnips, 120 lbs. at 1c.	1 20	13. Celery, 200 at 2c.	4 00
4. Carrots, 150 lbs. at 2c.	3 00	14. Cabbage, 12 heads at 5c.	60
5. Lettuce	2 00	15. Cauliflower	25
6. Onions, 30 lbs. at 8c.	2 40	16. Chinese cabbage	2 00
7. Squash, 15 at 10c.	1 50	17. Chinese greens	3 00
8. Corn, 3 doz. at 20c.	60		
9. Peas, 1 pk. at 50c.	50	Total value	\$29 95
10. Beans, 5 pks. at 50c.	2 50		

The lessons learned were:

(1) That potato eyes cut from peelings will not give as good results as thicker pieces of potato do.

(2) That beans and corn will rot if planted in April.

(3) The greens, lettuce, and cabbage, etc., will grow to a larger head if not so crowded.

(4) That Cabbage-butterflies are great destroyers of cabbages and cauliflowers.

This project though, perhaps, of no great financial importance, shows how arithmetic, composition and commercial work bear upon the teaching of Agriculture. And who will say that the boy who completed this project did not obtain as much of real education as if he learned to translate a chapter of Cæsar?

The Employment of School Boys and Girls on the Farm

A large number of pupils took advantage of the regulation issued by the Department of Education respecting the exemption from a formal examination at the close of the school year, providing a successful course had been pursued up to April 20th, and providing a successful examination had been passed upon such course as arranged by the schools concerned. In some districts of the Province considerable use was made of this privilege, and no doubt greater production was stimulated thereby. Actual results are not easy to obtain showing specifically to what extent this proved beneficial, but a glance at the following table concerning one school—the Picton Collegiate Institute—will show how it was arranged and followed up:

Picton Collegiate Institute

I. Candidates volunteering for employment on farms, 1917

Class	No. of pupils	Average age	Accustomed to farm	Employment arranged	Positions away from home	Average date work commenced	For Nor. Entrance, Parts I and II	Nor. Entrance, Part II and Matric.	Normal Entrance, Part II	Faculty Entrance, Part II
Boys—										
Lower School.	36	15	31	30	13	June 10				
Middle School.	4	17.5	4	3	2	June 29				
Upper School..	2	16	2	2	June 29				
Girls—										
Lower School..	22	16	22	22	2	June 17				
Middle School.	5	17.2	2	3	2	June 29				

II. Candidates for certificates under circular 27

Boys	9	17.5	8	9	8	April 21	3	3	1	2
Girls	11	17	8	11	3	April 21	3	6	2	..

An examination of the foregoing list brings out the following: (1) Girls as well as boys have entered into this arrangement. (2) A large proportion of the classes undertook employment away from home. (3) Practically all who desired employment secured it before April 21st.

Agricultural Departments in High Schools

As has been shown in the list three schools—Whitby, Drayton and Oakville—have introduced Departments of Agriculture, and one of these—Whitby— has added a course in Farm Mechanics. In addition to these schools, two others are planning to commence the work on the Department arrangement in 1918. Where Departments have been introduced arrangements are being made to conduct short courses during the winter months. To these short courses will be admitted any persons who are likely to profit by such courses. It is intended that the whole staff of the High School will be available to give instruction on subjects other than those which may be considered strictly agricultural. The hours for attendance upon classes may be arranged entirely to suit the convenience of those concerned. From this it is apparent that such schools are undertaking a work in extending the advantages of the High School to the surrounding community.

Commercial Fertilizers

The study of commercial fertilizers in the Primary or Secondary Schools is of considerable importance as an economic problem, and it may be made educationally attractive if such study were correlated with Arithmetic and Elementary Chemistry. But, in many of the text books on Agriculture, the older chemical names are so persistently made use of that the ordinary High School student, and, in some cases, even the teachers, cannot recognize in terms of the High School chemistry, the technical language used in the agricultural texts.

The usual terms used in agricultural books and bulletins for the important constituents of commercial fertilizers are phosphoric acid, potash and nitrogen. The names phosphoric acid and potash are too indefinite to be of any use to a High School student; in fact they are quite erroneous and misleading. It would be a great improvement if the names of the essential elements concerned were used, for example, potassium for potash and phosphorus for phosphoric acid. The name nitrogen is correctly used.

The usual practice in agricultural books is to calculate the phosphorus in terms of the oxide of phosphorus and the potassium in terms of the oxide of potassium. The compounds from which these elements are obtained by plants in the soil are usually, though not always, acid phosphate or superphosphate of calcium, potassium chloride, and sodium nitrate.

What is meant by phosphoric acid is, as has just been said, phosphorus pentoxide (P_2O_5), which is not an acid at all. By potash is meant the oxide, (K_2O). When reckoning the composition of a fertilizer the amount of phosphoric acid (so-called) is really the amount of the pentoxide. In calculating the amount of potash, it is really the amount of the oxide. With respect to nitrogen the name is properly applied.

For example, suppose we assume a fertilizer having the advertised formula 2, 10, 8, meaning 2 per cent. of nitrogen, 10 per cent. of phosphorus pentoxide, and 8 per cent. of potassium oxide, though it would read in the terms of the agricultural texts, 2 per cent. of nitrogen, 10 per cent. phosphoric acid and 8 per cent. potash. To show how this works out assume the following atomic weights: $P=31$; $O=16$; $K=39$; $N=14$; $H=1$; $Ca=40$; $Na=23$; $Cl=35$.

The ordinary compounds from which phosphorus, potassium and nitrogen are obtained are: Acid phosphate, $CaHPO_4$; potassium chloride, KCl ; sodium nitrate, $NaNO_3$, respectively. The proportion of phosphorus in acid phosphate is $31 \div (40+1+31+64)$ or 22.8 per cent. In potassium chloride (muriate of potash) the proportion of potassium is $39 \div (39+35)$ or 52.7 per cent. In sodium nitrate the proportion of nitrogen is $14 \div (23+14+48)$ or 16.4 per cent. The proportion of phosphorus in the pentoxide is $62 \div (62+80)$ or 43.7 per cent. The proportion of potassium in potassium oxide is $78 \div (78+16)$ or 83 per cent. A fertilizer whose formula was 2, 10, 8, would, therefore, contain 2 per cent. of nitrogen, 10 per cent. of P_2O_5 , 8 per cent. of K_2O , and from this we calculate the proportions of the elements referred to as follows:

$2 \times \frac{100}{100}$	gives 2,	the percentage of nitrogen.
$10 \times \frac{43.7}{100}$	" 4.3,	" " " phosphorus.
$8 \times \frac{83}{100}$	" 6.64,	" " " potassium.

The 2, 10, 8, formula should read 2, 4.3, 6.4 for the elements nitrogen, phosphorus and potassium. Similarly a formula 2, 7, 8 should read 2, $7 \times \frac{43.7}{100}$, $8 \times \frac{83}{100}$ for the elements in the same order. Therefore, to convert values of phosphorus into values of phosphoric acid (so-called) multiply by 2.29, and to convert values of phosphoric acid into values of phosphorus multiply by .43. To convert values of

potassium into values of potash multiply by 1.2, and to convert values of potash into values of potassium multiply by .83.

In other words potassium is to potash as 78 is to 94, and phosphorus is to phosphoric acid (so-called) as 62 is to 142.

Supposing a farmer wishes to secure a fertilizer of the formula 2, 6, 4, and wishes to mix it himself. If he needs one ton of such mixture how much of each of acid calcium phosphate (Ca H PO_4), of potassium chloride, and nitrate of soda should he buy?

2 per cent. of 2,000 lbs.= 40 lbs.
6 per cent. of 2,000 lbs.=120 lbs.
4 per cent. of 2,000 lbs.= 80 lbs.

Since nitrogen is $\frac{14}{85}$ of the nitrate he must secure $\frac{85}{14} \times 40 = 243$ lbs., but 120 lbs. of phosphoric acid contains $120 \times .43 = 51.6$ of phosphorus, and 80 lbs. potash contains $80 \times .83 = 66.4$ lbs. potassium.

Therefore, since phosphorus is only 22.8 per cent. of the phosphate we must secure $\frac{100}{22.8} \times \frac{51.6}{1} = 227$ lbs. of phosphate and $\frac{100}{52.7} \times \frac{66.4}{1} = 126$ lbs. of potassium chloride.

Then the farmer must buy:

Nitrate of soda	243 lbs.
Acid calcium phosphate	227 lbs.
Muriate of potash	126 lbs.
	<hr/>
	596 lbs.

The remainder of the ton should be made up of filler which is often simply road dust.

The war situation is giving an extraordinary stimulus to the schools towards the end of greater production. And there is no group of more doughty warriors than the pupils, both boys and girls, of the rural schools. The great need is leadership, and the teachers are realizing as never before that there are other important duties, devolving upon them—duties not confined to the four walls of the school, nor yet within the covers of the text-books.

Two of the teachers of Agriculture in the High Schools have enlisted, and one of them, Mr. W. G. Butson, paid the utmost price with his life at Vimy Ridge; the other, Mr. C. S. Gulston, enlisted in the Royal Navy as wireless operator and is now on active service. Mr. Butson taught Agriculture in the Bowmanville High School, and Mr. Gulston in the Picton Collegiate Institute.

Normal Schools

All the Normal Schools were visited at least once during the school year and considerable progress was noted, especially in some of the schools, in rendering effective, with the means at their disposal, the teaching of Agriculture. As mentioned in my report in 1916, first-class work cannot be expected until greenhouses are provided. When the Normal Schools were built, no particular attention was given towards providing accommodation for classes in Agriculture, consequently the classroom is not all that could be desired. The class-rooms used for teaching Science are of some use for giving instruction in practical Agriculture, but they are not adequate. If greenhouses were provided, this condition would be much improved.

The scholastic theory, as to the close kinship between wisdom and learning took firm root in the long period when Latin was, to some extent, an official language. Scholastic influence thrived all through this long period when there were few books except those in Greek and Latin. To pore over such abstruse books was the hallmark of a great mind, and the more energy and zeal displayed in this direction, the more authors read, the greater the reputation for wisdom. For, though learning

wise words and repeating wise words may be mistaken for wisdom, the two things are quite distinct as time has already shown.

The aim of education is to produce thought and reflection and to improve the thinking faculty. The effect of much reading is a tendency to prompt a man to try and remember what has been said, and to accept an authority, and to be annoyed with those who presume to have an opinion without having read the authorities.

It has not been difficult in the past, when money was needed to endow a school for language, a Chair of Greek History or a Department of Astronomy, to secure liberal financial aid for the purpose. What real good these do the people it is not easy to see. A greenhouse for a Normal School is a different matter. It is of some use.

Our methods are not yet sufficiently practical. We expect too much book work, too much writing. This may be illustrated by a quotation from Viscount Harborton:

I was quite horrified to hear of a soldier "plucked" in an examination in which he had been asked to explain on paper how to clean an ordinary magazine rifle. He asked to have a rifle brought him, and, on this being negatived, he refused to answer the question. What, he argued, could be more stupid than to ask a man to explain how to clean a rifle without putting a rifle into his hands so that he could show how to clean it? His view is sound. The literary man is the opposite.

Those in charge of the classes in Agriculture should aim, as far as possible, to provide material with which the students should work. Laboratory work is essential.

The Normal Schools will be able to do much better work in teaching Agriculture when the students have had, in the High Schools, a course of practical work, and when greenhouses will have been installed.

Three of the teachers, Mr. McMillan, Hamilton, Mr. Ricker, North Bay, and Mr. Miller, Ottawa, hold Intermediate certificates in Agriculture.

In order to make the teaching of Agriculture effective it will always be necessary to maintain a strong course in the Normal Schools. The Normal Model Schools in Toronto and Ottawa are making a praiseworthy effort to co-operate, and it is to be hoped that in a short time regular instruction will be given in Agriculture and in School Garden work, to the Normal Model classes by teachers who have had training in Agriculture.

That the movement is being understood and appreciated is manifested in the following statement:

TORONTO, November 28th, 1917.

The members of the staff of the Toronto Normal Model School are agreed that as an educational factor the school garden for the year 1917 was a very decided success. A much larger area than formerly was under cultivation and every class in the school was given an opportunity to do something in the garden. The class plot and the individual plot were both used, and both proved quite satisfactory. Care was taken to correlate the work with other subjects of the course. The results of the effort were seen in the increased interest on the part of the pupils in the home gardens and in their success in making gardens where there had been none before. The children with every evidence of pride and delight took home their produce, which, in most cases, was excellent in quality and abundant in quantity. The garden proved a great source of interest and instruction to the passers-by, many of whom followed the work throughout the season. Pupils and teachers are looking forward with pleasure to the next season when increased effort will be made to utilize every educational possibility which the garden presents.

M. A. SORSOLIEL,
Acting Headmaster.

The schools affiliated with the Normal Schools are given in the following list. These schools have all made a good start and it is hoped that efforts for advancement of such schools may be fostered and encouraged in every possible way. It is also hoped that some of these schools may, in the near future, become centres of consolidation.

Schools Affiliated					Teacher of Affiliated School

Toronto	223 55	44 85

Summer Courses in Agriculture for Teachers

By an arrangement made between the Departments of Education and Agriculture, courses of study are provided at the Ontario Agricultural College for teachers who expect to teach Agriculture in either Primary or Secondary Schools. The course of study for teachers of Primary Schools is divided into two parts, each of five weeks duration, and taken in two consecutive summers. On the successful completion of these two parts a certificate in Agriculture is awarded. The chief aim of these short courses, which commence about July 3rd, is to prepare teachers to give instruction in Elementary Agriculture and Horticulture in the schools of Ontario.

The course of study provided for teachers of Secondary Schools is similarly arranged and divided, and runs concurrently with that of the course for teachers of Primary Schools.

A course in Farm Mechanics, open to teachers holding Intermediate certificates in Agriculture was given, commencing immediately at the close of the usual summer session. This course covered four weeks and comprised studies in forge work, wood work and cement work, including, also, repairs of harness, ropes, etc. The aim in this course is to provide practical exercises especially applicable to farm life.

Ten students took this course, a list of whom is given under "Training of Teachers," page 81.

The number in attendance, as compared with previous years, is given in the following summary:

Year	Elementary				Intermediate				Total
	Part I		Part II		Part I		Part II		
	Men	Women	Men	Women	Men	Women	Men	Women	
1911..	8	75	1	16	100
1912..	16	65	2	23	106
1913..	14	64	5	36	*23	4	146
1914..	8	55	5	27	13	4	14	126
1915..	15	39	5	18	17	1	9	1	105
1916..	11	99	9	31	15	3	14	1	183
1917..	15	138	7	81	9	1	13	2	266

*Seven of these were teachers from the Normal Schools.

During the term a course of ten lectures was given by Mr. H. Foght, specialist in rural Education of the Bureau of Education, Washington, on the following subjects:

1. The Rural Problem Analyzed in Relation to its Educational, Social, and Religious Elements.
2. Institutional Means for Remaking Rural Life.
3. The Farmer's Wife, a Vital Factor in the Problem.
4. The Teacher and Community Leadership.
5. The Complete Rural Community School (illustrated).
6. Good Roads and Education (illustrated).
7. What Every Teacher Can Do for the Advancement of Vocational Education (illustrated).
8. The Teacher and the Play-Life of the School (illustrated).
9. The Meaning of Modern Sanitation in School and Home (illustrated).
10. The Revitalized Course of Study for Rural Schools.

These lectures formed a part of the courses for all teachers.

The activities outside of the regular classes consisted in instruction and practice in games and sports suitable for schools. A pageant was given one Saturday afternoon representing "The Call of the Country." Regular instruction in swimming was provided for women students in the swimming tank of the College gymnasium with pronounced success. Upwards of seventy of the teachers learned to swim to the extent that at least a dozen strokes as a minimum was accomplished.

The School garden forms an important part of the first year's work. The Macdonald Consolidated School gardens are available for class purposes through an arrangement made with the Board of Trustees and the Horticultural Department of the College. This garden illustrates what may be done in the way of crop production as there was in 1917 an immense crop of vegetables of various kinds.

Practically all of the teachers in attendance roomed and boarded at the College. This arrangement gave opportunity for participation in games and sports, and a chance for mutual acquaintance among the teachers. Two Saturday excursions were provided, one to the "Rocks" of Elora and the other to the "Pot Holes" of Rockwood.

At the close of the Summer Courses at the College, a considerable number of the teachers made arrangements to assist in harvesting the crop of small fruits, some in Norfolk County, and others in the Grimsby district. It is very gratifying, indeed, to note that these teachers gave up all their vacation in the interests of agriculture and crop production. Some teachers made a hurried trip to their schools to supervise their school garden plots before engaging in the harvesting of the fruit crop.

APPENDIX F

PUBLIC LIBRARIES, LITERARY AND SCIENTIFIC INSTITUTIONS, ETC.

REPORT OF THE INSPECTOR OF PUBLIC LIBRARIES

TO THE HONOURABLE R. A. PYNE, M.D., LL.D., M.P.P.,

Minister of Education for Ontario.

SIR,—I have the honour to submit the following report of the work of your Public Libraries Branch for 1917, and the statistics, etc., of the Public Libraries of the Province for 1916; also a statement of the grants paid in 1917 to Public Libraries, and to Historical, Literary and Scientific Societies.

The outstanding features of the year, apart from routine, were briefly as follows:—

1. The chief matters that concerned the Branch were two: Promoting a better standard of book-selection, and encouraging a higher standard of librarianship.

2. Librarians report an increasing public demand for books, notably in the classes Sociology, History, Religion, and Travel.

The circulation of public library books has increased 40 per cent. since the last year before the war.

3. Nine more *free* public libraries are on the register than appeared last year.

4. Four hundred and one public libraries are on the list; there were 395 a year ago.

5. Appreciable progress was made toward improving the quality of public library book-selection. *The Ontario Library Review*, the institutes, and criticism of purchases as revealed by the invoices that accompanied annual reports, each contributed its share toward encouraging a higher standard of selection.

6. A Departmental Training School for Librarianship was held under the direction of the Inspector of Public Libraries. The course covered a period of two months instead of the usual one month.

7. The Library Institutes were directed entirely by the Inspector. Fewer and larger meetings were held as compared with former years. Prominent places with good railroad connections were chosen as places of meeting. The attendance was much larger than usual, and the institutes as agencies for promoting the interest of public libraries were of more practical value than formerly.

8. A ten per cent. increase is shown in the circulation of travelling libraries.

9. Several library boards wishing to establish their libraries on a higher standard were advised.

10. Seven requests were received from libraries asking for advice and recommendations on the appointment of librarians and assistants.

11. A large amount of correspondence was received asking for professional advice on matters pertaining to librarianship.

The 1916 annual reports from which the accompanying tables were taken reveal the following:—

1. An increase of nineteen per cent. in the expenditure of the libraries in 1916 as compared with 1915.

2. The association libraries show an increased expenditure for the first time in many years.

3. An increase in circulation of about 200,000 volumes over 1915.

4. The duplicate invoices received with the reports show that there was an improvement in the quality of books purchased as compared with previous years.

5. The average library circulation was 3.34 books per capita of the population with library service, and slightly more than two books for every man, woman and child in the Province.

6. One million five hundred and thirty-three thousand one hundred and thirty-eight persons in Ontario have public library privileges, and one million have not.

It is a matter of congratulation that the libraries of the Province have progressed appreciably during the last year notwithstanding the caution that their duty constrained them to exercise in expenditure on account of war-time conditions. There is a small number of libraries doing first-class work, a slightly larger number, good work, and the great majority only fair work; a considerable amount of systematic effort will be required to bring the libraries as a whole to a reasonably high standard.

Your Inspector has done everything within his power to follow the request of the Deputy Minister that only the most immediately urgent expenses be incurred. The internal work of the office has been attended to with promptness, and the grants to libraries have been paid without unnecessary delay.

Book Selection

The right kind of books being a necessary condition for successful library service, your Public Libraries Branch has been making special efforts to encourage and influence the libraries to improve in their work of book-selection. Your Inspector examined the records of books purchased by all of the public libraries of the Province with the exception of Toronto, Ottawa, Hamilton, and London, for the purpose of discovering the merits of the book-selection of 1916. Excluding the twenty-one libraries represented in the four cities mentioned the work of the libraries was marked as follows: Two, *first-class*; 32, *good*; 95, *fairly good*; 158, *fair*; 24, *poor*; 63 purchased no books at all. This record shows a slight improvement over 1915. These facts will give some idea of the problem that is being worked upon.

The subject of book-selection was dealt with at the institutes in 1916 and 1917 by your Inspector where principles and methods were discussed; this will be repeated at institutes as often as it is found worth while; the *Ontario Library Review* will assist materially in improving book-selection, and criticisms of 1917 selections will be sent with suggestions to the libraries that should benefit by such assistance.

Educational and persuasive means will be used to the best advantage, but there are so many libraries whose work shows that there is no systematic effort made to select wisely that, in all probability, regulations will be required to ensure a better standard.

Professional Training in Librarianship

The Department advanced the cause of professional training in authorizing the establishment of a short course training school for librarianship that covered a period of two months. After the experience with the excellent one-month school

of 1916, your Inspector of Public Libraries reported that the course was too short and of real value only to those who had had experience under the most favourable conditions. The students of 1916, with but two or three exceptions, were experienced; the instruction given was of the very best character; the students did excellent work but found the course too strenuous, it having kept them at close work every day and every evening and allowed very little time for practice work.

Your Inspector's recommendation made a year ago was that a three months' school should be organized, the first month to provide a course complete in itself, and the next two months to serve students who could find it convenient to take the extended course. After consultation with the instructors, a few of the librarians that were likely to send students, and then with the Department, a single course of two months was decided upon.

The school was held from September 10th to November 10th. The results were very satisfactory although the time was still very short. Three months would be a suitable period for a short course, but the cost for students to remain in Toronto for that time would prevent many librarians and assistants from attending. Until more liberal salaries are paid by public libraries, two months will be as much time as can be given to a short course with reasonable prospects of securing a good attendance.

The Toronto Public Library Board and the Chief Librarian furnished the Department with accommodation for holding the school in their Dovercourt branch; they allowed several departments of their library system to be used for practising purposes, and permitted members of their staff to act as instructors. The chiefs of departments and of branch libraries in the Toronto system did everything within their power to promote the best interests of the school.

The principal subjects taught were: Book-selection, Cataloguing, Classification, Children's Work, Reference Work, and Circulating Work. Other subjects upon which a few lectures were given were: Administration, Community Welfare, Modern Literature, Shelf-listing and Accession Work, and Simple Routine. Special lectures were given on the following: The Evolution of Modern Prose Literature, The History of the Book, The Modern Newspaper, The Dominion Government and Its Publications, The Modern Drama and Modern Poetry, Problems of the Medium Sized Library, Library Associations, and Library Legislation.

Certificates, graded "A," "B," and "C," were granted to all who qualified on the written examinations and practice work.

The school was directed by your Inspector of Public Libraries, who gave the instruction in Book-selection, Reference Work, Bibliography, and Administration. The duties of assistant-in-charge were performed by Miss A. P. Dingman, (Stratford), of the Cleveland Public Library and formerly of the Yale University Library. Miss Dingman gave the lectures on Community Welfare, in Book-reviewing, and held round tables on Modern Literature. Miss Winifred Barnstead of the Toronto Public Library was the instructor in Cataloguing, which received more time than was given to any other subject. Cataloguing is a technical branch of the work that is difficult either to teach or learn; Miss Barnstead's work was especially commendable. Classification was dealt with by Miss Gertrude Boyle of the Toronto staff; her lectures and instruction in practical work were of the highest order. Miss Lillian H. Smith, supervisor of children's work for the Toronto system, was the instructor in Children's Work; this work was given more prominence than is usual in short courses; four of the 1917 students were preparing especially for this branch of the work. Miss Smith's instruction was excellent and inspired enthusi-

asm for children's work. Miss Eva Davis of the College Street branch gave five lectures on Circulating Work and organized the practice work for that part of the course. The reference practice work was conducted by Miss Frances Staton and Miss Elizabeth Moir of the Toronto reference library. The special lecturers and their subjects were: Mr. George H. Locke, chief librarian, Toronto, two lectures on The Object and Purpose of the Public Library and five on The Evolution of Modern Prose Literature; Mr. J. Davis Barnett, Stratford, The History of the Printed Book; Mr. Fred. Landon, London, The Modern Newspaper and The Dominion Government and Its Publications; Miss M. J. L. Black, Fort William, The Medium-sized Library; Dr. E. A. Hardy, Toronto, Library Associations and Library Literature; Mr. W. J. Sykes, Ottawa, Modern Drama and Modern Poetry; Mr. S. B. Herbert, Assistant Inspector of Public Libraries, Library Legislation.

The extra month allowed more time for lectures than was possible with the former school, and a very considerable amount of extra time was used for supervised practice work; the latter contributed tremendously to the value of the course.

Twenty-seven students were in attendance; six were graduates of universities and, with but three exceptions, the remainder had junior matriculation standing, many of them having extended their education through private study. All of the students had either a library position or good prospects of securing one after successful completion of the course. We were pleased to welcome as students an assistant from the Vancouver Public Library, and three librarians of special libraries: at the Trades and Labour Branch of the Ontario Government, the Methodist National Training School, and the Canadian Manufacturers' Association. Four of the librarians of Toronto Public Library branches attended, as did also one experienced assistant and a few recent appointees.

The course being short is not adapted for training inexperienced persons for important library positions. Its greatest value is in providing instruction for librarians and assistants who have had experience under favourable conditions; such persons are to some extent familiar with modern library work and are able to attain, through several weeks' instruction, a knowledge of modern librarianship which, with their experience, should qualify them as trained librarians; they should be equal and probably superior to persons of the same type who have taken a long term course after little or no previous experience. A course of two months is of considerable value to a person just before engaging in practical library work; practice immediately following the course impresses the instruction and offers opportunity for making a more extensive and intensive study of librarianship. The short course is of little use to one wishing to use it as a means of securing a position; to such a one it is practically useless if not followed by practical application within a short time after the completion of the course.

During 1917 seven requests from library boards were received by your Inspector asking for advice and recommendations in regard to appointments of librarians and assistants. In five cases the positions were filled satisfactorily, one by a fully qualified librarian resigning from an important position to take a more important one that carried with it an attractive salary; one, a librarianship, by an assistant in another city, who, by terms of appointment attended the Departmental school, and three others who were students of the 1917 school were appointed by boards after having been advised by your Inspector to appoint assistants with certain educational qualifications on the understanding that they practise in their local libraries for a short time and then attend the Departmental school. The two other positions have not yet been filled. The salaries offered are too large for un-

trained persons and a trifle too small for highly trained assistants. Your Inspector has been unable to secure suitable assistants from less important positions in other libraries, which fact shows that the standard of efficiency is low throughout the smaller libraries and among those who are on small salaries. The several who are capable of filling the positions mentioned are situated quite as favourably at present or the salaries offered are not sufficiently above what they receive now to attract them from home.

Positions for fully trained librarians are available so seldom in Ontario that the Department is not justified in establishing a long course school for some time yet, nor is it wise to recommend persons to take a course outside the Province in the hope of securing suitable positions in Ontario public libraries. An Ontario library board rarely, if ever, appoints a librarian or assistant from outside its municipality except when some one with special qualifications is wanted.

The 175 *free* public libraries of the Province employ about 360 librarians and assistants. The salaries that the small libraries are able to pay are not high enough to demand trained people. Sixty-five of the 175 free libraries (under *present* conditions) require and *can* pay not fewer than 164 librarians and assistants who have a certain amount of professional training. Fifty-seven of the 164 should be persons with first-class qualifications. There are only 5 in our public libraries who receive \$2,000 a year or more; 20 receive \$1,000 or more and less than \$1,500; 65 are paid from \$700 to \$1,000; 74 who should be trained to the extent of our short course at least receive less than \$700. With these facts in view it is apparent that opportunities for obtaining attractive positions are not numerous. It is apparent also that there are several library boards that should pay better salaries and send their librarians and assistants to the Departmental school. The kind of course given in 1917 will serve our purpose for a while. A longer one can be considered when better salaries are paid, and regulations and further education of library trustees impress the importance of efficient professional service on our library boards.

District Library Institutes

The success of the 1917 institutes was highly satisfactory. The nine larger institutes were a decided improvement over the fifteen smaller ones held formerly. Prominent places with good railroad service were chosen as institute centres. Each place of meeting was an attractive place to visit, and scores of delegates from small libraries expressed their approval of the centres chosen. While an institute in a small town is of some slight benefit to the local library, it has not the drawing power required to bring out a large attendance. The principle followed this year proved itself to be the greatest good to the greatest number.

The 1917 institutes were the first to be entirely under the direction of the Public Libraries Branch. It was a distinct advantage to the libraries and to the Department. The Inspector is in continuous touch with the libraries and is in the best position to understand conditions and, therefore, the kind of instruction that is most suitable. The Department is vitally interested in the attendance at institutes and it is highly desirable that communication with the libraries be as direct as possible. The Ontario Library Association has done splendid institute work in the past for which it deserves great credit. The appreciation of the Minister has been conveyed through the *Ontario Library Review* to the libraries for the admirable spirit with which they entered into the new arrangement, and to the several librarians and trustees who delivered addresses.

The programmes were arranged to meet certain definite ends and were designed in the light of conditions as they actually exist. In 1916 your Inspector dealt exhaustively with book-selection; early in 1917 an examination was made of the duplicate invoices that were submitted with the annual reports of the libraries; this examination was made in order to discover whether the institutes had had any beneficial effect on the book-selection of the year. A number of libraries showed an improvement in the quality of books selected in the latter part of the year and a large number did not. Some of the meetings were held late in the year and none before July, which gave little opportunity during 1916 for the application of the instruction. In 1917 book-selection was given one hour on the programme. At each institute the 1916 selections of the libraries represented were used as a basis of discussion. Although a small minority did excellent work, the majority of the libraries failed to follow approved methods, their selections were not well proportioned, and there was little evidence of systematic work in selection. The several errors of omission and commission were discussed thoroughly and, from all appearance, the delegates found the treatment of the subject instructive. The work of the two years institutes on this fundamental subject should bear fruit. It is the intention of the Branch to impress the importance of book-selection at succeeding institutes.

Another subject that received considerable attention this year was Library Service. The subject was treated under the following topics: Service the object of a library's existence; Good service must precede public recognition; Adequate provision to meet a problem; The book collection and keeping it vitalized; The librarian; The board; Methods; The library rooms; Hours of service; Means of promoting better reading; Publicity.

The small library problem was the third subject on the programmes.

Evening sessions were held at all institutes. The programmes in all cases were of popular interest, of an educational character and chiefly on subjects pertaining to Canada and the Empire. Application was always made to the part that the library should play in developing the best British and Canadian ideals.

Instruction in Modern Methods

More intensive work was done in this department of the work than was practised formerly. Fewer than the customary number of places were visited by Miss Spereman, but she remained for longer periods than usual. Where prospects seemed to warrant it, arrangements for from one to two months of Miss Spereman's services were made. There are no applications on file for instruction in cataloguing and classifying as none is accepted until an arrangement is made by the library (1) to purchase the necessary supplies and equipment for the work, and (2) that the methods taught and demonstrated will be learned by a librarian or trustee who will complete the classifying and cataloguing of the library and finish the installation of any other methods introduced.

The services of a travelling instructor in modern technical methods are of real value in a very limited field. All municipalities with populations of 4,000 having librarians who are unacquainted with modern methods should send them to the Departmental school. If any of them have not the ability to take such a course, they are not likely to succeed in learning modern methods from a travelling instructor. Smaller libraries that are fortunate enough to have librarians capable

of taking the instruction and who will follow it, complete the work in their libraries, and continue it on all new additions of books are the class of libraries where the instructor can do the most good. The policy that your Inspector is following is to send Miss Spereman to libraries where some definite good can be accomplished and no time is allowed for work that will not accomplish satisfactory results.

Travelling Libraries

The records show an increase in the circulation of travelling libraries of ten per cent. over the year 1916, which showed an increase of fifty per cent. over 1915. One thousand five hundred new books were purchased; the expenditure was limited to half the amount provided in the estimates on account of war conditions. Prompt attention was paid to all applications, the average request having been filled in two days after its receipt. This department of the work can not be advanced further owing to the want of sufficient accommodation for the books and for work connected with selection and shipping.

One million of the people of Ontario are without public library privileges. Many of them live in communities where it is impracticable to organize a public library, and travelling libraries are the only means of providing them with library service. This work is worthy of greater encouragement than it is receiving.

Library Incomes and the Public Library Act

The change that has taken place in economic conditions and the increased demands that have been developed for public library service, call for better incomes from practically all of our public libraries than that provided in the Public Libraries Act. A change is not asked for at present owing to the extraordinary times in which we are living, but an important revision is required, and should be made as soon as times are favourable for such revision.

For many years, and probably always, complaints have been made against increasing taxation. Taxes have been increasing for a great many years and, apart from the extraordinary demands of to-day, public taxation will continue to increase to some extent for many years. Changes in the social order call for more public benefits. If we examine what is provided by public expenditure beside the public benefits of thirty years ago, we will find many things provided in a public way at the present time that were either provided privately or not at all at that time, and our institutions established for the public weal render much greater and better service than formerly. The people get more value for their taxes than they do for any other money that they pay out. It would be a source of comfort for every taxpayer to enumerate what he gets for his taxes. The man with the small income or even with an average assessment is not affected to any appreciable extent by a slight increase in his tax-rate, except that he receives a benefit that he could not purchase in a private way for a much larger sum than he pays in his tax bill. The working man is not the one who complains most about the slight increase in his tax-rate. It is the large property owner, and the point of view when considering public taxation might well be that of the average tax-payer.

Everything has been affected by the decreasing value of the dollar, therefore it is not surprising that tax-rates are higher than they were when a dollar was worth twice what it is to-day.

Notwithstanding the change in economic conditions, public library expense has been in no way responsible for the increase in tax-rates. Your Inspector is familiar with the affairs of several municipalities where the public library board is the only board that has not increased its rate in the last twenty years. Library boards have the reputation of being economical. The charge of extravagance cannot be laid at their doors. If every municipal spending board had governed itself in the same fashion as public library boards have done, tax-rates would not have been increased during the last ten years.

An adequate rate for public library maintenance is so very small that the extremely small fraction that libraries require in addition to their present rate would count very little to the public as far as expense is concerned, and would mean a great deal to the public library, and, in turn, would mean more and better service for the public. There is scarcely a municipality in the Province that does not waste over and over again a sufficient sum to make the difference between an adequate and an inadequate library income. Councils and boards will expend fractions of mills and whole mills for objects no more worthy than the public library; why should the people be starved for library service for the sake of "saving" an inappreciable small sum? A public library can furnish more happiness for the fraction of a mill than any other public body can do for the same amount. No one can estimate the value that a library is to a community as a source of development of the rights of its men and women, and boys and girls.

There has been an increase of 300 per cent. in the demand for library service in the last eight years. This, with the increased cost of things, has helped to make it impossible to supply the expressed demand, not to speak of the demand that is unexpressed.

Nearly all of our public libraries that have buildings received them as gifts. If it were not for this, they would be compelled to carry on their work on a much smaller scale; their libraries would not be creditable to the people of this great Province.

The public library rate was fixed many years ago at a time when the problem and the possible demand for library service were unknown. It worked well enough for the experimental stage, and when the demands for library service were slight. The rate is fixed at a fraction of a mill on the dollar. Libraries serve people, not property, but for practical purposes the limit can only be placed according to a rate on assessment. The per capita assessments of our municipalities vary to the extent of 400 per cent. Experience proves that at the present time the average municipality with less than 100,000 population requires an assessment of at least \$700 per capita to enable it to raise a sufficient sum for *ordinary* expenditure.

From thirty-five to forty cents for every man, woman and child in a municipality is required for *ordinary* expenditure for a good quality of service and a standard demand. Some places, Dundas and Leamington, for example, should have more than that. Their patronage at the present time is six to seven books per person. Good books and good service with this demand would require a per capita tax of from forty-five to sixty cents. The amounts quoted make no provision for extraordinary expenditures and assume that the library has no building to pay for.

The present Act allows a one-half mill rate for cities of less than 100,000 and one-quarter mill for those with more than that population. Councils may, by a two-thirds vote, levy a three-quarter mill rate on places with less than 100,000, but

no obligation can be assumed by the public library board that will require three-quarters of a mill per year, as its council may not give the three-quarter mill rate a second time. The present rates are inadequate for ordinary expenditure, and therefore allow nothing for extraordinary expenditure.

Collingwood, for example, has a per capita assessment of \$444.00. One-half mill would amount to twenty-two cents per capita. The library board there has tried to give good service, and has been unable to do it on one-half mill. Fortunately for the board their influence has been sufficient to secure for the library three-quarters of a mill for the last several years, and they find that the full three-quarter mill is required, but one-third of the income may be cut off at any time, as the Act guarantees one-half mill only.

Our villages cannot maintain satisfactory libraries. Ailsa Craig, for instance, can raise only fifteen cents per capita, and its total income derived from taxation cannot exceed \$88.00. Several of our small towns are not permitted to raise sufficient money to keep their pledges with the Carnegie Corporation with whom they have agreed to expend annually ten per cent. of the amount of the gift for a building. Ten per cent. is the irreducible minimum for which any library can be maintained. The small places are the most seriously affected.

The one-quarter mill rate was fixed for cities with more than 100,000 inhabitants. At the time the Act was passed, Toronto was the only city that had more than 100,000 population. The next largest city had 65,000, and the one-quarter mill was to be exclusive of charges on debentures for land and building. Ottawa and Hamilton have now more than 100,000. Ottawa is entitled to the one-quarter mill, which yields twenty-five cents per head, or, at least, ten cents less than it requires. The one-quarter mill allows Hamilton only nineteen cents, whereas two or three years ago when it had less than 100,000 it had thirty-five cents.

If a library's income is below thirty-five cents per capita, either the patronage is below what it should be, or the quality of service is not good, or, which is more probable, the demand and the service are below a reasonable standard.

The librarian and the books, the two most important factors, are the first to suffer from a small income. Other expenses must be met, and are to a great extent uncontrollable. An insufficient number of books in the yearly purchase and poor service are the results of inadequate incomes, and the patronage of a library finds the level that the books and service set for it. Unfortunately, two important branches of library service feel the effects of inadequate fund before any others. I refer to the Reference department and the Children's department.

With a higher rate boards will be free to provide adequate service, but they will not be obliged to expend all that the law will allow. Many of them are not doing that now.

The following table will show certain facts concerning 26 free libraries. Only two of them can claim the necessary 35 cents per capita. A glance at the table will show that the smaller places are not assured of adequate incomes, and that cities with slightly more than 100,000 residents cannot meet their problems. No special method was used in the selection of the places cited; municipalities with population from 586 to 473,000 were chosen without any effect to discover as to whether they were the best to support the argument advanced. Toronto, Hamilton and Ottawa have been worked out on the basis of one-quarter mill, and the other places at one-half mill. the respective rates allowed by the Act as demandable rates.

Place	Population	Assessment 1916	Assessment per capita	Maximum de- mandable In- come from taxation	Cents per capita

Acknowledgments of Assistance

I wish to express my appreciation for the interest shown in the work of the Branch by Mr. George H. Locke, Chief Librarian, Toronto. Mr. Locke attended five of the institutes outside Toronto and gave addresses at the evening sessions and assisted in the discussions in the afternoons. He secured the rooms in the Dovercourt branch for the training school, gave his approval for members of his staff to act as instructors at the school, and delivered several lectures to the students. Many courtesies have been extended to your Inspector by Mr. Locke, all of which were in the interest of the libraries of the Province.

My thanks are due to the following for institute addresses: Mr. J. Davis Barnett, Stratford; Dr. E. A. Hardy, Toronto; Mr. Fred. Landon, London; Dr. McClinton, Elmvale; Miss Mary Duncan, Don; Miss Florence Edwards, Manilla; Miss Edna Reynolds, Solina; Mr. W. J. Sykes, Ottawa; Mayor Byam, New Liskeard; Miss M. J. L. Black, Fort William; His Lordship Bishop Roper, Ottawa.

The following very kindly contributed papers for the *Ontario Library Review*: Dr. A. O. Jeffery, London; Miss Janet Carnochan, Niagara; Miss Mary Duncan, Don; Miss Lillian H. Smith, Toronto; Mr. Andrew Braid, Windsor; Mr. Fred. Landon, London; Dr. E. A. Hardy, Toronto; Mr. George H. Locke, Toronto.

Valuable service was performed by Miss Elizabeth Stover, Travelling Secretary of the Society of Friends. One phase of her work is to promote an interest in community welfare in districts where Friends reside. Miss Stover reported regarding conditions in a few places where there are closed libraries and urged other communities to take a more active interest in their local libraries. She advised your Inspector that prospects were favourable for the reorganization of one of the closed libraries; the facts were given to the Assistant Inspector, who visited the place, with

the result that the library was reopened and established on a satisfactory basis. Miss Stover was also instrumental in having three travelling library stations established in the vicinity of Newmarket, each of them to be carried on by young people as a service to its community.

The Staff

The members of the staff have been faithful to their duties and loyal to the interests of the Department and the libraries of the Province.

Special Libraries and Library Associations

The Ontario Library Association.—A grant of \$400 was paid to this association. The annual meeting was held in April, 1917. The attendance was large and the conference proved profitable to the libraries represented. Leading members assisted the Public Libraries Branch in many ways during the year.

Canadian Free Library for the Blind.—The librarian, Mr. S. C. Swift, gives the following synopsis of the annual report of the library:

"Negotiations were completed in March for the purchase, by the Library, from the Toronto General Trust Corporation, of the buildings at 142 College Street. The purchase price was \$6,000. An initial payment of \$250 was made in December, 1916, while \$4,750 was paid in 1917. Circulation of books ceased for three months, owing to the necessity of renovating our new quarters. These last were largely furnished and redecorated by the Canadian Women's Association for the Welfare of the Blind, organized in February to assist the Library.

"An embossing outfit was ordered for the purpose of producing Braille works. A transcription department was organized to assist the regular press by copying works from ink into Braille. A number of sighted ladies have been taught Braille by S. C. Swift, Secretary-General of the Library, and are now busily engaged transcribing. Ladies of the Association mentioned above are now furnishing work to a number of blind women; and they also give monthly sociables to some blind women at the Library.

"The total circulation for 1917 was 6,738, which is 2,702 less than 1916, due to the three months' stoppage of circulation referred to above. There were 728 volumes added, with a total value of \$497.05. Forty-three new members were added during the year, bringing the total membership of the library up to 517 on December 31st, 1917."

Reading Camp Association.—Mr. Alfred Fitzpatrick, Superintendent, reports as follows:—

"The Reading Camp Association begs to report that during 1917 it has been able to send only twenty-nine instructors to camp, twelve of whom have worked in Ontario. Of these, five enlisted during the autumn; five others are exempted until spring. During the year four of our men already overseas have fallen.

"The Association's watchword is 'Citizenship,' consequently we cannot accept as instructor any man able to serve in the ranks. Our work is therefore hampered in the matter of instructors. We have, however, during the last few months been endeavouring to clear up the finances of the Association, and will have succeeded in doing so on receipt of the Ontario Government grant in May.

"Further, the Superintendent of the Association has compiled a text-book for foreigners in Canada. This book, which is now in the hands of the publisher, consists of a phonetic primer, a reader, a simple course in civics (written in monosyllables as far as possible), a simple history written in biography, a geography, and a vocabulary in seven languages.

"The Association supplies forty camps with the following current magazines: *British Review of Reviews*, *Canadian Magazine*, *Canada Weekly*, *Canadian Courier*, *MacLean's*, *Saturday Evening Post*, *War Journal*, illustrated. We send also to each camp the daily paper.

"The Association has for the past few months been investigating conditions in camps with a view to engaging women instructors. The result is that we are appealing to the Provincial Board of Health to have laws for sanitation in camps enforced. We feel that the time has come when this question of educating the foreigner and inducing him to become naturalized is such a burning one that an Association such as ours is no longer able to carry on the work with our limited means. We are, therefore, about to approach the Department of Education with a request that the Government take over the work and establish night schools in camps."

Statistics

I present herewith a statement of the statistics of the Public Libraries of the Province and a statement of the grants paid to Historical, Literary, and Scientific Institutions.

I have the honour to be, Sir,

Your obedient servant,

W. O. CARSON,

Inspector of Public Libraries.

Toronto, February, 1918.

Libraries with Reading rooms are marked "R."

Population given is that furnished by the libraries, except where error was discovered.

NOTES FROM PUBLIC LIBRARIES REGISTER.

Nine libraries were added to the list of Free Libraries; the following seven were formerly association libraries: Cayuga, Norwich, Port Rowan, Springfield, Sudbury, Tavistock, and Teeswater; two—High Park branch, Toronto, and Hamilton branch—were registered as new libraries.

Four Association Libraries were reorganized: Cookstown, Dundalk, Inglewood, and Sparta.

GRANTS TO HISTORICAL, LITERARY AND SCIENTIFIC INSTITUTIONS

The following Historical, Literary and Scientific Institutions, etc., duly reported according to the requirements of the Act, and received the undermentioned grants during the fiscal year ended October 31st, 1917:

Name of Institution.	Grant Paid
	\$ c.
Brant Historical Society	100 00
Elgin Historical and Scientific Association	100 00
Essex Historical Society	100 00
Huron Institute	100 00
Kent Historical Society	100 00

Increase for the year	65	
Amount expended for teachers' salaries		\$535,661
Amount expended for school houses (sites and buildings)		\$395,289
Amount expended for all other purposes		\$312,379
Total amount expended on R. C. Separate Schools		\$1,243,329
Increase for the year	\$59,482	
Cost per pupil (enrolled attendance)		\$17.95
Increase for the year41	

c. Protestant Separate Schools

Number of Protestant Separate Schools (included with Public Schools, <i>a</i>) in 1916		5
Number of enrolled pupils		415
Decrease for the year	8	
Average daily attendance of pupils		279
Decrease for the year	11	

d. Kindergartens

Number of Kindergartens in 1916		222
Decrease for the year.....	6	
Number of pupils enrolled		17,450
Decrease for the year	1,280	
Average daily attendance of pupils		9,966
Decrease for the year	662	
Number of teachers engaged		371
Decrease for the year	25	

e. Night Public Schools

Number of Night Schools in 1916-1917		17
Decrease for the year	13	
Number of pupils enrolled		1,185
Decrease for the year	609	
Average daily attendance of pupils		532
Decrease for the year	143	
Number of teachers engaged		34
Decrease for the year	29	

II. SECONDARY SCHOOLS

a. High Schools and Collegiate Institutes

Number of High Schools (including 48 Collegiate Institutes) 1916-1917		161
Number of pupils enrolled in High Schools		28,833
Average daily attendance of pupils		22,781
Percentage of average to total attendance		79.01
Number of teachers in High Schools		1,038
Increase for the year	18	
Average annual salary, Principals		\$1,839
Increase for the year	\$26	
Average annual salary, Assistants		\$1,376
Increase for the year	\$17	
Average annual salary, all teachers		\$1,448
Increase for the year	\$18	
Highest salary paid		\$3,500
Amount expended for teachers' salaries 1916		\$1,509,227
Amount expended for school houses (sites and buildings)		\$398,791
Amount expended for all other purposes		\$580,236
Total amount expended on High Schools, 1916		\$2,488,254
Increase for the year	\$17,280	
Cost per pupil, enrolled attendance (approximate)		\$86.00

b. Continuation Schools

Number of Continuation Schools, 1916-1917		132
Number of pupils in attendance		5,082
Average daily attendance of pupils		3,729
Percentage of average to total attendance		73.37
Number of teachers		234
Average annual salary, Principals		\$1,093
Increase for the year	\$7	
Average annual salary, Assistants		\$757
Increase for the year	\$17	
Highest salary paid		\$2,000
Amount expended on teachers' salaries, 1916		\$224,464
Amount expended for school houses (sites and buildings)		\$25,109
Amount expended for all other purposes		\$56,575
Total amount expended on Continuation Schools, 1916 ..		\$306,148
Decrease for the year	\$4,646	
Cost per pupil, enrolled attendance (approximate)		\$60.00

c. Night High Schools

Number of Night Schools in 1916-1917		14
Increase for the year	1	
Number of pupils enrolled		3,467
Increase for the year	1,113	
Average daily attendance of pupils		754
Increase for the year	217	
Number of teachers engaged		119
Increase for the year	29	

III. GENERAL

Elementary and Secondary Schools

*Total population of the Province	2,625,800
Pupils enrolled in elementary schools, 1916	527,610
Pupils enrolled in secondary schools, 1916-1917	37,382
Total enrolment, all schools	564,992
Average daily attendance	366,608
Percentage of total population enrolled	21
Total expenditure	\$16,146,307
Average cost per head of total population in 1916	\$6.15

*Estimated

Comparative School Statistics, 1867=1916

I. PUBLIC AND SEPARATE SCHOOLS

These tables, 1, 2, 3, 4 and 5, for the purpose of comparison with previous years in which the Separate Schools were included with Public Schools, include Roman Catholic and Protestant Separate Schools. The tables A, B, C, D and E give the statistics of the Public Schools including Protestant Separate Schools; the statistics of the R. C. Separate Schools are given in Tables F and G; those of the Protestant Separate Schools appear in Table N; the Kindergartens in Table O; and the Night Schools in Table P.

1. School Population and Attendance

The school population of the Province (as ascertained by the assessors) and the school attendance are given in the following table:

Year	Population 5 to 16 years	Population 5 to 21 years	Total number of enrolled pupils	Boys	Girls	Average daily attendance	Percentage of average attendance to total number attending school
1867.....	447,726	401,643	213,019	188,624	163,974	40.82
1872.....	495,756	454,662	238,848	215,814	188,701	41.50
1877.....	494,804	490,860	261,070	229,790	217,184	44.25
1882.....	483,817	471,512	246,966	224,546	214,176	45.42
1887.....	611,212	493,212	259,083	234,129	245,152	49.71
1892.....	595,238	485,670	253,091	232,579	253,830	52.26
1897.....	590,955	482,777	251,677	231,100	273,544	56.66
1902.....	584,512	454,088	232,880	221,208	261,480	57.58
1907.....	590,285	448,218	229,794	218,424	266,503	59.45
1912.....	609,127	* 467,022	* 239,187	* 227,835	* 291,210	62.35
1915.....	643,975	* 505,074	* 258,000	* 247,074	* 336,860	66.69
1916.....	511,324	632,527	* 508,975	* 259,358	* 249,617	* 328,846	64.61

* Continuation School attendance excluded.

NOTE.—Kindergarten and Night School pupils are not included in above table.

The increase in the enrolled attendance for the year was 3,901, while in the average attendance there was a decrease of 8,014.

The following table compares the attendance and gives the percentages from rural and from urban municipalities for several years :

Year	Attendance in Rural Schools	Attendance in Urban Schools
1903.....	260,617 or 57.88 % of total	189,661 or 42.12 % of total
1907.....	242,247 or 54.05 % of total	205,971 or 45.95 % of total
1912.....	227,263 or 48.66 % of total	239,759 or 51.33 % of total
1915.....	231,681 or 45.87 % of total	273,393 or 54.13 % of total
1916.....	227,729 or 44.74 % of total	281,246 or 55.25 % of total

2. Classification of Pupils

Year	1st Reader, Part I, or Primer	1st Reader, Part II, or 1st Book	2nd Book	3rd Book	4th Book	5th Book, or beyond 4th Book
1867.....	* 79,365	98,184	83,211	68,896	71,987
1872.....	*160,828	100,245	96,481	67,440	29,668
1877.....	*153,630	108,678	135,824	72,871	19,857
1882.....	*165,834	106,229	117,352	71,740	10,357
1887.....	115,657	76,704	100,533	108,096	81,984	10,238
1892.....	114,932	73,015	96,074	99,345	88,934	13,370
1897.....	110,567	70,808	91,330	99,682	89,314	21,076
1902.....	107,441	69,062	85,732	90,630	83,738	17,485
1907.....	112,552	60,194	84,622	89,371	85,752	15,727
1912.....	126,100	67,368	92,728	88,811	85,213	† 6,802
1915.....	131,844	72,898	102,972	100,023	90,050	† 7,287
1916.....	128,748	73,208	106,201	102,270	91,824	† 6,724

The following table classifies the pupils in the various readers, as to rural and urban schools :

	Year	First Reader Part I or Primer	First Reader Part II or First Book	Second Book	Third Book	Fourth Book	Fifth Book or beyond Fourth Book	Totals
Rural Schools	1904	60,784	36,941	47,930	50,297	47,289	9,892	253,133
Rural Schools	1907	60,470	31,538	46,219	48,247	46,815	8,958	242,247
Rural Schools	1912	62,712	30,293	43,775	42,450	44,049	†3,984	227,263
Rural Schools	1915	63,697	32,103	45,816	44,058	42,599	†3,408	231,681
Rural Schools	1916	60,360	31,630	45,712	44,457	42,388	†3,182	227,729
Urban Schools (cities, towns and incorporated villages)	1904	44,456	27,800	37,299	39,814	35,815	6,304	191,488
	1907	52,082	28,656	38,403	41,124	38,937	6,769	205,971

	1915	68,147	40,795	57,156	55,965	47,451	†3,879	273,393
	1916	68,388	41,578	60,489	57,813	49,436	†3,542	281,246

* In 1st Reader.

† Exclusive of Continuation School pupils.

3. Teachers' Certificates

Year	Number of teachers	Male	Female	1st Class	2nd Class	3rd Class	Other certificates, including old County Board, etc.	Number of teachers who attended Normal School	*Normal College or Faculty of Education
1867.....	4,890	2,849	2,041	1,899	2,454	386	151	666
1872.....	5,476	2,626	2,850	1,337	1,477	2,084	578	828
1877.....	6,468	3,020	3,448	250	1,304	3,926	988	1,084
1882.....	6,857	3,062	3,795	246	2,169	3,471	971	1,873
1887.....	7,594	2,718	4,876	252	2,553	3,865	924	2,434
1892.....	8,480	2,770	5,710	261	3,047	4,299	873	3,038
1897.....	9,128	2,784	6,344	343	3,386	4,465	934	3,643
1902.....	9,367	2,294	7,073	608	4,296	3,432	1,031	4,774
1907.....	9,893	1,783	8,110	715	3,887	3,452	1,839	4,587
†1912.....	10,757	1,511	9,246	674	6,419	1,804	1,860	6,705	614
†1915.....	11,850	1,685	10,165	1,051	8,025	1,520	1,254	8,196	1,010
†1916.....	12,094	1,386	10,708	1,084	8,559	1,846	1,105	8,789	1,042

NOTE.—Kindergarten and Night School teachers are not included in above table.

The number of men engaged in teaching in these schools in 1915 was 14.22 per cent. of the whole; in 1916 the percentage of men was only 11.46.

The number of teachers and the class of certificates, in the Public Schools alone, in each County and District of the Province, will be found in Table C of this Appendix.

The following table classifies the teachers and certificates as to rural and urban schools:

	Teachers			Certificates			
	Total	Male	Female	1st Class	2nd Class	3rd Class	Other Class
Rural Schools, 1904.....	5,974	1,469	4,505	152	1,944	3,107	771
Rural Schools, 1907.....	6,038	1,201	4,837	180	1,542	3,079	1,237
†Rural Schools, 1912.....	6,143	894	5,249	165	3,002	1,463	1,513
†Rural Schools, 1915.....	6,351	963	5,388	308	3,839	1,283	921
†Rural Schools, 1916.....	6,409	731	5,678	346	4,161	1,150	752
Urban (cities, towns and incorporated villages), 1904.....	3,580	606	2,974	483	2,248	289	560
Urban, 1907.....	3,855	582	3,273	535	2,345	373	602
†Urban, 1912.....	4,614	617	3,997	509	3,417	341	347
†Urban, 1915.....	5,499	722	4,777	743	4,186	237	353
†Urban, 1916.....	5,685	655	5,030	738	4,398	196	353

* For the years previous to 1912 the numbers who attended Normal College or the Faculty of Education are included in the preceding column.

†Exclusive of Continuation School teachers.

4. Teachers' Salaries and Experience

Teachers' Salaries

Year	Highest salary paid	Average salary, male teacher, province	Average salary, female teacher, province	Average salary, male teacher, cities	Average salary, female teacher, cities	Average salary, male teacher, towns	Average salary, female teacher, towns	Average salary, male teacher, incorporated villages	Average salary, female teacher, incorporated villages	*Average salary, male teacher, rural schools	*Average salary, female teacher, rural schools	Average salary, male teacher, all urban schools	Average salary, female teacher, all urban schools

Incorporated villages included from 1867 to 1902 inclusive.

Increases in salaries in the cities, towns, villages and rural schools are shown in the above table. In Table C the average salaries for 1916 of the Public School teachers of the various Counties and Districts are given separately, and summarized for the cities, towns and villages. This table also states the salaries paid to teachers according to the grade of certificate held, and illustrates to what extent the teacher with the higher certificate commands the higher salary. The average salaries for the Province are as follows:

	Male.		Female.	
	1915.	1916.	1915.	1916.
First Class certificates	\$1,433	\$1,434	\$668	\$681
Second Class certificates	830	874	647	654
Third Class and District certificates...	526	541	479	483
Temporary certificates	454	464	408	409

Teachers' Experience

The length of service or experience of the teachers engaged in the Public Schools is also shown in Table C, where the numbers who have taught from less than one year up to forty years and over are given for each year, and where the experience of the teachers, according to the grade of certificate held, is given.

The average experience in the Public Schools at the end of 1916 was as follows:

- Male teachers, 13.48 years.
- Female teachers, 7.38 years.
- All teachers, 8.12 years.

5. Receipts and Expenditures

Year	Receipts				Expenditures					
	Legislative grants	Municipal school grants and assessments	Clergy reserve funds, balances and other sources	Total receipts	Teachers' salaries	Sites and building school houses	Libraries, maps, apparatus, prizes, etc.	Rent, repairs, fuel and other expenses	Total expenditure	Cost per pupil

The increase for the year in the amount paid as teachers' salaries was \$315,380. The total expenditure decreased by \$915,571.

The expenditure per pupil of enrolled attendance decreased from \$28.24 to \$26.23, and from \$42.35 to \$40.60 per pupil of average attendance.

These tables show the expenditure per pupil for the years as given below: -

Average cost per pupil (enrolled attendance)

	1902	1907	1912	1915	1916
Teachers' salaries	\$7.04	\$9.79	\$13.08	\$15.07	\$15.58
Sites and buildings	0.95	2.72	5.95	7.05	4.38
All other expenses	2.63	4.34	5.11	6.12	6.27
For all purposes	\$10.62	\$16.85	\$24.14	\$28.24	\$26.23

Average cost per pupil (average attendance)

	1902	1907	1912	1915	1916
Teachers' salaries	\$12.23	\$16.47	\$20.98	\$22.60	\$24.11
Sites and buildings	1.65	4.58	9.54	10.57	6.79
All other expenses	4.57	7.30	8.19	9.18	9.70
For all purposes	\$18.45	\$28.35	\$38.71	\$42.35	\$40.60

The expenditure per pupil (enrolled attendance) for 1916 in the Public Schools alone will be found in Table E, and for the R. C. Separate Schools in Table F. The expenditure will there be shown as to rural schools, cities, towns, and villages separately.

II. ROMAN CATHOLIC SEPARATE SCHOOLS

Year	Schools, Teachers and Attendance						
	Schools open	Teachers	Pupils	Boys	Girls	Average daily attendance	Percentage of average attendance to total number attending school

†Including all expenditure except for Teachers' salaries.

An increase of 1,784 in the enrolment and an increase of \$59,482 in the expenditure in 1916 are noticed in the above tables. The expenditure per pupil of enrolled attendance increased from \$17.54 to \$17.95. Detailed statistics in reference to these schools will be found in Table F and G.

III. PROTESTANT SEPARATE SCHOOLS

The following is a complete list of the Protestant Separate Schools of the Province:—No. 4 Grattan, No. 2 Hagarty, No. 1 Tilbury North, L'Original, and Penetanguishene.

They were attended by 415 pupils in 1916. The whole amount expended for their maintenance and permanent improvements was \$10,038.73. One teacher held a First Class certificate, eight teachers held Second Class, and two held Third Class certificates.

Complete statistics for these schools will be found in Table N.

IV. CONTINUATION SCHOOLS

The following table gives statistics of the "Continuation Classes, Grade A," up to and including 1907. Thereafter they are known as "Continuation Schools." Formerly the statistics of these schools were included with the statistics of the Public and Separate Schools, consequently certain items for the years 1897-1907 cannot be given.

Year	Schools	One-teacher schools	Two-teacher schools	Three-teacher schools	Number of teachers	Receipts		Expenditure		Total value of Equipment	No. of Pupils	Percentage of average attendance to total attendance
						Legislative grant	Total Receipts	Paid for Teachers' Salaries	Total Expenditure			
						\$	\$	\$	\$	\$		
1897.....	27	20	7	34	2,700	1,275
1902.....	59	46	12	1	73	8,350	1,856
1907.....	91	65	24	2	119	25,610	73,325	26,345	3,993
1912.....	138	54	73	11	226	64,081	295,261	202,875	265,087	75,556	6,094	61.97

1916.....	132	33	96	3	234	64,753	337,852	224,464	306,148	87,901	*5,082	*73.37

*For school year 1916-1917

Of the enrolled attendance for 1916-1917, 3,977 pupils were in the Lower School and 1,105 in the Middle School. The total attendance was made up of 1,979 boys and 3,103 girls.

Average Cost per pupil, enrolled attendance (approximate)

	1916
Teachers' salaries	\$44.17
Sites and buildings	4.94
All other expenses.....	11.13
For all purposes.....	\$60.24

Average Cost per pupil (average attendance)

	1912	1915	1916
Teachers' salaries	\$53.71	\$51.39	\$60.19
Sites and buildings	4.17	8.68	6.73
All other purposes	12.30	12.64	15.17
For all purposes.....	\$70.18	\$72.71	\$82.09

Statistics in detail for 1916 in reference to the Continuation Schools will be found in Tables H, I and J.

V. COLLEGIATE INSTITUTES AND HIGH SCHOOLS

The following table gives comparative statistics respecting Collegiate Institutes and High Schools from 1867 to 1916, inclusive:—

1. Receipts, Expenditure, Attendance, etc.

Year			Receipts			Expenditure			Pupils	Percentage of average attendance to total attendance
	Schools	Teachers	Legislative grant	Amount of fees	Total receipts	Paid for teachers' salaries	Paid for sites and buildings	Total expenditure		
			\$	\$	\$	\$	\$	\$

Elementary Household Science in Rural Schools.
A rural school equipment on the lines laid down in the Department's manuals on "Household Management" and "Sewing" is installed in these schools.

APPENDIX K

THE LIBRARY OF THE DEPARTMENT

THE HONOURABLE R. A. PYNE, M.D., LL.D.,

Minister of Education for Ontario.

SIR,—I beg to submit the Report of the Library of the Department of Education for 1917.

A series of tables are given to indicate the nature of the services rendered by the Library to its patrons.

From the middle of June to the middle of September, the Library was practically closed for repairs. All books and papers were removed and cleaned. New ceilings were put in, the hallway lengthened, new stacks added, and the rooms and shelves painted. When the rooms, now under construction, are completed and furnished, there will be sufficient space for our supply of books and accommodation for reading and reference work.

I have the honour to be, Sir,

Your obedient servant,

D. J. GOGGIN,

Librarian.

The Library, Toronto, January 4, 1918.

APPENDIX S

LIST OF CERTIFICATES ISSUED BY THE DEPARTMENT OF EDUCATION, 1917

I. Public School Inspector's Certificate

Cameron, James G., B.A.

II. High School Principals

Affleck, Archibald A., B.A.
Awde, Elgin O., B.A.
Barlow, Frederick J., B.A.
Batstone, Aylesbury T., B.A.
Bocking, William R., M.A. (Math. & Phys.)
Buchanan, Winnifred I., B.A.
Davidson, Robert D. P., B.A. (Science.)
Durnin, Edward W., B.A. (Math. & Phys.)
Ferguson, Arthur W., B.A.
Forester, Margaret, B.A.
Fraser, Mary A., B.A.
Greer, Vanamber K., M.A.
Hazen, Arthur C., B.A. (Science.)
Henry, V. Roland, M.A. (Science.)
Hodgins, Ekron P., B.A. (Science.)
Howson, Bruce F., B.A. (Math. & Phys.)
Irwin, Alfred H., B.A.

Jenkins, Robert S., M.A. (Eng. & Hist.)
Johnston, Katie B., B.A. (Eng. & Hist.)
Lawr, J. Melvin, B.A.
Loucks, Horatio, B.A.
Menzies, Leslie P., B.A. (Science.)
Murphy, Edith A., B.A.
Mackintosh, Helen C., M.A. (Fr. & Gr.)
McCrimmon, Leon R., M.A.
Otto, George S., B.A. (Mods. & Hist.)
Pugh, Harry C., B.A.
Ramsay, James A., B.A. (Commercial.)
Readdie, George, M.A. (Fr. & Gr.)
Russell, John W., M.A. (Math.)
Stevens, Myrtle H., B.A.
Tucker, Mary C., M.A. (Science.)
Whyte, Marion I., B.A. (Mods. & Hist.)
Wilson, William J., B.A. (Science.)
Yorke, Charles G., B.A.

III. High School Assistants and Specialists

Adams, John G., B.A. (Science.)
Adams, John H., B.A. (Phys. & Cult.)
Adamson, Florence M., B.A.
Adamson, William H., M.A.
Agla, Mildred A. (Art.)
Arnold, Winnifred M. (Art.)
Barry, Minnie L., B.A. (Art.)
Barton, Ambrose R., B.A.
Beattie, Lewis S. (Phys. Cult.)
Belton, Mildred, B.A.
Birchard, Alexander F. (Art.)
Boyle, Edna M., B.A. (Math. & Phys.)
Brennan, Jennie L. (Art.)
Brewster, Gladys I.
Brown, Harry W., B.A. (Art.)
Buck, Charles S.
Burns, Grace, B.A.
Burriss, Mae N., B.A. (Mods. & Hist.)
Campbell, Lillian M., B.A. (Mods. & Hist.)
Clarke, Bruce W., B.A. (Phys. Cult.)
Clarke, Walter, B.A. (Classics.)
Colbeck, Marjorie M., B.A. (Classics.)
Courtice, Samuel J., B.A. (Phys. Cult.)
Cryderman, May, B.A.
Cumming, Eva M., B.A.
Davies, Norman, B.A. (Science & Phys. Cult.)
Davis, Pearl I., B.A. (Art.)
Dixon, Nora G. (Commercial.)
Douglas, Gordon A.
Doupe, H. Alvan.
Elcoat, Hazel I.
Elliott, Florence M., B.A.
Elliott, Martha G., B.A. (Mods. & Hist.)

Ellis, Roxie A. (Art.)
Feasby, Harold G.
Ferris, Kathleen B., B.A.
File, Agnes L. (Commercial.)
File, Edna G.
Franklin, Helen A., B.A.
Fraser, Lulu B. (Art.)
Fritz, Myrtle E.
Galloway, Jessie L., B.A. (Mods. & Hist.)
Giles, Annie.
Gilhooly, Beatrice C., B.A.
Gillespie, Grace A., B.A.
Govenlock, Ada H.
Graham, Hugh H., B.A.
Green, Walter H. H., B.A. (Science.)
Gulston, Charles S. (Phys. Cult.)
Haines, Ruth W.
Hanna, William E., B.A.
Hare, Arthur F.
Haslitt, Marjorie E., B.A. (Eng. & Hist.)
Heath, Horace J., B.A. (Science.)
Heather, Eunice G.
Heather, Ruth.
Henderson, Hubert M.
Hendry, Earl D. (Phys. Cult.)
Hewitt, Cora E., B.A. (Phys. Cult.)
Hicks, Evalyn G.
Hisey, Abraham, B.A. (Science.)
Hooper, Hazel C., B.A.
Howie, Mabel F. (Commercial.)
Howson, Alexandra, B.A. (Fr. & Gr.)
Hubbs, Mary W., B.A.
Humphries, B. Rowena. (Art.)
Hutchison, Margaret B.
Hyde, Catharine I., B.A.

III. High School Assistants and Specialists.—Con.

- Ingham, Harriet, B.A.
 Inson, Margaret A., B.A.
 Irving, Jessie C., B.A. (Math. & Phys.)
 Johnston, Agnes E., B.A.
 Johnston, Agnes M. (Art.)
 Keagey, Jessie L., B.A.
 Kehoe, Martin B.
 Kent, Eleanor. (Art.)
 Kerr, Maybelle G., B.A.
 Keys, George P.
 Kilpatrick, Jessie S., B.A. (Phys. Cult.)
 Kilty, Ruby I. (Commercial.)
 Kinnear, Jennie A., B.A. (Math.)
 Lauder, Beatrice G., M.A. (Eng. & Hist.)
 Lawrence, Charles F., B.A.
 Lawrence, Jessie F., B.A.
 Leuty, James H.S. (Phys. Cult.)
 Maher, Margaret. (Sr. M. Aurelia.) (Art.)
 Marshall, Marcella T. (Art.)
 Matthews, Herbert L., B.A.
 Medcof, James L., B.A. (Science.)
 Millar, Maude.
 Miller, Ada A.
 Morden, Frances D., B.A. (Phys. Cult.)
 Morley, Dolly.
 Morrison, Olive E., B.A. (Math. & Phys.)
 Mulvihill, Mayme B.
 MacIntyre, Euphemia, B.A.
 MacKay, Katharine, B.A.
 MacKillop, Oliver M.
 MacMinn, Marie, B.A. (Eng. & Hist.)
 McBride, Lela G.
 McDonald, Margaret D.
 McDonald, Vivian C.
 McFadden, Robert W. E., B.A.
 McGinn, Lulu M., B.A. (Mods. & Hist.)
 McKellar, John, B.A. (Math. & Phys.)
 McKenzie, Kenneth A., B.A. (Science.)
 McLachlin, Janet E.
 McLeish, Sarah J., B.A.
 McMillan, Roy J. (Phys. Cult.)
 McQuarrie, Ernest C., B.A. (Phys. Cult.)
 McRae, Jessie C. (Art.)
 Nash, Mary V., B.A. (Phys. Cult.)
 Nicholson, Elvira E., B.A. (Mods. & Hist.)
 Norton, E. Ida.
 O'Connor, Katie B.
 Otto, George S., B.A. (Phys. Cult.)
 Pacey, Mabel I.
 Park, Camilla H.
 Penfold, Janet L., B.A. (Classics.)
 Peterson, Helen B.
 Philp, James H., B.A.
 Porter, William A.
 Power, Eva A. (Commercial.)
 Pringle, Gertrude, B.A. (Art.)
 Quarry, Vincent C., B.A.
 Rolston, Ella G., B.A.
 Ross, Margaret C., B.A.
 Runnings, Joseph B. C.
 Sanderson, Lenore A., B.A. (Art.)
 Sanderson, Oliver N., B.A.
 Scanlan, James V.
 Scott, Arthur G., B.A.
 Shepley, Jessie E.
 Shorey, Percival M., B.A.
 Shurtleff, Wm. M., B.A. (Art.)
 Sinclair, John, B.A. (Math.)
 Sinclair, Robert J. (Phys. Cult.)
 Smith, Hilda C. H., B.A. (Art.)
 Smith, Isabel K., B.A. (Art.)
 Stark, Ethyle M., B.A.
 Stevenson, Marjorie T.
 Stewart, Winona, B.A.
 Stilwell, Ayrest L., B.A.
 Stinson, Allie.
 Switzer, Josephine.
 Symons, Helen F., B.A. (Eng. & Hist.)
 Taite, Ruple.
 Taylor, Marguerite I., B.A. (Eng. & Hist.)
 Tuer, Margaret. (Art.)
 Unger, Delbert B. (Phys. Cult.)
 Wallace, Muriel J. W., B.A. (Mods. & Hist.)
 Weatherill, Helen E. M. (Art.)
 Wells, Vera M.
 Whitney, Viola L., B.A. (Eng. & Hist.), (Mods. & Hist.)
 Wightman, Keith S.
 Winhold, Edward P.
 Wood, Elmore E., M.A. (Phys. Cult.)
 Wright, Cassie.

IV. Permanent Elementary Certificates

- Abel, Margaret H. (Art.)
 Adams, Edna M. R. (Phys. Cult.)
 Armstrong, Eunice. (Art.)
 Austin, Grace C. (Phys. Cult.)
 Ball, Alice I. N., B.A. (Phys. Cult.)
 Barr, Annie E., B.A. (Phys. Cult.)
 Beaudet, Azilda, (Sr. M. of Visitation). (Voc. Music.)
 Bell, John A. (Phys. Cult.)
 Benham, James W. (Agric. & Hort.)
 Birchard, Alexander F. (Phys. Cult.)
 Brain, Beatrice A., B.A. (Phys. Cult.)
 Broad, Luella L., B.A. (Phys. Cult.)
 Brogren, (Mrs.) Irene M., B.A. (Art.) (Phys. Cult.)
 Burriss, Mae N., B.A. (Phys. Cult.)
 Campbell, William A., B.A. (Art.)
 Carter, C. Louise, M.A. (Phys. Cult.)
 Casey, Irene. (Sr. St. Agnes de Poitiers.) (Art.)
 Colbeck, Wilhelmina L., B.A. (Phys. Cult.)
 Cowan, Euphemia J., M.A. (Phys. Cult.)
 Cryderman, May, B.A. (Phys. Cult.)
 Cunningham, Teresa (Mother Gertrude). (Art.)
 Dixon, Nora G. (Phys. Cult.)
 Doherty, John C., B.A. (Phys. Cult.)
 Dugit, Rosalie A., M.A. (Phys. Cult.)
 Eby, Emma L. (Phys. Cult.) (Art.)
 Ferris, Kathleen B., B.A. (Phys. Cult.)
 File, Agnes L. (Phys. Cult.)
 Finch, I. Mae, B.A. (Phys. Cult.)
 Fleming, Samuel L. (Phys. Cult.)

IV. Permanent Elementary Certificates.—Con.

Goulding, Hanna M. (Phys. Cult.) (Art.)	Morrow, John D., B.A. (Phys. Cult.)
Grieve, Helen M. (Art.)	Morton, Christina H. (Phys. Cult.)
Hall, Margaret M. S., B.A. (Art.)	Neelands, Amy R. (Agric. & Hort.)
Halliday, Florence F. (Phys. Cult.)	Newman, Violet E. (Agric. & Hort.)
Hamilton, Sara. (Agric. & Hort.)	Noonan, Aileen, B.A. (Phys. Cult.)
Harper, David. (Phys. Cult.)	Pacey, Mabel I. (Phys. Cult.)
Heather, Ruth. (Phys. Cult.) (Com.)	Rand, Wilfred E., B.A. (Phys. Cult.)
Hicks, Frederick M. (Phys. Cult.)	Reid, Hazel I., B.A. (Phys. Cult.)
Johnston, E. Grace. (Phys. Cult.)	Robinson, Frances A., B.A. (Phys. Cult.)
Kilty, Ruby I. (Phys. Cult.)	Roblin, Lena R. (Agric. & Hort.)
Leckie, Bruce E., B.A. (Phys. Cult.)	Rose, Maude L. (Art.)
Lee, Gertrude M. (Phys. Cult.)	Smith, Hilda C. H., B.A. (Phys. Cult.)
McGinn, Lulu M., B.A. (Phys. Cult.)	Strang, Rose I. (Phys. Cult.)
McMillan, Roy J. (Art.)	Taylor, Marguerite I., M.A. (Phys. Cult.)
MacIntyre, Lillian. (Art.) (Phys. Cult.)	Tobin, Lilly S., B.A. (Phys. Cult.)
MacIntyre, Sada. (Art.)	Tuer, Margaret. (Phys. Cult.)
MacKay, Emma L. (Phys. Cult.)	Wallace, Robert H. (Phys. Cult.)
MacKay, Katharine, B.A. (Art.)	Weatherill, Helen E. M. (Phys. Cult.)
MacLaurin, James L., B.A. (Phys. Cult.)	Welsh, David A., B.A. (Phys. Cult.)
Mitchell, Lillian G. (Art.)	White, Margaret E. (Phys. Cult.)
Mitchener, James L., B.A. (Phys. Cult.)	Whittington, Joseph W. (Phys. Cult.)
Morrison, Olive E., B.A. (Phys. Cult.)	Wilson, Elizabeth A. R. V. (Art.)

V. Permanent Supervisors

Johnston, Birdie C. (Voc. Mus.)	Shannon, Laura A. (Art.)
---------------------------------	--------------------------

VI. Permanent First Class Certificates

Anderson, Kate.	Elliott, Mrs. Ina B.	Ireland, Norval J., B.A.
Anderson, Stella F.	Forster, John L.	Johnston, Helen A.
Axford, B. Willis., B.A.	Foster, Mary M.	Keffer, Charles P. A., B.A.
Anderson, Margaret C.	Fowler, Reginald G.	Kidd, Gazy M.
Brown, Edna C.	Fowler, Dorothy R., M.A.	Kenyon, Anna K. E., B.A.
Bell, Lily M., B.A.	Gray, Harvey F.	Kelly, Katherine.
Bryan, Cameron A.	Galpin, Frederick H.	Knapp, Elizabeth E.
Bauer, Amy M.	Grieve, Bessie M.	Kennedy, Elizabeth C.
Brown, Margaret S.	Gillies, Robert, B.A.	King, Myrtle I.
Bryan, Laura M.	Gale, Ewart I., B.A.	Kennedy, Jessie, B.A.
Bradley, Elsie P.	Gowan, Bella J.	Kenyon, Isabel
Billingsley, Susan M.	Guay, Louise (Sr. Paul Emile).	Lachance, Regina M.
Baxter, Christina V.	Gibson, Gladys H.	Labonde, Lucy E.
Brown, Marjorie A.	Gillies, Flora M.	Livingstone, May E.
Bates, Nettie M. L.	Grant, Lucy	Lucas, Alexander B.
Bamford, Emily O. B.	Gillan, Kathleen M.	Lake, Ettie M.
Coon, Myrtle I.	Galbraith, Janet E.	Laurie, Bessie M.
Cameron, Mary. (Sr. Agnes, Sacred Heart.)	Grant, Cora.	Leggett, Hilda, B.A.
Cummings, Maude. (Sr. M. Angelina).	Havill, Blanche B.	Lees, Margaret A, B.A.
Campbell, Marguerite.	Hall, Delia K.	Lozo, Ethel L.
Crockard, Margaret I.	Hartry, Norma I.	Lochart, Olive.
Cole, Gertrude M.	Heydon, Bertha M., B.A.	McLaughlin, Verna J.
Cunningham, Elinor J.	Harper, Gertrude A., B.A.	McKechnie, Catriona S.
Clarke, Isabel F.	Hutchinson, Gladys M.	McNamara, Frances.
Campbell, Marguerite B.	Hammell, Ethel, E. M., B.A.	McDowell, Nelson.
Corkery, Mary E.	Henry, Esther A., B.A.	McCutcheon, Evelyn M.
Cuthbert, Grace L.	Hogarth, Lela W.	McLeod, Ruth M.
Carswell, Jean A.	Henry, Eva M.	McCannell, Vera G.
Clark, Mona E.	Henry, Gertrude J.	McDonald, Robert H.
Crawford, Beatrice M., B.A.	Hewitt, Benjamin H.	McKinnon, Charles.
Chalmers, Caroline M., B.A.	Hiscock, Reta W.	McLachlan, Christena, B.A.
Chapman, Bertram.	Hobkirk, Mary B.	McMaster, Maud H, B.A.
Donaldson, Alta S. I.	Holmes, Jessie R.	McEachern, Agnes, B.A., (Sr. St. Clare).
Durkin, Mary. B.A.	Hawkes, Rose A.	McDonagh, Charlotta.
Dykes, Vera K.	Hemphill, Andrew T.	McCann, Dorothy.
Davidson, Annie B.	Hayward, Rhoda.	McArdle, Ethel (Sr. St. Stanislaus).

VI. Permanent First Class Certificates.—Con.

McCorquodale, Elizabeth.	Mauson, Gladys B.	Simpson, Hill J.
McLean, Mary E.	Norris, John T.	Swain, Clarke C.
McLennan, Mary L.	O'Driscoll, Agnes I.	Sadleir, Edna J.
McBurney, Robert S.	O'Neill, Henry S.	Sirrs, Elmer J.
McLellan, Norman A.	O'Connor, Helen A.	Stothers, Fredricka R., B.A.
MacKenzie, Grace I., B.A.	Phillips, Edith V., B.A.	Shier, Morley R.
MacLaurin, Mary L., B.A.	Park, Mollie A.	Tobin, Mary, B.A. (Sr. M. Isabel).
MacNaughton, Evelyn.	Purvis, Mae A.	Thomas, Edward H.
MacDonald, Annie C.	Pearson, George A.	Thoms, Clarence J., B.A.
MacIntyre, Anna M.	Park, Leonora.	Taylor, Morley F.
MacGregor, Irene M.	Reid, Katie E.	Tennent, Ida M.
MacKay, Robina R.	Reed, Agnes (Sr. M. of St. Hilda).	Thomson, Alice.
Moffatt, Annie I.	Ryan, Winnifred.	Unger, Angeline P.
Meston, Florence B.	Rush, Emma L.	Whelan, Anna M.
Macklin, Ethel P., B.A.	Reynolds, Effie M.	Walker, Alice B.
Marshall, Helen Y., B.A.	Rattray, Mary G.	Ward, Ed. M. H.
Merrill, Violet R.	Roach, Mary G.	Webb, Cecil V.
Merner, Chester K.	Reesor, Alberta I.	Wheeler, Harold A.
Morrow, Arthur S.	Reeve, Mrs. Katharine M.	Wingard, Kathleen, B.A.
Matchett, Letitia G.	Rolston, Eva E.	Workman, James A., M.A.
Mielhausen, Albert J.	Stickwood, Herbert F.	White, Lloyd.
Moynihan, Kathleen A.	Staples, Mrs. Eva B.	White, Francis P.
Melady, Thomas S.	Stewart, Eva G., B.A.	Wills, Gladys F.
Malone, Beatrice.	Skelton, Minnie M., B.A.	Williams, Mary M.
Miller, Mary E.	Sewell, Elaine.	Webster, Helen R.
Morrow, Cora I.	Strong, William G.	Watson, John R.
Meadows, Ethel M.	Shoebbotham, Barbara M.	Wilson, Marguerite.
Murphy, Helen.	Swetman, Lillian P.	Wilson, Laura E.
Manhard, Ethel F. M.	Spindler, Gladys M.	Wallace, Robert H.
Moore, Blanche B.	Sullivan, Ethel.	Witton, Rosalind C.
Marshall, William A.	Spencer, Beulah J.	Wannan, Bertha J.
Milling, Edith G.	Swartman, Marjorie.	Young, Gordon.
Madden, Edna J.	Stark, Evelyn M.	Young, Marion.
Murray, Edith M.		
Moyer, Violet E.		

VII. Permanent Second Class Certificates

Allin, Neva B.	Ardill, Mabel.	Balsdon, Henrietta S.
Annett, Leapha M.	Berringer, Beatrice A.	Bateman, Jennie.
Alleley, Ida E.	Banting, Elizabeth L.	Bellas, Lavina.
Aldeorn, Mary F.	Braithwaite, Annie.	Barr, Margaret.
Anthes, Florence C.	Brown, Eva D.	Bell, Maggie.
Appleton, David T.	Begg, Bessie M.	Bevens, James E.
Anderson, Mary M.	Breen, May K.	Biggs, Mrs. Clara.
Alloway, Mary G.	Bricknell, Frances G.	Brown, Florence A.
Arnold, Annie.	Boyle, Catharine H.	Beattie, Oliver M.
Alloe, Victoria.	Babcock, Irene H.	Bradley, Mildred R.
Allan, Margaret L.	Barrie, Ethel J.	Bristow, Gertrude L.
Armstrong, A. Irvine.	Brown, Elsie.	Beattie, Carrie M.
Allison, Helen I.	Bothwell, Mary E. T.	Brownlee, Ida A.
Anderson, Agnes M.	Brown, Mary B.	Brown, Kathleen A.
Anderson, Mary G.	Bere, Lorena.	Bailey, Marcella C.
Aspden, Lillian.	Beattie, Jennie I.	Bigford, Hazel G.
Atkin, Louise.	Barton, Emma S.	Blandford, Vera H.
Ayers, Mary M.	Binnie, Bessie.	Bvercroft, Esther H.
Anderson, Ida M.	Barton, Bertha M.	Bentham, Rena F.
Allin, Bella R.	Black, Mary E. C.	Broughton, Mary.
Arnold, Vera.	Blackhall, Lena M.	Badgley, Grace M.
Adams, Margaret.	Brent, Mary I.	Brumwell, Irene.
Abercrombie, Margaret R.	Bogart, Edna B.	Buck, Addie M.
Atchison, Olive I.	Bateman, Sara L.	Blake, Adelaide L.
Arnold, Annie I.	Beggs, Eva I.	Bradley, Gertrude M.

APPENDIX T

LIST OF ASSOCIATE EXAMINERS, AND CONTINUATION AND HIGH SCHOOL PRINCIPALS AND ASSISTANTS

I. Associate Examiners, 1917

Model Entrance, Lower School, Senior High School Entrance and Senior Public School Graduation Diploma

English Grammar: Edna Alcombrack, C. G. Beck, Norah Belcher, Olvetta Brigham, Norah Cleary, Bessie Clothier, L. H. Corbett, Ethel C. Eaton, N. R. Gray, Grace E. Johnston, Helena E. Johnston, Mary E. Lynch, Pearl McGregor, Anna MacKenzie, J. D. Morrow, Mila O'Callahan, Susan O'Leary, Margaret E. Ross, Gertrude Ryan, Lily S. Tobin, Elizabeth A. R. V. Wilson, Violet Winnett.

English Literature: E. C. McQuarrie, Annie J. Willoughby,

Spelling: Florence Armstrong, Wm. Baird, Pearl Z. Baker, Lillian File, Norma Gee, Evelyn D. Kellock, Mrs. Norma Rochat, Orethia Sailsbury, J. M. Simpson, F. G. Sweet.

Geography: Eunice Armstrong, Annie F. Augustine, Etta L. Barber, L. S. Beattie, W. L. Bowden, Olive M. Burns, J. L. Challinor, Eva M. Crummer, Leah A. Gillard, H. W. Hall, James Hartford, J. E. Hollingshead, J. R. Howie, F. J. Johnston, R. J. McMillan, Lena Millard, Edith A. Murphy, Mary E. V. Rogers, H. S. Rosevear, F. T. Schooley, Jessie M. Scott, Muriel Shook, Marjorie Stevenson, Mary Strathdee, Alexina A. C. Walker.

Composition: Ada Menhennick.

History: Helen A. Ballance, Elsie K. Beaman, Harriett E. Black, R. J. Blake, James Cameron, R. J. Chisholm, Eva M. Coulter, S. G. Devitt, Jean H. Fleming, Annie B. Francis, J. W. Fraser, Evelyn C. Garrett, J. I. Hutchinson, Florence B. Ketcheson, Elizabeth McNamara, Henrietta E. Mazinke, Mary I. Moir, Maude M. Norton, Ida M. Oldham, G. S. Otto, May H. Peregrine, Ruth E. Spence, Ina M. Turvey, Grace I. Warnock, Cassie Wright.

Art: Mildred Agla, H. E. Bicknell, Emma M. Bottoms, Emma L. Eby, Roxie A. Ellis, Muriel B. Ferguson, L. Morwenna Harris, C. W. Horton, Agnes M. Johnston, Elva Locklin, Bessie McCamus, Mrs. J. E. MacGregor, Marcella T. Marshall, S. W. Perry, Laverna B. Stark, Neil J. Thomas, Mabel Van Duzer, Julia Weir.

Arithmetic: R. H. Archibald, C. H. Barnes, A. T. Batstone, C. K. Bluett, B. W. Clarke, Loretta C. Fair, Leo Hartford, Walter Keast, C. H. McGee, Margaret K. Munro, W. H. Rogers, W. A. Skirrow, G. B. Stewart, E. T. Young.

Algebra and Geometry: T. M. Cayley, J. M. MacKay.

Elementary Science: A. E. Allin, M. H. Ayers, J. A. Bell, Jessie C. Blacklock, G. W. Bunton, Alex. Caldwell, Muriel Daley, Letitia E. Durnin, C. G. Fraser, H. W. Gerhardt, R. S. Hamilton, Ella A. Hanna, V. R. Henry, E. P. Hodgins, A. D. Hone, W. A. Jennings, A. H. Irwin, N. A. Irwin, C. I. Nelson, Vera E. Norrish, B. S. Scott, R. J. Sinclair, S. Louise Smith, J. H. Stewart, Margaret E. White, A. M. Woodley, Clara Young.

Writing: Cora Bartlett, Bessie Brimicombe, Minnie M. Campbell, D. M. Clark, Libbie Cruickshank, F. W. Edward, Mabel Howie, Ruby I. Kilty, T. W. Oates, Eva A. Power, W. J. Squire, Leah Webster.

Book-keeping and Writing: Estella R. Cragg, J. A. Dickinson, Olive Fritz, G. A. Lucas, Kate Richardson, E. C. Srigley, Margaret Smith.

Household Science: Clara E. Elliott, Mary C. Macpherson, A. E. Robertson, L. K. G. White.

Middle School Examination

English Composition: H. E. Collins, Ethel Gibson, Christina C. Grant, Emily McManus, Mrs. Ada Pattee, Harriet A. Patterson, W. B. Race.

Literature: Mary Bain, H. W. Brown, Eleanor L. Clarke, A. J. Husband, Sadie E. Iveson, Jessie S. Kilpatrick, Annie M. McArthur, T. C. Somerville, Janie Thomas, Mabel N. Trenaman, Marion I. Whyte.

Ancient History: Elsie Affleck, Lillian M. Allen, J. G. Althouse, J. H. Dolan, Mabel Farrington, W. J. Fenton, F. W. French, Lottie E. Hamer, A. C. Haynes, W. J. Salter, W. B. Taylor, Margaret Thomas.

British and Canadian History: E. E. Ball, Mrs. Irene M. Brogden, W. A. Campbell, Helen I. Dafoe, Nellie De Cou, W. J. Feasby, Claire Hitchon, P. T. Jermyn, A. D. Norris, L. Pearl Whitton, C. G. Yorke.

Algebra: W. R. Bocking, J. L. Cornwell, C. L. Crassweller, J. H. Davidson, W. E. Rand, B. L. Simpson, W. L. Sprung.

Geometry: Maria A. Higginson, B. F. Howson, Frances V. Johnston, C. A. Milburn, J. H. Packham, J. F. Ross, H. Blanche Willson, E. E. Wood.

Physics: H. G. Arnold, Alma W. Crawford, F. A. Flock, W. J. Haydon, Thomas J. Hicks, J. W. Kelly, Mrs. E. W. Kerr, E. O. Liebner, D. H. McGill, J. McNiece, P. MacKichan, W. J. Morrison, W. J. Saunders, Wm. E. Shales, F. Sine, W. B. Wyndham.

Chemistry: R. P. Allin, G. H. Bielby, G. A. Carefoot, G. E. Copeland, J. W. Firth, Florence M. Flanagan, T. H. Follick, L. H. Graham, P. C. MacLaurin, C. F. Marshal, W. H. Martin, Ed. Morrison, Walter E. Shales, A. Smith.

Latin: C. L. Barnes, Elsie Caverhill, A. A. Dundas, Viola Gilfillan, A. G. Hooper, Mrs. Edith McIntyre, C. A. Mayberry, J. H. Mills, W. E. Murdock, Peter Perry, Margaret C. Ross, Minerva E. Stothers, G. E. Will.

Art: C. W. Horton, S. W. Perry, N. J. Thomas.

Upper School Examination

Composition: Edith L. Atkin, F. H. Bell, W. Elmslie, Eleanor D. Odum.

Literature: W. J. Feasby, Elizabeth C. Henry, E. W. Jennings, Kate C. Skinner, Gladys S. Story.

History: Mrs. C. F. Casselman, J. W. Charlesworth, Cora E. Hewitt, Laura L. Jones, G. W. Malcolm, L. J. Pettit.

Latin and Greek: A. E. Coombs, I. Kathleen Cowan, Margaret Cowan, D. M. Grant, H. R. H. Kenner, C. S. Kerr, J. T. Lillie, W. J. Twohey.

French and German: Janet Carter, F. H. Clarke, W. C. Ferguson, E. S. Hogarth, Sophia E. Marty, L. R. Whitely.

Science: P. W. Brown, G. A. Cornish, A. Cosens, A. P. Gundry, T. J. Ivey, A. E. Jewett, J. R. Moore, E. Pugsley, G. F. Rogers, W. Smeaton, T. E. Speirs, J. B. Turner.

Mathematics: D. L. Cranston, R. A. Gray, A. M. Overholt, A. M. Robertson, R. C. Rose, W. W. Rutherford, R. Shaw, R. Wightman.

Matriculation Examination

Literature: W. G. Anderson, Leila I. M. Douglas, A. St. J. Furnival, Enid A. McGregor.

Composition: Wm. Kemp, Eleanor Nugent, Ethel L. Ostrom.

Grammar: Wm. Kemp.

British and Canadian History: A. G. Dorland, G. L. Gray, Mrs. F. G. Parker, Hazel I. Reid, Agnes Vrooman.

Ancient History: Helen Macdonald, Hilda C. Smith, W. W. A. Trench, Madeline C. Young.

Chemistry: J. P. Hume, F. A. Stuart.

Physics: J. L. MacLaurin, J. L. Mitchener.

Geometry: U. J. Flach, W. W. Knight, A. C. McPhail, I. T. Norris, J. M. Warren.

Algebra: Martha Fitch, W. W. McHugh, J. Sinclair.

Arithmetic: A. C. McPhail.

German: N. L. Murch, C. E. Reaman, R. Reid, H. B. Tapscott.

Classics: J. S. Bennett, Hugh W. Bryan, G. E. Evans, J. A. Freeman, D. E. Hamilton, H. W. Kerfoot, H. M. McCuaig, Clara B. McKinley, S. F. Passmore, L. C. Smith.

French: Sadie Bristol, Effie M. Bunnell, Margaret Cook, Helen Downey, Helen Durie, Maud Hawkins, Maybelle M. Laing, J. S. Lane, Minnie F. Libby, Aletta E. Marty, F. G. Millar, Marguerite O'Connell, John B. Wallace, F. A. Whitton, Mary I. Williams, Alice Wilson.

II. List of Principals and Assistants of Continuation Schools, January, 1918

Post Office and Name of School	Names and professional qualifications of Teachers (Unless otherwise stated, the teacher is the holder of a Permanent First Class or a High School Assistant's certificate.)	Degrees	Specialists	Elementary and Intermediate Certificates (In the case of Agr. & Hor. the Certificate is Intermediate.)	Date of appointment	No. of years' experience in a High or Continuation Sch.	No. of years in a Public School	Salaries		
								Principal	Male Assistants	Female Assistants
								\$	\$	\$

APPENDIX X

ONTARIO SCHOOL FOR THE
DEAF

ANNUAL REPORT OF THE SUPERINTENDENT

TO THE HONOURABLE R. A. PYNE, M.D., LL.D., M.P.P.,
Minister of Education for Ontario:

SIR.—I have the honour to present for your consideration the annual report of the Ontario School for the Deaf for the year ending October 31st, 1917.

The Attendance

The average number of pupils in attendance for the session of 1916-17 was 248, and this, compared with the high record of 264 for the session of 1915-16, shows a decrease of 16 in the average attendance. This falling off was more apparent than real, as the average for the session of 1915-16 was unusually high and due to definite causes; and the falling off was due also to definite causes, such as the pressing demand for help in all lines of work and the great facility with which our boys and girls, owing to their industrial training, were able to secure work at very attractive wages. Twenty-eight new pupils were enrolled during the session.

At the reopening of school in September thirty-four pupils of the previous session were off the roll. Some had graduated, others having completed the required time in School were written off, a few remained home on account of illness and several who should have returned were kept home by their parents on account of the scarcity of help. Thirty-seven new pupils were enrolled during the present session, making the total number on the roll at this date 262.

The total deaf population of the Province, according to the census of 1911, was 1,410, and, as the census returns show that the tendency is towards a decrease in the number of deaf, this number may be taken as approximately correct at the present time. Estimated on this the attendance is 18.5 per cent. of the total deaf population which is nearly as high a percentage as that obtained in the public schools, and shows that the parents of deaf children are taking full advantage of the opportunities provided for their education.

The Expenditure

In my last annual report a statement was included showing the comparative cost per pupil for the years 1905 and 1916, and I am again including the same statement with the addition of the cost for 1917 as shown by the Bursar's statement of this year.

**Comparison of Weekly Cost per Pupil for the Years 1905, 1916 and 1917,
as per Bursar's Statements**

	1905.	1916.	1917.
Medical Department	\$0.03	\$0.01	\$0.03
Butcher's meat27	.34	.34
Flour12	.12	.18
Butter and milk21	.34	.37
General groceries23	.23	.27
Fruit and vegetables07	.11	.11
Bedding and clothing06	.04	.05
Fuel58	.93	1.78
Light08	.06	.08
Laundry07	.07	.07
Books and apparatus04	.08	.09
Printing, postage, etc.08	.03	.06
Furniture06	.02	.03
Farm09	.06	.16
Repairs10	.05	.06
Sewage Works03	.01	.01
Water08	.07	.07
Miscellaneous10	.08	.09
Salaries and wages	2.12	2.72	3.05
Total	\$4.42	\$5.37	\$6.90

A comparison of these figures will show that, with the exception of a few items, the weekly cost has remained very much the same for the different years and that where considerable increases are shown, such as in flour, fuel, salaries and wages, they are the result, in the case of flour and fuel, of the extraordinary conditions due to war, and, in the case of salaries, to the enlarged staff necessary to the proper work of the School and the general advance in salaries in all lines of work. The increase in the item of fuel is caused by the very high price of slack coal and the buying in advance and storing of a sufficient supply to avoid a shortage.

The Work of the Session

The regular work of the School was carried on in twenty-two classes with a staff of twenty-three teachers, and was marked by very earnest work on the part of the teaching staff. This, together with absence of disturbance of classes, made the progress very satisfactory.

Four of the five pupils composing the entrance class of the previous year returned to school at the re-opening in September, 1916, and were duly graduated in June. All have since secured employment at very lucrative wages.

The entrance class consisted of twelve oral and seven manual pupils and of these fourteen succeeded in passing the examination and thirteen have returned to school for the final year. One of this class, a boy of sixteen years of age, who was six years in school, was, through the courtesy of the Board of Education, admitted to the Belleville High School in September. He is taking up the ordinary matriculation course, including French and Latin, and reports received show his standing as well above the average in a class of thirty-six pupils. This demonstrates that well taught oral pupils, after reaching entrance standard, are capable of taking up successfully, and without great difficulty, ordinary high school work. We are, therefore, now ready to take another step forward and the time has come when a regular high school course should be established in order that our deaf pupils may have equal advantages with those of hearing children.

Recent Graduates

All of our recent graduates are reported constantly employed at very good salaries. During the last two years several of our young men have obtained positions in the postal service and others are filling equally good positions, and, what is perhaps more important, all are giving in their different lines of work satisfactory service. Two of our young lady graduates were given appointments this year in the Toronto Post Office and three others are employed as operators in the Great North-Western Telegraph Company. This is the first time in Canada that girls have been employed in these positions and it is highly gratifying to us to know that their course here fitted them for such, and that they are all not only giving efficient and highly satisfactory service, but are appreciated as well by the officials for their splendid deportment and genuine fidelity to duty.

The Farm

The operation of the farm during the past session was somewhat handicapped by the scarcity of efficient help and the difficulty of organizing the work of the enlarged farm under these conditions. The yield from field and garden crops was above the average for previous years, and the dairy and poultry products were sufficient to supply our needs. The apple crop, which is the main one of the new farm, owing to the unfavourable climatic conditions of the spring months, was almost a total failure, being only about twelve per cent. of a normal crop. This yield was about equal to that of the orchards throughout the Province, so that our apple failure was not exceptional. Notwithstanding the farm help difficulty and poor return from the orchard, the farm, on the whole, was operated at a fair profit, and our pupils benefited by the abundant supply of fruit, vegetables, milk and eggs, fresh from the farm. The milk supplied to maintenance would alone, if purchased at eight cents a quart, amount to \$3,859.12, and the total products of the farm supplied to maintenance, or sold, or on hand at present, would, at current prices, show a total value of \$7,822.02. With a better organization of the enlarged farm and more favourable fruit conditions, a much better showing may be expected in future years.

The reports of the Literary Examiner, Mr. H. J. Clarke, and the School Physician, Dr. W. W. Boyce, which are appended hereto show that both the academic work of the School and the physical condition of the pupils are well up to the standard of former years.

The work accomplished and the efficiency obtained is largely due to the hearty co-operation of the staff, many of them working to the full limit of their capacity, and in concluding this report, I wish to thank particularly the teaching staff for their earnest efforts and their enthusiastic support of all measures for the improvement of the School.

I have the honour to be,

Sir,

Your obedient servant,

C. B. COUGHLIN,

Superintendent.

Belleville, Oct. 31st, 1917.

LITERARY EXAMINER'S REPORT

TO THE HONOURABLE R. A. PYNE, M.D., LL.D.,

Minister of Education for Ontario:

SIR,—I have the honour to present for your consideration, my report on the Literary Classes at the Ontario School for the Deaf for the current school year. The Inspection was made on April 10th, 11th, 12th, 13th and 16th.

This is really two schools under one management, and consists of an Oral Department with sixteen teachers and supervisors, and a Manual Department with six teachers. The Oral Department is composed of those pupils who are able to take instruction by means of lip-reading, while the Manual Department is made up of those, who for any reason are found to make better progress when taught through signs, etc. When I first visited this School officially, nine years ago the manual classes far outnumbered the oral classes; as seen by what I have just stated, the conditions are now reversed, and this gives a very fair estimate of the improvement during that period in the methods of instruction among these children who are deprived of hearing. Whether or not the manual classes have reached a minimum I am not able to say, but it is my opinion that there will always be some deaf children who will have to be taught by this method, but for the best progress in oral work, the two departments should be entirely separate.

With so large a staff, to attempt to give a minute description of my visit to each class would make a report far too voluminous. I will, therefore, confine myself to a few outstanding points; but before proceeding to these, I wish to assure you that the high standard of former years has been well maintained, and, in my judgment, the School, as a whole, is on a higher level to-day than at any former visit.

The class preparing for High School Entrance this year numbers nineteen, eleven girls and eight boys, part coming from the Oral Department and part from the Manual Department. The work is in charge of Mr. Campbell and Mr. Stewart who divide the subjects between them. I spent a whole day with these pupils and saw work of entrance standard well done. The final examination results in this class may not equal the record of the past two years, for some of this class have been brought along rather rapidly, but they are working hard and I sincerely hope that their industry may be rewarded.

To one dropping in only occasionally as I do, it seems simply wonderful the accuracy attained by these children in lip-reading, in all the oral classes from the tiny tots to the graduating class. The difficulty in lip-reading will be appreciated if we remember that good authority says that we see only about forty per cent. of a conversation on the lips. I was particularly interested in an experiment that is being tried out this year by Miss Deannard, Miss Palen and Miss Aherne. These ladies are testing out the Muller-Walle system of lip-reading with junior pupils. This, as you know, is a system primarily intended for adults, but the test is demonstrating that it can be successfully used with children. I saw a class who have been trained by this system for this year only, read a story freely from the lips of their teacher.

A new feature has been added this year in a post-graduate course, as it were, for those who have left with Entrance standing, and a few others who, in the opinion of the teachers who know them best, would be benefited thereby. The course consists in a reading course under the able direction of Mr. Stewart. In each issue of the *Canadian* there are a number of questions that the class answer in writing. Their

answers are read and criticised and corrected by Mr. Stewart. For this year the questions are based on the High Roads of Literature and the High Roads of History, and in addition each issue has a list of what Mr. Stewart calls "search questions." These can be answered in part from general reading. Twenty-two are taking advantage of the course, which shows that the effort is appreciated by the students of former years.

During the year, or rather since my last visit, there have been some changes in the teaching staff. Miss Keating and Miss Wheeler who were trained at the Buffalo Training School for Teachers of the Deaf, and Miss Hitchcox have been added to the staff. Miss James, who was ill at my last inspection, has returned to duty, while Mr. Balis and Miss Campbell have retired from the staff.

The discipline here is all that could be desired. The pupils are obedient, respectful and industrious. A visitor could not but be struck by the attention and interest of even the smallest of these children. They appear very anxious to learn, and very appreciative of what is done for them.

I do not intend to particularize, although I have full notes in respect to each and every class, but the one thing that appealed to me in practically all classes is the increased ability in the use of language. I have no doubt that this is due, in a large degree, to the reading that was introduced a few years ago and now forms an integral part of the course of instruction.

Since my visit was in the nature of an inspection rather than an examination, I cannot give the relative standing of individual pupils, but there will be a written test at the close of the session, and the marks then taken by each pupil will be available should you desire them.

In concluding this report, I wish to express my appreciation of the kindness and attention of the Superintendent and officers and teachers during my stay among them, in the discharge of my official duties. The work was carried on in much the same way as I would inspect a Public School and every opportunity was afforded me to examine into the work of pupils and teachers. Any information that I required was given most cordially, and I sincerely trust that I was able to say or do something that will assist some of these teachers who are giving their best effort in their work.

I have the honour to be,

Sir,

Your obedient servant,

H. J. CLARKE, B.A.,

Inspector of Public Schools.

Belleville, April 26th, 1917.

PHYSICIAN'S REPORT

TO THE HONOURABLE R. A. PYNE, M.D., LL.D., M.P.P.,

Minister of Education for Ontario:

SIR,—I have the honour of presenting herewith my report on the health conditions of the Ontario School for the Deaf for the session of 1916 and 1917.

At the opening of school a considerable number of the children were ailing in many ways, their physical state being below par. This is a condition we have always

at the opening of school, but these children very soon show improvement under the systematic care given them in every way here. There are some whose condition is such as to warrant no hope of restoration to health. These we endeavour to improve, make as comfortable as possible and by judicious care and treatment enable them to continue at school.

We have been fortunate in escaping the infectious diseases which occur so frequently among children, particularly where so many are brought in contact at school age, and when they come from various parts of the Province, often from places most unsanitary.

We had one case of whooping-cough. In November and also in January we had several cases of broncho-pneumonia. Some very dangerously sick but all recovering. In the latter month there were many down with la grippe, generally mild though several were quite severely ill. One little girl with inflammatory rheumatism was long sick and on convalescing was returned home. In December typhoid fever broke out. There were three cases all of a mild form and all recovering. Later we had several cases of para-typhoid, none at any time severe or dangerous.

I regret that I have to chronicle the death of one little boy—Harry Month. He was suddenly taken with convulsions and died the following day.

In April Victor Reading was taken with acute appendicitis and was operated on at Belleville Hospital, recovered and returned to school.

In May one little girl who had contracted a cold, soon after developed facial paralysis and was sent home where she recovered. We also had two boys with valvular heart disease.

Many of the cases above mentioned were allowed to return home during convalescence.

Besides the cases herein reported we have had about the average of general ailments, always quite a number who are constitutionally feeble or have some inherited constitutional taint and who require particular attention a good deal of the time.

Among the staff who have been sick I would mention Miss Willoughby with bronchitis and general prostration. Mr. Pearce, the Bursar, was laid up for several weeks with an injury to the leg. Mr. Minns, the boys' supervisor, from failing health, was obliged to relinquish his work. Everything possible was done to restore him, but without avail, and after several months of suffering he passed away on October 8th last.

The health of the children at the close of school in June was very satisfactory, and with few exceptions they returned home in excellent health.

I have the honour to be,

Sir,

Your obedient servant,

W. W. BOYCE, M.D.

Belleville, Nov. 1st, 1917.

APPENDIX Y

ONTARIO SCHOOL FOR THE
BLIND

ANNUAL REPORT OF THE SUPERINTENDENT

TO THE HONOURABLE R. A. PYNE, M.D., LL.D.,

Minister of Education for Ontario.

SIR,—I have the honour to transmit herewith the Forty-sixth Annual Report of the Ontario School for the Blind, Brantford, for the year ended 31st October, 1917.

I have the honour to be,

Sir,

Your obedient servant,

W. B. RACE,

Superintendent.

In preparing a report of the Ontario School for the Blind for a period of twelve months, ten of which were under the very energetic management of my predecessor, Mr. C. W. James, who has returned to Toronto to resume his duties in the Department of Education, and to assume the additional responsibility of Secretary of the Provincial Superannuation Board, I find it necessary to refer to the Report of 1916 and make comment upon the various improvements in connection with the school which were due to his resourcefulness and ability in organization.

I assumed the duties of my position on September 1st, and as the pupils did not put in an appearance until September 24th, I had an opportunity meanwhile to devote myself to a study of the official records covering a long period of years and to get in touch with the immediate problems of organizing and managing a school for the blind, relying upon a previous experience of twenty-five years in the academic, technical and industrial work of High Schools.

Permit me to acknowledge here the courtesy and kindness of both Mr. James and Mr. Gardiner in their readiness to assist me when called upon in familiarizing myself with the routine followed in the school for many years. Owing to the lamentable death of Mr. Wickens, the vice-principal, I found this co-operation of much help to me.

I had been led to believe that the blind were in a class by themselves, that they were unreasonable, selfish and exacting, and that no educational experience, however valuable, would be of any real assistance in dealing with them. I have

pleasure in reporting that I have not found them a different order of human beings, but young men and women readily responsive to suggestions in their own interests, hungry for knowledge, and just as capable of appreciating the value of a cultured mind as their seeing brothers and sisters. Naturally they feel that they are at a disadvantage in competition with the seeing for places of preferment and in pursuit of their chosen occupation in life, and they are made to feel this at times with a thoughtlessness and brutality on the part of the seeing that is highly discreditable to them.

Attendance

The registration of pupils during the twelve months of the official year, from November 1st, 1916, to November 1st, 1917, was 127, of whom 53 were girls and 74 boys. The total number of pupils who enrolled upon the opening of the School, September 27th, was 106, of whom 43 were girls and 63 boys. This shows a decreased attendance from the previous year. The average attendance for the school session was 110, a decrease of two from the year before.

Death of Mr. W. B. Wickens

The sudden death of Mr. W. B. Wickens, who acted as vice-principal of the School for so many years, came as a great shock to his many admirers among the pupils and ex-pupils of the School. It is my misfortune never to have had the privilege of meeting and associating with this much beloved member of the staff and I am grateful to Mr. H. F. Gardiner for the following appreciation of a man with whom he was intimately associated for many years.

"With great regret I have to record the death of Mr. W. B. Wickens, head teacher in the School for the Blind for more than forty years, who passed away on Saturday, August 4th, 1917, at his residence on Palmerston Avenue. Walter Barton Wickens was born in Brantford July 12th, 1845, his parents, Stephen Wickens and Phoebe (Mellish) Wickens, who were of English birth, having come to Brantford in 1842. Stephen Wickens was accidentally drowned in the Grand River in 1855, leaving to his widow the care of seven young children, five of whom lived long enough to repay as best they could, the labour and affection bestowed upon them by their good mother, who died in her ninetieth year. Educated in the Brantford Schools and the Normal School in Toronto, Mr. Walter Wickens began teaching while still in his teens, first in Wellington County, then for a time in Iowa; and he was employed in Public School work in Brantford in 1875, when he was invited by Principal Hunter to assume the position in the Ontario School for the Blind, which he occupied until his death. As a teacher Mr. Wickens was thorough, efficient and faithful, never satisfied until he was sure that the pupil clearly understood the subject under discussion, and not grudging extra time and labour in helping the dull ones, or those who were handicapped by some disability in addition to their blindness. In matters of discipline he was firm, though invariably kind, and he had the affection, as well as the respect, of the generations of pupils whom he taught. Besides his work as a teacher, Mr. Wickens had charge of the Circulating Library, and for several years before his death he held the position of Assistant Principal. By reason of his long connection with the School, and his never ceasing interest in the welfare of the blind whom he had taught, he was a repository of information regarding the abilities, the successes and the failures of ex-pupils. He attended many of the conventions of the American Association of Educators of the Blind; at the convention in Berkeley, California, in 1915, he and Mrs. Wickens were cordially greeted by many of their old friends and associates from Schools for the Blind in

the United States. Mr. Wickens was married in 1873 to Miss Sarah Clarke; secondly, in 1876, to Miss Whillena Walsh; thirdly in 1887, to Miss Mary A. Walsh, who survives him. His first wife left one son, Dr. Arthur E. Wickens, of Hamilton. The son of his third wife, Mr. Vincent Wickens, died of typhoid fever at the age of twenty-one. Besides his widow and son, there are left three brothers and one sister, Albert M. Wickens, of Toronto; George Wickens, of South Tacoma, Wash., and Herbert B. and Emily Wickens, of Hamilton. The funeral services were held on August 6th at Brant Avenue Methodist Church, of which Mr. Wickens was a member and a valued official, and the body was interred in Greenwood Cemetery, Brantford."

IN MEMORY OF MR. WICKENS

Like rivers which glide through the valley,
Refreshing the trees and the flowers,
His life glided peacefully onward,
Improving and cheering the hours.

For He who gave sight to the sightless
Had sent him to brighten our way,
And hearts which had drooped in the shadow
Were brought to the regions of day.

For forty long years did he labour,
Employing his every resource,
To smooth out the pathway of knowledge
For those who should follow its course.

And those who have heard his mild teachings
Will ever deep gratitude feel
For lessons so simple and childlike,
Which yet so much wisdom reveal.

How great was the sum of his knowledge,
Yet how unassuming he was,
As, day after day, he devoted
His talents and time to our cause.

He saw all the good in his pupils,
Left others to search for the ill;
He lived, not for self, but for others,
Submitting himself to God's will.

And thus, in the midst of his duties,
He peacefully passed to his rest—
His labour of love was accomplished,
And many through him had been blest.

And though we are lonely without him,
In fancy we hear his kind voice:
It bids us be true to his teaching,
And meet him where all shall rejoice.

And though he has gone from our circle,
To serve in a happier sphere,
O Lord, let the lessons he gave us
Bear fruit in our humble lives here.

WINIFRED DAVISON,
Pupil, O. S. B.

Changes in the Staff

Mr. Wickens' place on the staff was filled by the appointment as vice-principal of Mr. G. A. Cole, for many years principal of the Orillia Public School, a man of splendid educational experience and well qualified to take up the work where his predecessor left off. Mr. G. S. Temple, supervisor of the boys, has been succeeded by Mr. John Pollock, who has had experience in Y.M.C.A. work. Mr. Ostler, instructor in violin music, has been succeeded by Miss Marjory K. Jones, who devotes part of her time to the violin and part to the piano. In the Industrial Department a new teacher has been added, Mr. Charles E. Tooth, as instructor in shoemaking, shoe repairing, etc.

Literary Classes

I find that the work in the Literary Classes has been conducted with a certain measure of efficiency, but in rather an aimless manner, owing to the fact that there has been no clearly defined division of classes, nor has there been a division of the work among the teachers calculated to secure the best results. With the object of improving these conditions, I have organized the pupils as well as it could be done from the reports of their standing available, into classes corresponding to the grades in the Public Schools of Ontario, and have assigned one teacher to each class with the idea of following the public school programme to its completion. I am aware, however, that many difficulties lie in the way, but I can see no reason why the pupils of this School cannot pass the Entrance examination in every subject except drawing, in the place of which the Department of Education could easily substitute one of the subjects in the industrial course or in the department of music. The examination for entrance to High School having been passed, the work of the High Schools could be introduced and the pupils who have been present in the School for some time could be saved the monotonous iteration of elementary work and prepare for an examination more in harmony with their maturer minds.

I have to thank Mr. Burt of the Brantford Collegiate Institute for his courtesy and co-operation in admitting certain of our classes to the school of which he is the head. Many of the older pupils have never had an opportunity of knowing how the classes were conducted in our Public and High Schools, and I feel quite confident that these lessons taken in a school for the seeing will be of great interest and advantage to them. In fact, they have expressed themselves as delighted with their visits to the classes in such subjects as English Literature, English Grammar, and Geography.

This suggests the possibility that, with a growing school and a good showing at the Entrance examinations, some arrangement might profitably be made for certain of the more ambitious students taking part of their High School course in the Brantford Collegiate Institute.

Improvements in the Dining Room

Among the changes which I have seen fit to make was the introduction of white table cloths, table napkins, and a better quality of cutlery for the older students

in both dining rooms. The oilcloth coverings and plain tableware were too suggestive of certain public institutions where the educational advancement of the inmates is not the first object of those in authority.

Provision has also been made for the teaching of table deportment, so that our young men and women, on leaving school to take their places in the world among seeing people, will not feel embarrassed by their lack of knowledge of the essentials of good breeding, with a consequent resentment at the school where they spent the greater portion of their lives, for failing to equip them in this respect.

I am glad to report that the pupils have taken very kindly to the suggestion that instruction should be thus provided. It has been my pleasure since assuming my duties here to dine with several blind persons, visitors to the School, and I have been charmed at their ease of manner and graceful bearing; acquired from habits formed under favourable conditions in well conducted schools and homes.

Swimming Exercises

Through the courtesy of Mr. G. H. Williamson, of the Brantford Y.M.C.A., the privilege was extended to the older boys of our School to use the Y.M.C.A. swimming tank once a week between the hours of seven and eight.

This privilege has been hailed with the greatest delight by our students, and I have felt quite reassured in permitting them to accept the courtesy, as their Supervisor, Mr. John Pollock, was, previous to his appointment, the instructor in swimming at the Y.M.C.A. in the City of Baltimore. Every precaution is being taken to safeguard the boys from accident, and they are deriving much benefit from the advantage of this addition to their physical training.

Discipline

I am pleased to report that there has been no occasion for the exercise of rigid discipline in any respect. I have found the pupils responding to my suggestions for improvements in their interests with more readiness than I had been led to expect, and they have accepted without a protest the withdrawal of privileges which had been theirs for years.

One of these privileges has been in the use of tobacco. It has always seemed to me to be inconsistent with good discipline in a school of any kind to give sanction to the habit of smoking and chewing tobacco. I am strongly of the opinion that the parents and guardians of the younger pupils have a perfect right to have their children, while they are at school away from home, protected from the influence of a bad habit of any kind, if such can be done by regulation and example, and I want them to feel that their boys will not, at this School, look forward to the day when they too, by virtue of their advancing years, may indulge in the habit of smoking with the permission of the school authorities. For that reason I have abolished the privilege, and in so doing I am not unmindful of the fact that here, as elsewhere, there will be infractions of the rule, but I have reason to believe that I have the co-operation and the gratitude of many of the worst offenders in this respect.

New York Point versus Braille

The pupils of the Ontario School for the Blind have since its establishment many years ago been instructed in the New York Point Print system of reading, and I find from a perusal of the reports at various conventions and from conversations with those who have the welfare of the blind deeply at heart, a strong desire for the introduction of the British Braille. This desire is partly due to the fact

that the Brantford School seems to be alone in the British Empire in not using the Braille, and partly to a desire for the wider field of literature which that system offers. To this may be added the fact that resolutions have been passed urging the adoption of the British Braille, with certain modifications, in the United States and Canada, as a means to uniformity, and to discard all other systems.

It is, in my opinion, a much to be regretted fact that there has been such a conflict in opinion for so many years regarding this very important matter, and anything that will tend to providing a uniform type and doing away with the confusion at present resulting from the use of different systems is to be welcomed. I quite approve of the suggestions made for uniformity, and without taking time to discuss the relative values of the various systems, strongly recommend that this School adopt, as soon as possible, the revised British Braille instead of the New York Point.

The adoption of this new system will, naturally, for a short time, result in more or less confusion, as it is not to be expected that either pupils or teachers can readily transfer their allegiance or their liking from the one to the other. But the younger pupils can be instructed in the Braille system, and I am hopeful that the necessary books and teaching helps can be procured for that purpose with as little delay as possible.

Typewriting

There has been a desire on the part of many pupils for increased facilities for the teaching and practice of typewriting. In response to this need I have discarded the antiquated machines which were in use and put in their place the latest up-to-date machines. The work in typewriting has been very satisfactory, and I am hopeful of good results from this very important part of the educational training of our students.

The Pupils' Clothing

One improvement which would tend greatly to lessen the inconvenience and annoyance to all concerned with the School, would be to insist on all pupils bringing with them an assortment of clothing which will at least carry them from one term to the other. It is my opinion that when pupils are provided with their board and their education free of charge, to say nothing of minor incidentals, that their parents should provide them with a sufficient supply of clothing to ensure a respectable appearance and to preclude the danger of their suffering from the inclemency of the weather. It is just as important a feature of a boy's education to develop in him a sense of responsibility, self-respect and self-reliance, as it is to instruct him in the English language, and to accustom him to have all his whims gratified and his wants filled at the public expense is a poor equipment with which to start him out in life to meet the competition of a keen and exacting world. I would, therefore, recommend that each pupil should be required, before being admitted in September, to bring with him a stated list of articles of wearing apparel, submitted by the Matron as necessary. This will save much correspondence with parents who have been in the habit of sending their children to school improperly clad in the expectation that somehow or other they will be provided for by the School for respectability's sake.

The Hospital Ward

Among the many improvements projected by my predecessor and completed since my appointment, the most important is the setting apart of several rooms on the third floor for a school hospital. These rooms are far removed from the hurly-

burly of the school-rooms and corridors, and afford a splendid retreat for those who are temporarily indisposed, as well as for those who are suffering from a more or less protracted illness. The rooms have been tastily and neatly furnished, and in appearance have all the attractiveness of the very best equipped up-to-date hospital. A well qualified trained nurse has been placed in charge and her presence there has been a source of great relief to the doctor and the principal, as her services have been of the utmost value in emergent cases. At present writing, one young lad is under her care suffering from a broken arm, the result of an accident sustained by his being too venturesome when sleigh riding.

The Pipe Organ

It has been a disappointment to all interested in the Department of Music that there has been such a delay in the installation of the new pipe organ. This has been due to the difficulty of assembling the parts necessary to its construction, and the pupils have thus been deprived of the instruction which they had looked forward to for some time with eager anticipation.

The Boys' Club

It will be interesting to know that the spirit of response on the part of the boys has been shown in the organization of a club known as the O.S.B. Fraternity Club. The club has for its object the development of a good feeling between the pupils and the members of the staff, the discountenancing of profane or obscene language, the encouragement of the pupils in observing all the rules of the School, and a general improvement in the tone of the Institution.

A club room has been fitted up for their use; keys have been furnished the members; appropriate fraternity pins are worn; games, such as checkers, chess, dominoes, cards, bagatelle, have been introduced, and it is their intention to hold social evenings occasionally to which they will invite boys of their own age from the schools of the city.

The Farm

The farm improvements which were reported last year as being under way have been carried to an almost successful conclusion. The new barn is a model of comfort and convenience, and the arrangements for the storing of the root crops and the housing of the stock are admirable. The chicken coops, modelled after the latest design from the Ontario Agricultural College, present an attractive appearance, and the poultry raising industry has been an unqualified success, from the incubator on. It has not been of as much benefit from an educational standpoint as had been anticipated, but this is due rather to a disinclination on the part of many pupils, who elected to devote their attention rather to the broom-making, chair-caning or shoe repairing industries, or to the pursuit of their musical studies in its various branches.

The root crops were very satisfactory and nearly one thousand bushels of choice potatoes are safely stored away for the use of our School during the winter months. What can't be eaten will be sold to advantage. It was found necessary to purchase for use on the farm a new team of horses, and I am glad to report that at a very reasonable price a team was found to satisfy the most exacting critic in connection with the Institution.

Concerts

I find by referring to the records that a very successful bazaar was held in the School April 3rd, and on the evening of the same day a grand concert was held in aid of the Patriotic Fund of the City of Brantford. The following account from the Brantford *Expositor* will be of interest:

SALE OF WORK AND CONCERT AT O.S.B. A REVELATION TO CITY PEOPLE

Wonders Accomplished by Pupils Deprived of Sight, as Shown by Exhibits of Manufactures—Splendid Concert Programme Furnished in the Evening to a Large Audience.

Unknown, perhaps, to a majority of the people of the City of Brantford is the marvellous work being done at the Ontario School for the Blind. Here, although destitute of the sense of sight the pupils are daily turning out work in sewing, knitting, crocheting, beadwork, willow furniture and fancy basket work that was yesterday afternoon a revelation to the hundreds who took advantage of the bazaar and sale of work to visit the School. Yesterday attractions were somewhat of an innovation and was for the purpose of raising funds for the Patriotic Fund. The bazaar in the afternoon was followed by a big concert given by the pupils in the evening, further testifying to the wonderful ability and the effect the training at this Institution has on the young people who are unfortunate enough to be deprived of the use of vision.

That upwards of \$350 was realized by the sale of work and the following concert makes it readily apparent that the object set out for was most successfully attained, and the Patriotic Fund will be further enriched. At the time of the raising of the Patriotic Fund the feeling got abroad that the School should be represented. As individual subscriptions were out of the question the principal, Major C. W. James, hit on yesterday's departure as the solution. Now, thanks to unstinted efforts of pupils, teachers and all concerned with the School, who willingly sacrificed their time, the School furnishing the material, it resulted in one grand success.

Crowds packed the main building in which the sale was held yesterday afternoon and the big auditorium was filled for the concert in the evening. The building was prettily decorated and tables arranged with the different work of the pupils shown. A rest and music room, tea room, and ice cream parlor were all run, with a fish pond for the younger people. The teachers, assisted by the older pupils, had charge of the tables. Nearly all of the work shown was sold during the afternoon. The concert in the evening, although lengthy, was one round of delight. It was practically wholly put on by the pupils, the only outside talent being Mr. Hartwell de Mille, noted vocalist of Toronto, and his accompanist, Miss Madge Williamson, of the Hambourg Conservatory of Music, Toronto. The work of the pupils was perfect and the finishing touches were added by the visitors. Major James, in his own genial and witty manner, made a pleasing chairman, and Capt. W. Norman Andrews, the musical director, to whom much of the credit for the brilliant success of the concert goes, directed the children.

THE SALE OF WORK

Exhibits of willow work, fancy basket work, sewing, knitting, crocheting, beadwork, home-made cooking and candy were all shown and studied minutely by the throngs who came with purse strings unloosed to the great delight of the salesladies. The willow work exhibits were probably the most extensive and positively marvellous. To the lay eye it was beyond understanding how some of the pieces of furniture shown could be turned out by the young people with sightless eyes. There were tables, stands, baskets, flower baskets, pots, trays, chairs, lamp covers, and, in fact, furniture of every description. One big couch attracted much interest. It was for a verandah and was made of a wood fibre which has been invented to take the place of reed. The willow work is in charge of Mr. W. B. Donkin and he obligingly explained the new invention for a reporter. Before the outbreak of war nearly all the reeds used in the manufacture of furniture were procured from Germany. However, thanks to an American inventor, this fibre was invented and it is an excellent substitute he states. The work here compares most favourably and even, excels work done by men with the full use of their sight. Most of the furniture shown was sold.

A very interesting showing was that of the beadwork. It was in charge of Miss Cronk, who is the instructor of this and also of point printing. She had an exhibit of which critics said it would be no exaggeration to say "No finer beadwork has been

shown in the world." A dainty bead cup and saucer and lamp shades, as well as dozens of other pleasing articles, were matters of delight.

The knitting and crocheting exhibit was in charge of the Misses Haycock, Hilda Young, Gilbert and Harrington. Shown here were beautiful pieces of work, including slippers, gloves and balls. The Misses Scace and Wright had charge of the home-made cooking and its worth was attested by its ready sale. All the cooking was done by the domestic science class. The sewing was wonderful. Everything ladies wear, as well as knitting bags and other articles of the finest work, were shown under the direction of Miss Ella Cooper.

The tea room was in charge of the matron, Mrs. M. E. Stewart, her assistants being the Misses Radcliffe and Kavanagh. Tea, coffee, cake, sandwiches and ice cream were dispensed here and the room was catering to capacity business all the time. The candy table did a big business. It was in charge of Miss Smyth, who was assisted by the Misses S. Miller and A. McGillivray. Messrs. Wickens, Hickey and Temple had charge of the ice cream parlor.

A wonderful interest had been displayed by the children themselves throughout all the preparations for the day, and yesterday it was refreshing to see the enthusiasm with which they entered into the spirit of it. Little girls sold candles, while the older boys assisted with the willow work and the girls at the various tables. Under the direction of Capt. Andrews the children gave vocal solos and played the piano and organ, and much surprise was evinced at their cleverness. C. W. James, Jr., was in charge of the music and rest room. The fish pond attracted lots of dimes and was in the capable hands of Miss Elda James and Miss Jessie Burden.

THE EVENING CONCERT

In the evening a delightful entertainment was given by the pupils, assisted by Hartwell de Mille and Miss Madge Williamson, of Toronto. For three full hours the pupils, with a wide variety of piano selections, vocal selections, violin numbers, recitations, a dialogue and a sketch, kept the large audience in a pleasurable state of mind and continuously applauding. Encore after encore was begged for, but the length of the programme, there being over twenty numbers on it, prevented many of these. Capt. Andrews is deserving of great credit for the delightful concert, as all the offerings of the pupils were the result of the ordinary daily training. The pupils of the Institution have always enjoyed a high reputation for concerts, and they more than lived up to this last evening.

The programme was opened with a prelude and fugue from Bach on the organ by Roy Tomlinson, which was very well executed. The choral class of the School delighted with several numbers, "Peace to the souls of the Heroes" and "Multiplication is a Vexation." The voices of the children showed painstaking training from the exactness with which it was sung.

In a rich powerful voice Hartwell de Mille, one of Toronto's most popular baritones, charmed with his singing of "God Bless You My Friend," as an encore giving by special request "British to the Core." He had a magnificent voice and the audience could not get too much of him last evening. Excellent technique was shown by six pupils of the school—Susan Miller, Greta Lammie, Kathryn Sells, Mary O'Neill, W. Simmons and F. Steele—in a violin offering. Walter Lowe showed a fine expression in his rendering of "I'll Sing Three Songs of Araby."

Miss Madge Williamson, who accompanied Mr. de Mille, was called on by the chairman for a number, and she held the audience enwrapped while she played with wonderful taste and great interpretativeness. In a pleasing voice that delighted the ear Fred Steele sang "The Veteran's Song," being assisted by a chorus of boys. The piano solo, "Autumn," by Mary O'Neill, was feelingly rendered and Mr. de Mille was called on again. This time he had excellent scope in "Alone in the Deserts," and as an encore a pleasing little piece, "Nothin' but Love," was given.

MERCHANT OF VENICE

A more pretentious departure was then made, three of the pupils putting on Act I, Scene 3, from the Merchant of Venice. This was exceedingly well rendered, the acting of L. Sherman as Shylock pointing to great ability. S. Beach took the part of Antonio and W. Garlick was Bassanio, and both were good.

A number of piano solos and songs were next in order. Mr. de Mille had a delightfully varied repertoire and obliged with two more songs and encores. C. Patterson gave the piano solo "Two Larks," and Joe Smith showed much elocutionary power in the recitation "Beth Gerelt." The song "Catch Me," by Gladys Slay, was pleasing to the ear and well rendered. Susan Miller gave a piano solo, "Mazurka Japonaise," and W. Simmons, in good voice, the song "The Bandoliero." In the piano solo "Marche Hongroise," Kathryn Sells showed much ability as a pianist. Very pleasing was the vocal duet "Larboard Watch," by W. Lowe and W. Simmons. Both boys had fine voices.

COMEDY DIALOGUE

The concluding number on the programme was a big dialogue by Mrs. Sniggles and her family of seven daughters. Throughout this roar after roar of laughter was heard and Winnie Davison, as Mrs. Sniggles, the widow, showed herself to be a born elocutionist. Her handling of some very difficult English was good and evoked great laughter. One by one she extolled the virtues of her daughters, all of whom she had perform for the audience. One had the giggles, another asthma, another had been "jolted" in love and cried continually, while another had a "swan-like voice." It was a few minutes after 11 o'clock when the last number finished, but the audience had been well repaid for remaining.

Victrola and Player Piano

A victrola and a player piano have been introduced into the Assembly Hall to provide beauty as it can be revealed to our pupils in its highest form, through the medium of sweet music. I find that familiarity with high-class music does not breed contempt. Its power is mysterious. It thrills the soul and lifts it on exalted pinions as no other medium can. And they who are deprived of the blessings of sight are entitled to all the happiness and joy in life that such a moderate expenditure of money can provide.

If such great artists as Melba, Tetrizzini, Galli-Curci, Schumann Heinek, Caruso and others, were to appear in the living presence before an audience of the blind, they could scarcely be more real than they are in the splendid records of their best efforts now obtainable at a reasonable figure. And the player piano is, too, a most excellent aid for spreading the gospel of good music and developing true appreciation of it. To the students who are well advanced in their musical studies, the player piano is a source of much help. To those who are not so advanced it tends to create a desire for good music while their taste for it is still in a formative state. It has been suggested by somebody that too much time is devoted in our schools for the blind to high-class music and not enough to the rag-time of the music halls; where employment for musical talent is more easily obtained. I do not agree with this opinion. The rag-time artist has no soul and cannot rise to the heights of the artistic in music, whereas the artist can always, if necessary to gain his living, fall from the sublime to the ridiculous.

Piano Tuners

I have pleasure in reporting that during the fall months we were able, in response to a request from the manager of a well-known piano firm, to supply him with two pupils for the tuning department. I have been informed that they have been giving excellent satisfaction, and I hope in the near future, as others are trained and equipped, to find suitable employment for their talents in a similar field of honourable and productive labour.

Hallowe'en and Christmas Entertainment

The teachers and others connected with the School did everything in their power to make the evening of Hallowe'en an enjoyable occasion. Fairies and witches were unusually active. The costumes were cleverly devised and altogether the old spirit of Hallowe'en was caught and conveyed to the pupils in an interesting manner.

The night preceding the home-going for the Christmas holidays, a splendid programme was presented in the Assembly Hall. An admission fee of 25c. was charged and the proceeds devoted to making Christmas Day a happy one for the pupils who were unable to spend the holidays at home. The performance was a highly creditable one and elicited much favourable comment from those who were

present. An interesting short address was given by Mr. W. G. Raymond, a former pupil of the School, at present Postmaster in the City of Brantford.

On Christmas Day an impromptu programme was held, and suitable gifts were distributed to each pupil from a tastily decorated Christmas tree.

Visitors

In October the Library Association of Western Ontario, which was meeting in convention in the City of Brantford, paid a visit to the School. After listening to a short programme by several of the pupils, they examined thoroughly the various departments for the training of the pupils in industrial pursuits, and went away expressing themselves highly pleased with their reception.

The Removal of Sightless Eyes

I find that many of the pupils of the School have sightless eyes, which are not only a positive menace to their health, but an offence to all with whom they come in contact. It is frequently stated that the Ontario School for the Blind is not a hospital but a School, for which reason a mere educator of the blind should not be expected to concern himself with the removal of pupils' eyes. But anything that affects the welfare of the pupils in any respect should be a legitimate object of concern to those who have any responsibility for the education of the blind, and I should like to have the parents alive to the necessity of operations being performed. Mr. James took a deep interest in this question and effected improvements which have more than compensated for the expense involved. I have no hesitation in recommending a continuance of this policy and advise that, where necessary, the expense be borne partly by the Province when the burden is too heavy for the parent to carry.

Changes in School Routine

Among the changes in the order of the day's work, not the least important has been in the daily reading to the pupils. The practice has been to assemble the older boys and girls in separate class-rooms from eight to nine o'clock in the evening, where for an hour two teachers, wearied with their duties of the day, read to the pupils from the daily newspaper and from fiction. This I have found to be very wearisome both to the pupils and teachers. In its stead a brief resumé is made of the morning newspaper at roll call, so that the pupils may get the news when it is fresh without having to wait until evening to get a corroboration or denial of rumours which are bound to reach their ears during the day, when something of unusual interest has happened in the war theatre.

At seven in the evening the pupils, boys and girls, meet together in the Assembly Hall, where for an hour they listen to music and to reading from books and magazines or to story telling. I have enlisted the aid for this purpose of many of the citizens of Brantford, whom I wish to thank for their assistance in thus providing for our pupils a really profitable recreation after the studies of the day. These visits from outsiders stimulate an interest in our School and enable the pupils to get a few glimpses of the outside world during a term for the most part spent within bounds.

In concluding this part of my report I desire to express my appreciation of the fraternal greetings from several of the superintendents of Schools for the Blind in the United States and Canada. From Sir Frederick Fraser, of the Halifax School, I have received a cordial welcome to the profession, with the assurance that his many years of experience in teaching the blind were at my disposal.

The Portland Convention

As my predecessor, Mr. James, was unable, through pressure of work on the grounds, to attend the convention held last January in Portland, I am indebted to the courtesy of Mr. S. C. Swift, M.A., Librarian for the Blind, College Street, Toronto, for the privilege of taking the following extracts from his report of that gathering to the members of the Ontario Association for the Blind.

Report

The 1917 Convention of the American Association of Workers for the Blind opened its proceedings on the afternoon of Monday, June 25, 135 delegates being present from 23 States of the Union and 2 Provinces of Canada. From that moment till the afternoon of Thursday, the 28th, the meetings were continuous, interrupted only for a brief visit to the Maine School for the Blind, and a short cruise about the beautiful Casco Bay, on one of whose islands was situated the hotel where the delegates were entertained and where business was transacted.

Lest a false idea of the personnel of the convention should arise in the minds of those unfamiliar with the constituency of the Association it is well to state here that the delegates were not all blind, but included in their number superintendents and teachers in Schools for the Blind, secretaries and home teachers employed by State commissions for the blind, librarians, and superintendents of workshops for the blind. Complete understanding among the representatives of all those various activities was apparent from the outset, and the proceedings were characterized by a most striking absence of friction and discord. The central aim of all present seemed to be to learn and put into practice the lessons taught.

All the important papers presented to the Association will appear in extenso in the autumn number of the "Outlook for the Blind," and no attempt will be made here to do more than note the main points of topics considered in groups, leaving those sufficiently interested in our cause to consult the magazine referred to for particular details. The adoption of the group system naturally destroys the possibility of adherence to strict chronology, but permits of arrangement in order of interest or importance. With this in view the first topic dealt with here was the last on the regular programme, viz., the "Type Question."

The Type Question

For the information of our sighted friends a word or two of preliminary explanation is here thought necessary, in order that a clear perception of the true importance of this question in its relation to the blind of America may be obtained.

In 1835 Louie Braille, a blind Frenchman, perfected a system of dot printing and writing which has ever since borne his name. In 1867 this method was introduced into Great Britain by the distinguished blind physician and philanthropist, the late Dr. Armitage. It was gradually adopted by all the schools of the United Kingdom and became so modified (while retaining intact the original form of the alphabetic signs) that it has long been known in contradistinction to its parent as "British Braille." For a few years Braille was the only dot system known to the blind anywhere in the world, but in 1872 the late Dr. Russ, of New York City, conceived the revolutionary idea of so radically modifying it as to produce what is really an entirely new method. This new system Dr. Russ passed over for perfection of detail to the late Dr. Wait, Superintendent of the New York City School for the Blind. By him it was completed and presented for general adoption in

America under the name of "New York Point," or the "Wait System of Embossed Reading and Writing."

For fifteen years New York Point was the only method of "dot writing" in use in the United States, and it was even adopted by our own Ontario School for the Blind, thus cutting off our Ontario blind from the ever-increasing store of Braille literature appearing from the presses of Great Britain, and compelling them to draw their entire intellectual nourishment from the country to the south of us. About 1887, however, Mr. Smith of Boston, conceived a further revolutionary idea, viz., the second modification of Braille, which he presented under the name of "American Braille." Mr. Smith's system was adopted in preference to New York Point by a number of American schools, and at the present time nineteen educational institutions in the United States employ it, while twenty-eight (including the Ontario School for the Blind) adhere to New York Point. Thus we have the confusing situation of British Braille in our own Maritime Provinces, Montreal and British Columbia; New York Point in Ontario and our Middle West; American Braille and New York Point splitting the United States, while the National Library for the Blind of Washington, D.C., subsidized by the Federal Government to the extent of \$5,000.00 annually, is stocked with British Braille books. Could anything be more discouraging to those who have the true interest of the blind at heart, or more fraught with possibilities of misunderstanding and retrogression?

To put an end to this distressing state of affairs a "Uniform Type Commission" was appointed a decade ago in the United States. The Commission journeyed over America and Britain, making reading tests and found that British Braille led all other systems at a great distance. In view, however, of the antagonism of the Americans to each other and to the British on the "Type Question," and also because the British Braille, being a human invention, is not wholly perfect, the findings of the Commission could not result at once in the adoption of the better method until our American cousins could be convinced that no better system could be evolved. Two years ago at Berkeley, Cal., therefore, the Commission brought in its report and advised the adoption in the United States of a compromise system which it styled "Standard Dot" (nicknamed by the British, "Standard Rot"), which was put on trial in many of the schools. This invention, however, died in the cradle and the Commission were perforce thrown back on British Braille as the only solution of the difficulty.

At the Portland Convention, therefore, the Commission brought in its final report recommending the adoption of the British system through the entire range of its elementary grade (grade one) and the initial part of its secondary development (grade two) up to the point of the inclusion in longer words of whole-word signs which the British incorporate as syllables in polysyllabic words. The sign of capitalization, taught but not used by the British, is recommended for American printing, but no new signs are to be invented or introduced until a final agreement can be reached with the British Uniform Type Committee appointed some time ago to collaborate with the American Commission with a view of arranging minor differences and of making Braille really universal throughout the English-speaking world.

The Uniform Type Commission, after ten years of uninterrupted labours and the expenditure of thousands of dollars, has wrought the blind of America the inestimable service of inducing them to sink their personal prejudices for the general good and to adopt as the one universal standard that system of dot reading and writing now in use everywhere in the English-speaking world except the United States and the Province of Ontario.

166

The recommendations of the Uniform Type Commission were unanimously and enthusiastically adopted by the convention. All that remains is for the American Association of Instructors of the Blind to ratify the decision of the American Association of Workers for the Blind. This sanction is a foregone conclusion, since the decision of last month was largely the work of prominent superintendents of New York Point institutions, who have most to lose.

Your representative, knowing he voiced the general opinion of his countrymen, extended to the Convention the congratulations of Canada on its decision, pointing out the immense advantage it would bring to our schools and circulating libraries, the latter now being under the distressing necessity of dividing and subdividing its book-purchase allowance into so many minute portions that no system received its proper allocation of funds. The ultimate financial gain to the whole cause of the blind will be incalculable and the Commission and Convention are to be heartily commended on their patience and good sense.

The School and the Pupil

Under this general designation are here grouped the results of a number of papers and discussions dealing with the relations existing between the schools for the blind and their pupils and graduates.

It was alleged by graduates, and admitted by superintendents, that these relations were not always what they should be. Suspensions and expulsions for trifling offences (or worse for no real offence at all) have been altogether too common. Several instances of such unjustifiable dismissal from school were cited by the writer of one paper, in which the lives of promising youths were forever ruined because of blighted hopes and the inability of the subject to earn his bread with the help of the few odds and ends of industrial training received before being kicked out upon the world. In the best schools expulsion is resorted to only when all other means of correction have proved useless, and, in the interest of general discipline, the rebel must be got rid of.

Many failures among the blind are, however, not due to premature expulsion from school, but to the fact that, after graduation the blind musician, tuner, or handicraftsman, going forth with high hopes and limitless confidence in his own abilities and in the sympathetic consideration of the world, is too often totally unassisted by his Alma Mater, and soon discovers that mere hope is an empty name when brought face to face with organized and capitalized sighted labour. It was admitted that the schools did not do enough "follow-up" work in their efforts to be of assistance to their graduates, but a beginning has been made by several of the most enlightened institutions and it is certain that, in a not very distant future, a superintendent of a school for the blind, who does not maintain a properly organized "Follow-up Department," will be shunned by every sincere worker in the cause.

But follow-up work will fail of its full benefit unless the curricula, at present established in most of our schools, are so altered as to provide opportunities for more individual instruction along lines suited to the peculiar aptitudes of each pupil. Much of the absence of real success among us is as largely due to our being compelled to learn professions and trades for which we have no aptitude, as to the lack of intelligent assistance in getting started after leaving school. Thus our music departments are filled with pupils who will never make musicians; our industrial departments are crowded with boys who will never learn to make a salable broom or an artistic basket. A movement is now on foot, however, to rationalize courses

of instruction so as to permit of discovering individual abilities and then to provide facilities for developing these. The problem of the blind is, like that of the seeing, one of bread and butter. Keeping this in mind, Superintendent Chas. F. Campbell, of the Ohio School for the Blind, (Mr. Campbell is the son of the late Sir Francis Campbell, Superintendent of the Royal Normal College for the Blind at Upper Norwood, London), intends to offer facilities for those persons in his school, who wish to learn popular music, but who have neither ability nor desire to master the heavy classical stuff so universally crammed into all our blind music pupils. Mr. Campbell pointed out that the biggest salaries paid to sighted musicians, speaking broadly, are earned by members of hotel and café orchestras. "Why," asks Mr. Campbell, "should this field be closed to the blind?" It would be well for other schools to take a leaf from Mr. Campbell's book.

With this preparation and follow-up work is closely allied the question of co-operation with workshops for the adult blind. It was conceded that too much time was often wasted between graduation and entry into one of these shops. It was not argued that all blind industrials should seek employment there, for many would, if properly assisted and encouraged, find it possible to maintain themselves in their own home. But the school authorities should know, after several years daily observation, whether such a happy result would follow in certain cases, and if not, the less favoured worker should be placed in a suitable workshop with the least possible delay in order that he might earn something, at least.

Telephone Operating

Before leaving for Portland your representative called on the Bell Telephone Company in this city (Toronto), with a view of enlisting the co-operation of that corporation in our plan for securing instruction for blind girls on private branch switchboards. He was informed that blind persons could not possibly operate such boards and the alleged facts to the contrary were put down to the backward state of telephone development in the United States. During the Convention's consideration of labour problems your delegate asked pointedly whether the statement of the Bell Telephone Company of Canada were correct. He was instantly assailed with a chorus of indignant rebuttal. He was informed that in the City of Baltimore nine blind operators are employed; in New York City one totally blind and one partially blind girl are so employed (your representative had the pleasure of talking with both these young women and of seeing one actually at work); several girls successfully employed in Boston and Massachusetts cities and numerous additional instances were given to prove the error of the position of our own telephone authorities. But the most conclusive proof was given by the presence at the Convention of Miss Winchester, of Baltimore, a totally blind girl who herself operates the board and is the teacher of most of the other blind operators in her state. Miss Winchester assured your representative of the feasibility of our plan and further stated that the Bell Telephone Company, as represented in her own city, was most sympathetic and desirous of assisting the blind operators in every possible way. Is it possible that Canada is the last bulwark and defence of conservatism in all matters concerning the blind? Why is it so difficult to convince our governments and our business men that we have the intelligence and the ambition to do certain things to assist us in the earning of our daily bread? We do not claim the ability to do everything possible for the seeing, but why is it made so hard for us to secure the opportunity of doing those few things which lie within our power? Let the outstanding examples given by our brave blinded soldiers shame our sighted critics

(if no other feeling can do so) into giving us of the civilian order at least the privilege of a trial.

Work with the Seeing

For the past three or four years a determined effort has been made by the various state commissions to secure work for blind persons alongside of those possessing sight. The results as yet are small, but are sufficient to warrant hope. At present blind persons are employed in box factories, cigar factories, machine shops, candy factories, etc. The most hopeful work for intelligent blind persons, however, seems to be along the lines of salesmanship, and many instances were cited at the Convention proving the undoubted ability of a properly qualified blind person to successfully compete with sighted rivals in this field. Blind salesmen now travel the United States in every direction selling everything from magazines to mill supplies, and from teas and coffees to life insurance. Canada has a few examples of this sort of success, but she should have more and our Government should see to it that its school furnishes the necessary preliminary training in this respect.

The Blind in Public Schools

For some considerable time blind children have been educated in schools for the seeing in various parts of the world, but this movement has assumed the greatest proportions in the United States. Robert B. Irwin, the blind supervisor of the blind in the public schools of Ohio, gave some interesting details of this branch of our work. Blind and partially sighted children are taught in special rooms of certain schools in the principal cities of the State, the latter class being provided, where sufficient sight is present, with text-books printed in very large and heavy type. Manual training is given by the instructor of the normal children, while in Cleveland a special cottage is being arranged for domestic science work among the girls. Blind boy scouts are given the same training as the seeing scouts and go on their "hikes," have their corps, enter into their sports equally as well as the others. The State assists in the work to the extent of about \$250.00 per pupil thus educated, the other expense being borne by the cities from their educational funds.

Resolutions Adopted by the American Association of Workers for the Blind at Portland, Me., June 28, 1917

1. That the president appoint a legislative committee, and among other matters it take up the question of outdoor relief for the needy blind, draft a model bill and present the same to interested organizations, with the suggestion that they make use thereof in shaping their local legislation.

2. That we heartily approve of efforts for securing employment for the blind among the seeing.

3. That we cordially commend the policy of vocational guidance in schools for the blind and of the active interest of the management of such schools in the subsequent careers of their pupils.

4. That we recommend hearty co-operation with the national committee for the prevention of blindness in its work.

5. That the association urge upon the attention of existing agencies the necessity of making suitable preparation for efficiently meeting the needs of blinded soldiers.

6. Whereas, it is obvious that if practicable arrangements can be made, considerable economy and other advantages can be effected by co-operative buying of materials commonly used in the industries of the blind, therefore, be it resolved,

that the president of the association be authorized to appoint a committee of five to take the steps necessary to such co-operation.

7. The blind and sighted employees who are equally well qualified for their respective positions by temperament, education, training, skill and other requirements, should be accorded equal compensation for equal service.

8. That we endorse all that has been said concerning the value and desirability of co-operation between the students and faculties of schools for the blind and between workmen and the management of workshops for the blind.

9. That this Association express the gratification it feels in the knowledge of the steady growth of the home teaching of the adult blind, and that it record its unqualified belief that home teaching is successful in just the proportion that the home teacher is granted ample freedom in determining what shall be taught to each pupil.

10. That it is the sense of this Association that any attempt to return to the dual plan of school organization for the deaf and blind must be looked upon by those interested in the welfare of both classes as a step in the wrong direction.

11. That this Association express its approval of the earnest effort of the Commission on Uniform Type toward the solution of the important type problem, and that it express its appreciation in particular to N. C. Nigel, of New York City, for his excellent advice and liberal financial assistance in this matter.

12. That the Association adopt the recommendations of the Commission on Uniform Type for the blind as presented to the Association at the session on Thursday, June 29, 1917.

LITERARY EXAMINER'S REPORT

TO THE HONOURABLE R. A. PYNE, M.D., LL.D.,
Minister of Education.

SIR,—I have the honour to present my report on the literary work of the Ontario School for the Blind for the year 1916-17.

Changes

Since making my last report there have been several changes in and additions to the staff of the School. Mr. Gardiner, for many years principal of the School, found the work becoming burdensome with his advancing years and resigned to devote his leisure time to literary work. He has been succeeded by Major C. W. James, a very active and progressive man, who is devoting all his time and energy in the interests of the School. Miss C. Kavanagh, a former teacher in the School, has returned to take the work formerly taken by Miss Hanlon. Mr. Hickey replaces Mr. Maloney and Mr. Temple succeeds Mr. Green as physical instructor with the boys. There has been added to the staff Miss Young as Instructor in Physical Training and Dramatic Art. Mr. S. A. Bergey, B.S.A., as Instructor in the several departments of Agriculture and as Supervisor of the work on the farm; Sergt. Gourley as Assistant Supervisor of the boys. Sergt. Gourley has also charge of the Boys' Dormitory.

Organization

Several changes have been made in the organization of the School with the result that more effective work is being done by the pupils and the teachers expend less energy in getting results.

The classes have been made smaller; the pupils in the several classes are more nearly of the same mental age; the curriculum of study has been made to conform, as nearly as circumstances will permit, to that laid down for use in the schools of the Province; industrial work of a more varied character has been added to the course of study; considerable attention is also given to agriculture; systematic attention is given to physical training; the equipment of the School has been greatly increased.

Teaching

All the Literary teachers are normal trained and hold second-class certificates or better, except one. The teachers have their work carefully prepared and present it to the pupils by approved methods. They make better use of the equipment than formerly.

As a result of changes in organization and careful preparation of work the discipline of the School is good.

Work of the Pupils

I examined the several classes in Bible Study, Arithmetic, Geography, Literature, Grammar, History, Spelling, Hygiene, Writing, Reading, Typewriting, Telegraphy, Willow Work, Sewing, Knitting, and Darning, and found the pupils well up in their work and interested in it. The work in literature is now being taken largely from the reader and I notice the pupils are more interested in the shorter selections. The history was well presented and the pupils greatly interested. I noticed a marked improvement in grammar. The classes in arithmetic are now doing work that they never attempted before because of more extensive use of the slate. Great improvement has been made in physical training.

Notes

1. A marked improvement in the appearance and health of the pupils is very noticeable.
2. Principal James has given his personal attention to some boys who stammer with the result that they are practically cured.
3. The subject of Agriculture is receiving considerable attention and the work on the farm is being systematically organized. Increased production should result.
4. I was particularly impressed with the cleanliness observed in the bake-shop, the dining room, the dormitories and the School generally.

E. E. C. KILMER,

Inspector, Brantford Public Schools.

June 11th, 1917.

REPORT ON MUSIC

TO THE HONOURABLE R. A. PYNE, M.D., LL.D.,
Minister of Education.

Herewith I have the honour to submit my report as examiner on the Musical Department of the Ontario School for the Blind.

The examinations on which this report is based, took place on May 31st, and June 1st, and included the following subjects:—Piano, singing, organ, the theory of music, choral, violin and piano-tuning, class work.

Sixty candidates were presented from the various examinations, a much smaller number than in previous years.

Piano.—There were twenty candidates in piano-playing.

In Grade No. 1 of six pupils, two gained honours (70 marks or over), two passed and two failed.

In Grade No. 2, one student passed.

In Grade No. 3, one obtained honours.

In Grade No. 4, one reached the honour standard and one passed.

In Grade No. 5, one gained honours and another passed.

In Grade No. 6, one received honours, three passed and one failed.

There are three pupils in the "progress" stage, who are preparing for the Graduation Diploma of Licentiate ship; of these, two show exceptional ability, and the third has considerable talent, and should eventually do well.

I understand that all the successful students in this subject are pupils of Miss Harrington and Miss Smyth, and these teachers are to be warmly congratulated on the efficiency of their work.

Organ-playing.—Seven candidates were presented in this subject.

In Grade No. 1, two candidates entered, one gained honours, and one passed.

In Grade No. 3, one candidate passed.

There are four candidates in the "progress" stage, two of these showed ability far above the average, another gave fair promise, and the fourth did fairly well.

More attention to detail in matters of phrasing, tempo, scales, pedalling, registration, and fingering is most desirable throughout this department.

It is most satisfactory to know that the Department of Education has decided to install a three-manual organ, with mechanism of the most modern type. This welcome addition to the equipment will assist both teacher and student, and will assist materially in developing and encouraging the art of organ-playing in this Institution.

Singing and Voice Production.—Six candidates were examined in this subject.

In Grade No. 1, the candidate who entered received a "pass."

In Grade No. 3, there were two candidates; one gained honours and one "passed."

In Grade No. 4, one passed with honours.

Two candidates were presented in the "progress" stage, one a tenor and the other a baritone; both are intelligent pupils and possess voices of much promise.

In this department which is under the sole control of Mr. W. Norman Andrews, considerable improvement has taken place, particularly in the important point of voice production.

Theory of music.—Nine students were examined in the Rudiments of Music, (Part 1).

Of these, one gained first-class honours, three gained honours, three passed, and two failed.

This particular class is now under the guidance of Miss M. Jones, to whom much credit is due for the highly satisfactory result of this examination.

It should be a "sine-qua-non" that the Rudiments, both Parts I and II, should form part of the Annual Theoretical Examination in the Ontario School for the Blind.

In Harmony, Grade No. 1, there were two pupils and both obtained honours.

In Grade No. 2, Harmony and Counterpoint, the two pupils entering obtained honours.

In Grade No. 3, Harmony, Counterpoint and History, seven students' papers were examined. One received honour standing, five passed and one failed. One in History only, was unsatisfactory.

In Grades 2 and 3 a very fair knowledge of counterpoint was displayed, but in several cases the harmony and history were weak.

I should like to add that I was very much impressed at the facility with which the majority of the pupils took down in point print, the questions in all the theoretical subjects which I personally dictated.

Teaching (Normal) Certificate Class:

This class of six students is under the instruction of the Musical Director, Mr. W. Norman Andrews.

Four of these were tested for the Teachers' certificate; one reached honour standing, three passed, and two others did fairly well in the progress stage.

Many of the students possess a considerable amount of information, but apparently have little idea of assimilating and applying their knowledge in such a manner as to be useful for imparting it to others.

From the careful observation that I have made, I have come to the conclusion that there are many students in this institution whose abilities are under-estimated, and whose mental capacity is such that they should be able to obtain a higher standing in their varied subjects of study.

The Choral Class, which numbers about forty members, is doing capital work under the direction of Mr. W. Norman Andrews.

I listened with much interest to their singing of several four-part songs, both accompanied and unaccompanied.

Technically a very considerable advance has been made in this work.

In all the selections the pitch and the enunciation were distinctly good. A little more attention, however, might be given to the phrasing and the expressional side, i.e., the light and shade.

Violin Class.—I was particularly pleased with the performance of a small ensemble class of violin students, pupils of Mr. Ostler, who is to be congratulated on their progress.

It is gratifying to know that encouragement is given to the study of the violin.

Piano-tuning.—Mr. J. D. Ansell has, at present, about twenty students under his direction.

This department displays a higher degree of efficiency than in previous years.

The instructor and his pupils are evidently working well together with excellent results.

Several of the "old boys," who have recently left the School, have obtained good, well-paid positions as piano tuners.

In concluding my report I should like to congratulate the Ontario School for the Blind on the appointment of Major Clarkson W. James as Principal.

The interest which he takes in music will, one feels sure, enable him to co-operate with teachers and pupils in making the music department of the School, a great success in the future.

I have the honour to be,

Sir,

Yours obediently,

ALBERT HAM, MUS. DOC., F.R.C.O.,

Toronto, June 7th, 1917.

W. B. RACE, Esq., B.A.,

Superintendent, School for the Blind, Brantford.

SIR,—Music is a very important factor in the education of the blind, and the musical profession, with its many branches, offers excellent means of livelihood to our blind boys and girls. Under these circumstances every facility should be given for as thorough a musical education as possible. A well qualified faculty is not only necessary, but an up-to-date equipment is absolutely essential to any degree of success.

The purchase of a number of pianos has already added to the efficiency of both the tuning and teaching departments. A small two-manual practice organ, with the installation of the new three-manual electric organ would give the musical department of the Ontario School for the Blind as good an equipment as could be desired and equal to any school I have visited in England.

Many of the present students in music have good ability and take an intelligent and enthusiastic interest in their work.

No better test of the thoroughness of the teaching and training of the pupils in the different branches of music—organ, piano, violin and vocal—can be had than the excellent performance of the programme given by the pupils at the O.S.B. Hall. At these recitals, technical ability, musical intelligence and self-control, all add their tribute to the work of the teachers.

I am pleased to state that the Normal class has just accomplished the arduous task of writing in "point print" a copy of "Gurlit's Instruction Book." A duplicate copy in "point print" of the sighted music, is necessary to the blind teacher.

I would recommend that the blind teacher be given the opportunity of teaching a sighted pupil, while going through the Normal course.

I would also endeavour to impress the authorities with the importance of allowing the advanced pupils the opportunity of taking part in concerts, outside the O.S.B., as this would be an excellent means of bringing before the public the capabilities of the blind.

Permit me to express my appreciation of the present excellent conditions existing at the School. The greatest good, both to the education and future success of the blind, cannot but be the happy results.

I remain,

Faithfully yours,

W. NORMAN ANDREWS,
Musical Director.

PHYSICIAN'S REPORT

TO THE HONOURABLE R. A. PYNE, M.D., LL.D.,

Minister of Education.

SIR,—I have the honour to present my annual report for the year ending October 31st, 1917.

The death, during the past summer, of Mr. W. B. Wickens, an officer, who for many years had been connected with our School, came as a shock to his many friends in the Department, as well as to the citizens of Brantford, pupils and ex-pupils of years past. He will be remembered by those associated with him as a man of high ideals and one who was deeply interested in the welfare of his pupils, not only from a keen sense of duty but for the love of his life work and for those who came under his care.

A young male pupil died suddenly of meningitis during the session.

The general health of the officers and pupils was good during the year.

I cannot express my appreciation for the consideration your Department has shown my work here during the year. The appointment of a professional nurse has been a great assistance to me and tended to more accurate medical supervision. The work of Miss Wright, who holds the appointment, is excellent. She has proved most careful and painstaking in performing her duties. The hospital wards which have been so splendidly rearranged added much to the effective work being done.

Thanking you again for your special interest in the medical side of our school life.

I have the honour to be,

Sir,

Your obedient servant,

J. A. MARQUIS.

Brantford, November 1, 1917.

REPORT OF INDUSTRIAL DEPARTMENT FOR SESSION ENDING JUNE, 1917

W. B. RACE, B.A., *Principal.*

SIR,—I have the honour to report that during the session just closed eleven pupils were given instruction in reed and fibre furniture making, six in basket making and eleven in chair caning. In addition to the technical training given to them, they were taught business methods and salesmanship.

In teaching them the art of selling, I found our show room an invaluable asset, providing as it does a medium between customer and pupil, which is highly essential in teaching the pupils how to approach prospective customers.

One hundred and forty-one baskets, and fifty-eight pieces of furniture were made and disposed of for the sum of \$255.35.

At the bazaar, eighty-three baskets and twenty-six pieces of furniture were also sold, realizing the sum of \$165.00, which was presented to the Brantford Patriotic Fund.

Reports received from ex-pupils of this department are most encouraging, one reporting that he had earned during the previous month the sum of seventy-nine dollars and fifty cents, another reporting that he had earned twenty-four dollars that week, which is tangible evidence of the suitability of basket making as a vocation for the blind.

Owing to the fact that willow baskets cannot be made by machinery, the blind man in this instance, at least, is not competing with machine made goods, and although he may not be quite as fast a worker as his sighted competitor, he certainly can work fast enough to successfully compete with him.

The twelve chair vices and the practice chairs which were added to the cane seating department early in the session have proven a welcome addition, filling, as they do, a long felt want.

Early in the session it was decided to establish a broom making department; with this end in view I was instructed to visit a number of workshops for the blind and prepare an estimate of the cost of installing same. As a result of this report the machinery was ordered and we now have installed a fully equipped broom shop, capable of taking care of the present requirements of this School. I might add in this connection that so far as I have been able to ascertain, broom making is being taught in every school for the blind on the American Continent, and it is also a leading occupation in many workshops for the blind.

Although shoe repairing has been taught for many years in schools for the blind in England, it has so far not been taught in any school in the United States or Canada. However, it was decided to add it to the trades already taught here. For this purpose, Mr. Tooth, a graduate of the Manchester School for the Blind (who was carrying on a successful shoe repairing business in Hamilton), was engaged to take charge of this work and the necessary equipment has been ordered. The suitability of shoe repairing as a vocation for the blind of Ontario has yet to be proven, although the success achieved by Mr. Tooth in Hamilton gives promise of success, especially to those who are located in the working men's districts of cities and towns.

Respectfully submitted,

W. B. DONKIN,

Head of Industrial Department.

OCULIST'S REPORT

TO THE HONOURABLE R. A. PYNE, M.D., LL.D.,

Minister of Education.

SIR,— I have the honour to report the results of the examination of the pupils' eyes for the year 1917.

In all one hundred pupils were examined. Of these eight males and five females were new pupils and examined for the first time. This did not include all the pupils enrolled as probably half a dozen were absent from one cause or another at the time.

A positive classification of the pupils as to the disease causing blindness is very difficult, and in some cases impossible, because of the inevitable lack of complete or

reliable histories, while the removal or great deformity of many eyes precludes a classification from clinical evidence.

Disease	Males	Fe- males	Total	Per- centage
Ophthalmia Neonatorum.....	12	14	26	26
Optic Atrophy	9	8	17	17
Cataract, Congenital and Lamellar	4	9	13	13
Injury of one eye followed by Sympathetic Ophthalmia in the other	6	2	8	8
Injury by gunshot wounds, powder and dynamite explosions	5	5	5
Interstitial Keratitis.....	3	2	5	5
Congenital Coloboma of Iris and Chorioid.....	4	4	4
Retinitis Pigmentosa.....	2	1	3	3
Uveitis.....	2	1	3	3
Myopia with resulting changes.....	2	1	3	3
Chorioiditis.....	1	1	2	2
Measles	2	2	2
Microphthalmus	1	1	1
Buphthalmus	1	1	1
Symblepharon	1	1	1
Growth, eyes enucleated, probably Glioma	1	1	1
Congenital amblyopia in one eye, other normal	1	1	1
Cause undetermined by appearance or history.....	1	3	4	4
Total	58	42	100	

The class of ophthalmia neonatorum is probably the most difficult to be definite about because of the frequent great destruction of the ball of the eye; and as for the assigned causes of the blindness in the application forms they are more often given as "colds," carelessness of the nurse or doctor, etc., than gonorrhœa. Consequently, of the twenty-six cases placed in this class, fourteen have definite histories and the remaining twelve have indefinite histories, and clinical appearances indicating this disease.

What has been said of ophthalmia neonatorum largely applies also to the cases of blindness due to diseases resulting from inherited syphilis. Interstitial keratitis, of which there are five cases, we know to be due to syphilis, and two cases of optic atrophy and one case of chorioiditis have definite histories and other indications of syphilis. It is probable that some of the cases classed as retinitis pigmentosa are really due to syphilis.

Particular reference is made to these two diseases because of the prominence, at the present time, given to the subject of venereal diseases; and would sum up by saying that at a conservative estimate thirty-four per cent. of the cases examined are blind as the result of venereal diseases. This is considerably lower than the estimate made public recently that half the cases of blindness in Canada were due to gonorrhœa alone.

Of the other diseases little need be said, especially of the congenital conditions. In explanation of the two cases due to measles, I may say this is the cause given in the histories, but the present condition of the eyes precludes a diagnosis of the original disease.

The percentage of cases of "preventable blindness" is lower this year than last, in the total, although of the thirteen new pupils examined five are so classed.

Two pupils were found to have normal sight in one eye, with no probability of their becoming diseased, making it advisable for them to return to Public School for their education.

The condition of vision of the various pupils is as follows:

	Males	Fe- males	Total
Without perception of light in either eye.....	8	16	18
Perception of light only in one eye.....	13	9	22
Perception of light only in both eyes.....	6	3	9
Limited objective vision in one eye.....	17	8	25
Limited objective vision in both eyes.....	14	12	26
	58	42	100

This means there are eighteen pupils in total darkness, and thirty-one who can tell light from darkness but cannot distinguish objects.

The Superintendent has asked if I can explain why there are fewer pupils attending the School now than there were some years ago. It is a difficult question to answer. If, as we hope, it is due to fewer blind children in the country, which I really believe to be the case, the fact is very gratifying. Of course there is always considerable fluctuation in the number of pupils attending from year to year; some drop out for a year or so for various reasons, mainly on account of general health conditions. Some are temporarily absent or on the sick list at the time the examination is made. But the records show lower percentages of blind in certain classes, particularly ophthalmia neonatorum. This is no doubt due to the effort made, mainly by oculists, to impress upon obstetricians, midwives and hospitals the necessity for more care of the infants' eyes, and the use of prophylactic measures in all cases.

But probably the greatest influence in the last year or two has been the economic condition of our country. Some of the pupils have gone to positions which might not have been available had not the demand for labour been so great. Everyone possible being employed at unusually high wages has probably had some influence in keeping some children at home where the problem of maintaining them has not been serious enough to make it convenient to trust that to the Government. Because we cannot but conclude from the comparatively advanced age at which some children are sent to this School to start their education, that some parents are very loath to have their blind child away from their personal protection. And finally the falling off in immigration has produced some effect, as we have had several children at the School who came into the country blind.

Respectfully submitted,

B. C. BELL.

Brantford, January 7th, 1918.

Ontario School for the Blind

STATISTICS FOR THE YEAR ENDING 31st OCTOBER, 1917
